Where Do Jet Planes Sleep at Night? Brianna Caplan Sayres,2018-09-18 Now available in a portable board book edition--perfect to take with you on an airplane! The same team that brought you Where Do Diggers Sleep at Night? and Where Do Steam Trains Sleep at Night? has created another high-flying bedtime story--this one for plane enthusiasts! Have you ever wondered what little airplanes do when it's time for bed? Jumbo jets, biplanes, helicopters--even Air Force One!--power down, wash up, and listen to stories with mommy and daddy planes beneath a blanket of stars, getting ready to fly to dreamland. Little airplane lovers will be tickled to see how bedtime is the same for their favorite flying vehicles as it is for them, as they come down to earth for sleepy time. Combining a quiet, nocturnal story with the ever popular subject of flying machines, this is a nifty bedtime book for budding aviators. —Kirkus Reviews

The Life of David Lack Ted R. Anderson, 2013-06-01 Most people who have taken a biology course in the past 50 years are familiar with the work of David Lack, but few remember his name. Almost all general biology texts produced during that period have a figure showing the beak size differences among the finches of the Galapagos Islands from Lack's 1947 classic, *Darwin's Finches*. Lack's pioneering conclusions in *Darwin's Finches* mark the beginning of a new scientific discipline, evolutionary ecology. Tim Birkhead, in his acclaimed book, *The Wisdom of Birds*, calls Lack the 'hero of modern ornithology.' Who was this influential, yet relatively unknown man? *The Life of David Lack, Father of Evolutionary Ecology* provides an answer to that question based on Ted Anderson's personal interviews with colleagues, family members and former students as well as material in the extensive Lack Archive at Oxford University.

Decomposition of Alloys: The Early Stages P. Haasen, V. Gerold, R. Wagner, 2016-07-28

Decomposition of Alloys: The Early Stages contains the proceedings of the 2nd Acta-Scripta Metallurgica Conference held in Sonnenberg, Germany, on September 19-23, 1983. Contributors discuss the early stages of decomposition in alloys, placing emphasis on the unsolved problems of the field, rather than on the solved ones. This book has 36 chapters and opens with a discussion on developments in the theory of the kinetics of first-order phase transitions, followed by an analysis of metastability and spinodal nucleation; neutron scattering during decomposition of aluminum alloys; Ostwald ripening of precipitates; and phase stability under irradiation. The next chapters explore decomposition processes in Al-Zn alloys; thermal decomposition in Cu-Ni-Fe alloys; and the initial stages of discontinuous precipitation reactions. Other papers focus on the mechanisms of plate

precipitate growth; spinodal decomposition and continuous ordering; and early stages of decomposition in Ni-Al single crystals. This monograph will be of interest to students and practitioners of physics and metallurgy.

Applying Maths in the Chemical and Biomolecular Sciences Godfrey Beddard,2009-09-03 Applying Maths in the Chemical and Biomolecular Sciences uses an extensive array of examples to demonstrate how mathematics is applied to probe and understand chemical and biological systems. It also embeds the use of software, showing how the application of maths and use of software now go hand-in-hand.
