Big Bang Theory ,2010

The Big Bang Never Happened Eric Lerner,2010-12-15 A mesmerizing challenge to orthodox cosmology with powerful implications not only for cosmology itself but also for our notions of time, God, and human nature -- with a new Preface addressing the latest developments in the field. Far-ranging and provocative, *The Big Bang Never Happened* is more than a critique of one of the primary theories of astronomy -- that the universe appeared out of nothingness in a single cataclysmic explosion ten to twenty

billion years ago. Drawing on new discoveries in particle physics and thermodynamics as well as on readings in history and philosophy, Eric J. Lerner confronts the values behind the Big Bang theory: the belief that mathematical formulae are superior to empirical observation; that the universe is finite and decaying; and that it could only come into being through some outside force. With inspiring boldness and scientific rigor, he offers a brilliantly orchestrated argument that generates explosive intellectual debate.

Me and the Big Bang Dr. Richey Novak, 2010-07-02

Like medieval mystics wanting to understand and even merge with God, many people today want to comprehend their relationship to the universe, but also feel comfortable in it. Finding one's place in the vastness of time and space is a daunting task for which searchers need all the help they can get. In *Me and the Big Bang*, Richey Novak shares reflections from his own quest to find the meaning and purpose of life while exploring the often complicated man-universe relationship. Novak uses insights from the worlds of science, anthropology, and psychology to outline the unfolding of the universe from the moment of origin down a long evolutionary path that ultimately culminated, for him, in individual consciousness and self-awareness. Tracing a path from the Big Bang theory to the evolution of man to myths and religions, Novak provides answers to the common questions that virtually all humans have at one time or another. *Me and the Big Bang* an intimate, honest exploration of the process of coming into being and living a rich, full life that will help anyone ready to embark on their own journey to the truth.

The last twenty-four hours are a blank; he doesn't remember anything since he stepped into his skycar, chasing a tip on the Big Bang murders. For weeks the killings have stumped every officer in the government—costing six of them their lives—but a soprano named Palsy Hatchbacker told Jake she knew something that could break open the case. Before he met Miss Hatchbacker, a carnation-wearing goon spritzed Jake with a memory-wiping spray. When the police found him, he was sleeping peacefully next to Palsy's corpse, a laser pistol in his hand. /divDIV /divDIVWhile he rots in jail, the Big Bang killer continues his rampage. Inventory of the Universe: Assembling an Infinite Number of Puzzle Pieces ... Perfectly Sam

Kneller,2016-03-16 Information is more accessible than ever before. If we want to keep up with what's going on in the world, a twenty-four-hour news cycle will provide us with more facts than we can possibly absorb. And yet, this constant stream of data doesn't yield meaningful answers. Why is there political unrest throughout the globe? Why, with all of our technological advances, haven't we eliminated poverty? Why does injustice exist? Why are we here at all? *Inventory of the Universe: Assembling an Infinite Number of Puzzle Pieces . . . Perfectly* helps us make sense of our questions by starting at the beginning. With the help of a time-traveling reporter named Galacti, Sam Kneller takes us from the Big Bang to the present day, exploring the ways in which 13.8 billion years of intergalactic happenings have led to a human species that thinks, acts, and interacts as it does. For those of us who are ready to escape the limits of our daily perceptions, *Inventory of the Universe* will open the door to a greater understanding of our world . . . and ourselves.

The Big Bang Never Happened Eric J. Lerner,1991

A Relevance-Theoretic Approach to Decision-Making in Subtitling Łukasz Bogucki,2020-07-13 This book aims to investigate the process of decision-making in subtitling of feature films and entertainment series. The author uses Relevance Theory (Sperber and Wilson,1986) to argue that the technical, linguistic and translational constraints at work in subtitling result in a curtailed target text, and illustrates this argument by invoking examples drawn from the English-Polish subtitles of films and television series available through the subscription service Netflix. After introducing the current state of research on audiovisual translation within and outside the framework of translation studies, he presents the core concepts underpinning Relevance Theory and explains how it can be used to construct a model of the process of subtitling. This book will be of interest to students and scholars working in the fields of translation studies, audiovisual translation studies, and communication studies.

GAME OF LUMIEL CICERO LAURINDO,2021-02-02

There are many names for him in different times and cultures. Lumiel came to earth when mankind was still primitive alongside a group of beings of equal power, beings from planets and solar systems much older than the earth and its young star ... The story is composed of celestial soldiers brought to the planet with the mission of helping humanity and saving it from its extinction. It is now up to Lumiel to lead them towards the final battle that involves past lives over various historical events towards their final peak.

The Shape of God Terry David Silvercloud, 2007 An explanation about the nature of material reality and motion, how solids, liquids, and gases come to be, the nature of the Sun and planets, the importance and nature of shapes and dimensional values, human evolution, the nature of religions and God, problems upon Earth and possible solutions, the history of Islam, the history of Christianity, the history of the Bible, the history of the Knight's Templar, the history of the Freemasons, notes about wave-lengths and frequencies. I will prove to you that the Earth has never made a circle (nor an ellipse) around the Sun and never will. I will prove to you that something DOES go much faster than light and that it does, indeed, curve space. The stuff that goes faster than light is the sub-atomic stuff that presents to us the stuff we call matter. How about that? And that's just the beginning of surprises.
