The Extreme Life of the Sea Anthony R. Palumbi,Stephen R. Palumbi,2021-10-26 A thrilling tour of the sea's most extreme species, coauthored by one of the world's leading marine scientists The ocean teems with life that thrives under difficult situations in unusual environments. The Extreme Life of the Sea takes readers to the absolute limits of the ocean world—the fastest and deepest, the hottest and oldest creatures of the oceans. It dives into the icy Arctic and boiling hydrothermal vents—and exposes the eternal darkness of the deepest undersea trenches—to show how marine life thrives against the odds. This thrilling book brings to life the sea's most

extreme species, and tells their stories as characters in the drama of the oceans. Coauthored by Stephen Palumbi, one of today's leading marine scientists, *The Extreme Life of the Sea* tells the unforgettable tales of some of the most marvelous life forms on Earth, and the challenges they overcome to survive. Modern science and a fluid narrative style give every reader a deep look at the lives of these species. *The Extreme Life of the Sea* shows you the world's oldest living species. It describes how flying fish strain to escape their predators, how predatory deep-sea fish use red searchlights only they can see to find and attack food, and how, at the end of her life, a mother octopus dedicates herself to raising her batch of young. This wide-ranging and highly accessible book also shows how ocean adaptations can inspire innovative commercial products—such as fan blades modeled on the flippers of humpback whales—and how future extremes created by human changes to the oceans might push some of these amazing species over the edge.

Sensational Sea Creatures Buddy Davis, Kay Davis, 2006
Ages 9 to 12 years. A must-have for any home or school library, this fascinating book highlights 30 of the most fascinating creatures in the sea. The beautiful full-colour photographs and interesting descriptions highlighting the design features of each creature make this book a must read.

Marine Life and the Sea David H. Milne, 1995 This introductory text covers the principles of marine biology, including marine organisms and their ecological interactions, and the role of ocean mechanisms and marine organisms in maintaining global stability. In addition this book covers the following aspects more completely than most texts: (1) an expanded view of the whole earth and the human role in it, including global warming, UV damage

to marine systems via ozone depletion, and possible Gaia feedback mechanisms; (2) fisheries, a topic that is essential to understanding the human/sea relationship but has been traditionally ignored by marine biologists, (3) a much better treatment of marine life in the geologic past.

438 Days Jonathan Franklin, 2015-11-17 The miraculous account of the man who survived alone and adrift at sea longer than anyone in recorded history. For fourteen months, Alvarenga survived constant shark attacks. He learned to catch fish with his bare hands. He built a fish net from a pair of empty plastic bottles. Taking apart the outboard motor, he fashioned a huge fishhook. Using fish vertebrae as needles, he stitched together his own clothes. Based on dozens of hours of interviews with Alvarenga and interviews with his colleagues, search and rescue officials, the medical team that saved his life and the remote islanders who nursed him back to health, this is an epic tale of survival. Print run 75,000.

Red Sea Marine Life, 2022-10-24 You have never seen such a Red Sea! The pages are full of previously unknown species of fish, nudibranchs, and crustaceans. Many of them were discovered by the author and his colleagues. But even previously well-known species are photographed with unprecedented quality! This author's photo guides on fish, nudibranchs, crustaceans, sea shells, echinoderms and flatworms have been highly acclaimed by divers and scientists, but he has always dreamed of writing a comprehensive book on the fauna of coral reefs in the Red Sea. And *Red Sea Marine Life* is a truly comprehensive: 2900 full colour photographs of 2100+ species, including 810+ fish species, 250 cnidarians (corals and relatives) and near 350 species of nudibranchs and sea slugs. Live photo of hundreds of species have never before appeared in field guides or popular books. The most experienced Red Sea

dive guides open their eyes wide when they see photos of rare and beautiful fish or nudibranchs species in this book. A lot has changed in marine biology in the two decades since the previous Red Sea guides were published. And this book is based on the latest research. Red Sea Marine Life will make you take a fresh look at the seemingly well-known Red Sea, the house reef of Europe.

