**Handbook of Research on Transforming Teachers' Online Pedagogical Reasoning for Engaging K-12 Students in Virtual Learning** Niess, Margaret L.,Gillow-Wiles, Henry,2021-06-25 The COVID-19 pandemic drastically transformed the classroom by keeping students and teachers apart for the sake of safety. As schools emptied, remote learning rapidly expanded through online services and video chatrooms. Unfortunately, this disrupted many students and teachers who were not accustomed to remote classrooms. This challenge has forced K-12 teachers to think differently about teaching. Unexpectedly and with little time to prepare, they have been confronted with redesigning their curriculum and instruction from face-to-face to online virtual classrooms to protect students from the COVID-19 virus while ensuring that these new online initiatives remain sustainable and useful in the post-pandemic world. As teachers learn to take advantage of the affordances and strengths of the multiple technologies available for virtual classroom instruction, their instruction both in online and face-to-face will impact what and how students learn in the 21st century. The *Handbook of Research on Transforming Teachers' Online Pedagogical Reasoning for Engaging K-12 Students in Virtual Learning* examines the best practices and pedagogical reasoning for designing online strategies that work for K-12 virtual learning. The initial section provides foundational pedagogical ideas for constructing engaging virtual learning environments that leverage the unique strengths and opportunities while avoiding the weaknesses and threats of the online world. The following chapters present instructional strategies for multiple grade levels and content areas: best practices that work, clearly describing why they work, and the teachers' pedagogical reasoning that supports online implementations. The chapters provide ways to think about teaching in virtual environments that can be used to guide instructional strategy choices and recognizes the fundamental differences between face-to-face and virtual environments as an essential design component. Covering such topics as K-12 classrooms, pedagogical reasoning, and virtual learning, this text is perfect for professors, teachers, students, educational designers and developers, instructional technology faculty, distance learning faculty, and researchers interested in the subject.

**Using Emerging Technologies to Enhance Student Engagement** Reynol Junco,Dianne M. Timm,2008 Today's college students have never known a time when personal computers did not exist. They attended K-12 schools where most of

their classrooms were equipped with computers. Information technology has always been part of their learning process, not to mention the impact it has had on the development of their friendships, research and writing skills, shopping, and choice of college or university to attend. They expect that institutions of higher education will respond to their inquiries without delay, much in the same way that customer service is handled on the Web. Student expectations are driving the creation of live Web chats, in-house social networking sites, university wiki, and shared virtual spaces. Unfortunately, higher education faculty and staff in general, and student affairs professionals in particular, are behind the curve in their use of information technology. Student affairs professionals are only starting to become aware that they should learn about the technologies that students have already integrated into their lives. It is imperative that student affairs professions understand these technologies and learn how to implement them to enhance student learning build a sense of community increase student engagement facilitate communication This volume examines recent research on how information technology is affecting college student development and explores ways in which institutions are responding to increased demands for using emerging technology in supporting students. This is the 124th volume of the Jossey-Bass quarterly report series New Directions for Student Services, an indispensable resource for vice presidents of student affairs, deans of students, student counselors, and other student services professionals. Each issue of New Directions for Student Services offers guidelines and programs for aiding students in their total development: emotional, social, physical, and intellectual.
