Hiking the Road to Ruins David A. Steinberg,2007-03-29 In this user-friendly, beautifully illustrated, and occasionally eccentric guidebook, David A. Steinberg blazes the trail to more than twenty unusual landmarks and hard-to-find destinations-all within a two-hour drive of New York City. Geared for the experienced hiker or camping adventurer, the book includes hikes to a variety of urban ruins, including a World War II-era air force base, a vacant dairy farm, pine plantations, abandoned quarries, tunnels, cemeteries, and iron mines. Each chapter contains detailed directions, a hand-drawn map, suggestions for the optimal time and season to visit, and GPS coordinates to specific sites. Bringing fifteen years of experience as a leader of hikes, Steinberg leaves no part of the trip unplanned. He even suggests ideal conditions for the outing. An overcast day, for instance, sets up the haunted atmosphere appropriate for visiting a water tower in Mountainside, New Jersey, that has links to a murder-suicide in the 1970s. For less experienced hikers, the guide also includes a chapter on equipment and safety, detailed instructions on how to program a hand-held Global Positioning System receiver, and a glossary of terms. Both a practical guide and a creative chronicle, this book is bound to please hikers and history buffs alike.

Pro Android Python with SL4A Paul Ferrill, 2011-08-21 Pro Android Python with SL4A is for programmers and hobbyists who want to write apps for Android devices without having to learn Java first. Paul Ferrill leads you from installing the Scripting Layer for Android (SL4A) to writing small scripts, to more complicated and interesting projects, and finally to uploading and packaging your programs to an Android device. Android runs scripts in many scripting languages, but Python, Lua, and Beanshell are particularly popular. Most programmers know more than one programming language, so that they have the best tool for whatever task they want to accomplish. Pro Android Python with SL4A explores the world of Android scripting by introducing you to the most important open-source programming languages that are available on Android-based hardware. Pro Android Python with SL4A starts by exploring the Android software development kit and then shows you how to set up an Eclipse-based Android development environment. You then approach the world of Android programming by using Beanshell, which runs on the Dalvik, and learning how to write small programs to administer an Android device. Next, discover how Lua, a lightweight language perfectly suited for scripting on smaller devices, can work with Android. Lua can be used for small but important tasks, like SMS encryption and synchronizing photos with flickr. Last, but certainly not

least, you will discover the world of Python scripting for SL4A, and the power contained within the full range of Python modules that can combine with the Android SDK. You'll learn to write small location-aware apps to get you started, but by the end of this book, you'll find yourself writing fully GUI-fied applications running on the Android desktop! Pro Android Python with SL4A is rounded out with a chapter on distributing and packaging scripts, a skill that you'll find very useful as you reach out to a wider audience with your programs.

In the Memory of the Map Christopher Norment,2012-03-15 Throughout his life, maps have been a source of imagination and wonder for Christopher Norment. Mesmerized by them since the age of eight or nine, he found himself courted and seduced by maps, which served functional and allegorical roles in showing him worlds that he might come to know and helping him understand worlds that he had already explored. Maps may have been the stuff of his dreams, but they sometimes drew him away from places where he should have remained firmly rooted. *In the Memory of the Map* explores the complex relationship among maps, memory, and experience—what might be called a “cartographical psychology” or “cartographical history.” Interweaving a personal narrative structured around a variety of maps, with stories about maps as told by scholars, poets, and fiction writers, this book provides a dazzlingly rich personal and intellectual account of what many of us take for granted. A dialog between desire and the maps of his life, an exploration of the pleasures, utilitarian purposes, benefits, and character of maps, this rich and powerful personal narrative is the matrix in which Norment embeds an exploration of how maps function in all our lives. Page by page, readers will confront the aesthetics, mystery, function, power, and shortcomings of maps, causing them to reconsider the role that maps play in their lives.