Sea Creatures from the Sky Ricardo

Cortés,2018-04-03 The phenomenal artwork is what truly makes this book special. The landscapes of the sea, the sky, and outer space are breathtaking. Cortés's different blending and thinning of the colors create a world of beauty. This fascinating tale of perspective and point of view makes a fine addition for most collections. --School Library Journal Sumptuous paintings and an engaging conceit make this a terrific read-aloud choice. --Wall Street Journal A stunningly illustrated story of a shark who has a frightening encounter with 'sea creatures' who come from above. --Brooklyn Daily Eagle Cortés' premise has child appeal and even some STEM utility, and his lovely illustrations invite contemplation of the teeming worlds above and beneath the sea...The depictions of the curve of the Earth in space and of the sky--cloudy or starry, always vast--are lush...Enjoy this tale's accomplished visuals and percussive rhymes. --Kirkus Reviews [A] memorable and beautifully illustrated children's picture book...Ricardo Cortés's stunning seascapes follow the adventures of a shark that has a story to share about creatures who live above the ocean...Filled with humor and warmth, Sea Creatures from the Sky will charm and entertain children. --Midwest Book Review One can applaud Cortés for inviting us to learn about sharks...children will enter and emerge from this book with a new understanding of humans' interest in sharks and ocean life. --New York Journal of

Books Stunning illustrations immerse us into understanding the shark's perspective. A valuable concept that can change how we think of any fellow earth dwelling creature be it on earth or in the sea. --The Reading Ninja The story moves in a poetic ebb and flow of an ocean current, and is well balanced by the very colorful illustrations. --Inspire the Muse A beautifully rhymed and painted book that is almost philosophically asking about the being and existence of otherness. Proved and tested with my two-year-old, who became very tranquil and curious looking at the beautiful seascape. --The Manolist This is a gorgeously illustrated view of the world by a shark. --The Cyberlibrarian A beautifully illustrated book that is a magical and compelling read! --MyShelf Enchanting. You feel like you're in the water swimming with the other fish...The images alone are worth the price of the book. --Journey of a Bookseller A shark, swimming the seas, encounters...Aliens. Will anyone believe it is true? Sea Creatures from the Sky is a gorgeously illustrated children's picture book from the New York Times best-selling illustrator of Seriously, Just Go to Sleep. Cortés's stunning seascapes follow the adventures of a shark that has a story to share about creatures who live above the ocean. Our shark encounters strange-looking creatures who resemble nice, caring marine biologists. But after they release it back into the ocean, the shark cannot find one friend to believe its tale. Filled with humor and warmth, Sea Creatures from the Sky will charm children and parents alike.

The Life of the Red Sea Dhow Dionisius A. Agius,2019-04-04 Few images are as evocative as the silhouette of the Arab dhow as, under full sail, it tacks to windward on glittering waters of Red Sea before moving across the face of the rising or setting sun. In this authoritative new book, Dionisius A. Agius, one of the foremost scholars of Islamic material culture, offers a lucid and wide-ranging history of the iconic dhow from medieval to modern times. Traversing the Arabian and African coasts, he shows that the dhow was central not just to commerce but to the vital transmission and exchange of ideas. Discussing trade and salt routes, shoals and wind patterns, spice harvest seasons and the deep and resonant connection between language, memory and oral tradition, this is the first book to place the dhow in its full and remarkable cultural contexts.

How Far the Light Reaches Sabrina Imbler,2022-12-06 A fascinating tour of creatures from the surface to the deepest ocean floor: this miraculous, transcendental book invites us to envision wilder, grander, and more abundant

possibilities for the way we live (Ed Yong, author of *An Immense World*). A queer, mixed race writer working in a largely white, male field, science and conservation journalist Sabrina Imbler has always been drawn to the mystery of life in the sea, and particularly to creatures living in hostile or remote environments. Each essay in their debut collection profiles one such creature, including: ·the mother octopus who starves herself while watching over her eggs, ·the Chinese sturgeon whose migration route has been decimated by pollution and dams, ·the bizarre, predatory Bobbitt worm (named after Lorena), ·the common goldfish that flourishes in the wild, ·and more. Imbler discovers that some of the most radical models of family, community, and care can be found in the sea, from gelatinous chains that are both individual organisms and colonies of clones to deep-sea crabs that have no need for the sun, nourished instead by the chemicals and heat throbbing from the core of the Earth. Exploring themes of adaptation, survival, sexuality, and care, and weaving the wonders of marine biology with stories of their own family, relationships, and coming of age, *How Far the Light Reaches* is a shimmering, otherworldly debut that attunes us to new visions of our world and its miracles.
