10 Things to do before getting married Luís Henrique De Araújo, 2014-07-28 If I had done all the 10 things included in this book before I got hitched, I am sure my marriage would have survived. This book was nothing more than a great idea the author had after being married from 2005 to 2010 and realising that he wasn't ready; that there were still things he wanted to do, which he should have done before he got married. You need to be ready for a long-lasting marriage, otherwise you will always be thinking of a way out just to do the things you always wanted to do as a single person. This book is written in the hope that other people can avoid wasting a significant part of their lives feeling trapped and resentful. If you read this book at the age of 20 and apply one chapter per year, by the time you are 30 years old you will be settled down with a family, in the marriage of your dreams, with no desire to be single again because you'll have lived life to the full leading up to that point. By following this innovative system, you will find yourself beginning to prepare to settle down year by year. Once you read the advice detailed in this book, you will see yourself begin to move ever closer to fully creating, and then living, the happily married life of your dreams.

10 Things to Do Before You're 16 Caroline Plaisted, 2006-06-06 Beth and Anna create a list of ten things that they must do in order to become beautiful goddesses who are irresistible to guys, but after several disasters involving fake tans and hair extensions, they find themselves a long way from their goal. They'd planned to spend their fifteenth year transforming themselves from mediocre mates to gorgeous goddesses. But when they notice that their sixteenth birthdays are rapidly approaching, they realize that they're running a bit behind schedule.

The Last Lecture Randy Pausch,2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned--about living in the present, building a legacy, and taking full advantage of the time you have--in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. --Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave--Really Achieving Your Childhood Dreams--wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

The First 20 Hours Josh Kaufman,2013-06-13 Forget the 10,000 hour rule-- what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills--time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition-- how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard key-

board, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, The First 20 Hours will help you pick up the basics of any skill in record time . . . and have more fun along the way.

Drive Daniel H. Pink,2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of When: The Scientific Secrets of Perfect Timing Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of To Sell Is Human: The Surprising Truth About Motivating Others). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction-at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.
