Introduction To Marketing - Principles Of Wholesale And Retail Distribution Paul D. Converse, 2013-04-16

INTRODUCTION to MARKETING PRINCIPLES OF WHOLESALE AND RETAIL DISTRIBUTION by Paul D. Converse. Preface: THIS BOOK has a definite objective to combine a treatment of general marketing methods and principles with a more detailed treatment of retailing, particularly the operation of small and medium-size stores. It is believed that one . can not properly understand retailing without some knowledge of market economics and wholesaling. Students will understand retail store operation better if they first secure a general knowledge of the field of marketing and know the place of retailing in the overall picture. Therefore, market economics, the physical handling of goods, and wholesaling are treated before the discussion of retailing is begun. Paul D. Converse Fred M. Jones. Contents include: I.  577 Index 595 I. Introduction: The Meaning and Scope of Marketing JL ISTRIBUTION, or marketing is the most
 important part of business. Most business concerns can produce many more goods than they can sell at a profit.
 Give us sales is the common cry of businessmen, and huge sums are spent on ad vertising and salesmanship. Whatever
 can be sold can be made. The big problem is distribution. Such statements are common and may be accepted as
 generally true in normal times. This condition has not always existed. Up until compara tively recent times, the
 big task of the race was to produce enough goods food, clothing, and shelter to satisfy its needs. During the past
 150 years the problem has been altered by the use of labor-saving machinery by the discoveries and inventions of
 chemistry, agriculture, physics, and engineering and by the development of scientific management and accounting.
 The development of the natural sciences and the arts of physics, entomology, geology, chemistry, management, and
 en gineering has given us much new knowledge which has enabled us to increase greatly the output of goods and to
 reduce the costs of production. The result is that usually we are able to produce many more goods than the
 consumers are able to buy at the prevailing prices. Hence businessmen and farmers have become greatly interested
 in distribution...
