Ibrahiem M. M. El Emary, S. Ramakrishnan

IT: device to device communication The Open University, This 20-hour free course was created to explain how modern devices talk to each other and which technologies ? wired and wireless ? are involved.

Proceeding of the Second International Conference on Microelectronics, Computing & Communication Systems (MCCS 2017) Vijay Nath, Jyotsna Kumar Mandal, 2018-07-30 The volume presents high quality papers presented at the Second International Conference on Microelectronics, Computing & Communication Systems (MCCS 2017). The book discusses recent trends in technology and advancement in MEMS and nanoelectronics, wireless communications, optical communication, instrumentation, signal processing, image processing, bioengineering, green energy, hybrid vehicles, environmental science, weather forecasting, cloud computing, renewable energy, RFID, CMOS sensors, actuators, transducers, telemetry systems, embedded systems, and sensor network applications. It includes original papers based on original theoretical, practical, experimental, simulations, development, application, measurement, and testing. The applications and solutions discussed in the book will serve as a good reference material for future works.

Remembering and Forgetting in the Digital Age Florent Thouvenin, Peter Hettich, Herbert Burkert, Urs Gasser, 2018-08-24 This book examines the fundamental question of how legislators and other rule-makers should handle remembering and forgetting information (especially personally identifiable information) in the digital age. It encompasses such topics as privacy, data protection, individual and collective memory, and the right to be forgotten when considering data storage, processing and deletion. The authors argue in support of maintaining the new digital default, that (personally identifiable) information should be remembered rather than forgotten. The book offers guidelines for legislators as well as private and public organizations on how to make decisions on remembering and forgetting personally identifiable information in the digital age. It draws on three main perspectives: law, based on a comprehensive analysis of Swiss law that serves as an example; technology, specifically search engines, internet archives, social media and the mobile internet; and an interdisciplinary perspective with contributions from various disciplines such as philosophy, anthropology, sociology, psychology, and economics, amongst others.. Thanks to this multifaceted approach, readers will benefit from a holistic view of the informational phenomenon of “remembering and forgetting”. This book will appeal to lawyers, philosophers, sociologists, historians, economists, anthropologists, and psychologists among many others. Such wide appeal is due to its rich and interdisciplinary approach to the challenges for individuals and society at large with regard to remembering and forgetting in the digital age.

Communication, Management and Information Technology Marcelo Sampaio de Alencar, 2016-11-03 Communication, Management and Information Technology contains the contributions presented at the International Conference on Communication, Management and Information Technology (ICCMIT 2016, Cosenza, Italy, 26-29 April 2016, organized by the Universal Society of Applied Research (USAR). The book aims at researchers, scientists, engineers, and scholar students interested or involved in Computer Science and Systems, Communication, and Management.

Communication in Critical Embedded Systems Kalinka Branco, Alex Pinto, Daniel Pigatto, 2017-07-11 This book constitutes the best paper selection from the First Workshop, WoCCES 2013, held in Brasília, Brazil, in May 2013, the Second Workshop, WoCCES 2014, held in Florianópolis, Brazil, in May 2014, the Third Workshop, WoCCES 2015, held in Vitória, Brazil, in May 2015, and the 4th

Workshop, WoCCES 2016, held in Salvador, Brazil, in June 2016. The 7 revised full papers were carefully reviewed and selected from 41 submissions. The papers focus on important innovations and recent advances in the specification, design, construction and use of communication in critical embedded systems.

International Conference on Innovative Computing and Communications Deepak Gupta, Ashish Khanna, Aboul Ella Hassanien, Sameer Anand, Ajay Jaiswal, 2022-11-07 This book includes high-quality research papers presented at the Fifth International Conference on Innovative Computing and Communication (ICICC 2022), which is held at the Shaheed Sukhdev College of Business Studies, University of Delhi, Delhi, India, on February 19–20, 2022. Introducing the innovative works of scientists, professors, research scholars, students and industrial experts in the field of computing and communication, the book promotes the transformation of fundamental research into institutional and industrialized research and the conversion of applied exploration into real-time applications.

Wireless Sensor Networks Ibrahim M. M. El Emary, S. Ramakrishnan, 2013-08-28 Although there are many books available on WSNs, most are low-level, introductory books. The few available for advanced readers fail to convey the breadth of knowledge required for those aiming to develop next-generation solutions for WSNs. Filling this void, *Wireless Sensor Networks: From Theory to Applications* supplies comprehensive coverage of WS

Communication Technology Update and Fundamentals August E. Grant, 2014-08-07 A classic now in its 14th edition, *Communication Technology Update and Fundamentals* is the single best resource for students and professionals looking to brush up on how these technologies have developed, grown, and converged, as well as what's in store for the future. It begins by developing the communication technology framework—the history, ecosystem, and structure—then delves into each type of technology, including everything from mass media, to computers and consumer electronics, to networking technologies. Each chapter is written by faculty and industry experts who provide snapshots of the state of each individual field, altogether providing a broad overview of the role communication technologies play in our everyday lives. Key features: Gives students and professionals the latest information in all areas of communication technology The companion website offers updated information and useful links to related industry resources, and an instructor site provides a sample syllabus and a test bank This edition features new chapters on automotive telematics, digital health, and telepresence, as well as expanded coverage of tablets/phablets and 4K (ultra high definition television)

Light Metals 2011 Stephen Lindsay, 2016-12-23 The Light Metals symposia are a key part of the TMS Annual Meeting & Exhibition, presenting the most recent developments, discoveries, and practices in primary aluminum science and technology. Publishing the proceedings from these important symposia, the Light Metals volume has become the definitive reference in the field of aluminum production and related light metal technologies. *Light Metals 2011* offers a mix of the latest scientific research findings and applied technology, covering alumina and bauxite, aluminum reduction technology, aluminum rolling, cast shop for aluminum production, electrode technology, and furnace efficiency.

Information and Communication Technologies in Tourism 2020 Julia Neidhardt, Wolfgang Wörndl, 2019-12-16 Gathering the outcomes of the 27th annual international eTourism conference ENTER2020, this book presents new research, innovative systems and industry case studies on the application of Information and Communication Technologies (ICT) in travel and tourism. It shares the latest findings discussed at the conference and highlights various topics within the field, including social media, destination

marketing, recommender systems and decision-making, virtual and augmented reality, technology in tourism, and research on hotels and activities. Readers will find a wealth of state-of-the-art insights and ideas on how information and communication technologies can be applied in travel and tourism.

WIRELESS COMMUNICATION Narayan Changder,2024-02-28 Connect your wireless world with precision using this comprehensive MCQ mastery guide on wireless communication. Tailored for students, engineers, and enthusiasts, this resource offers a curated selection of practice questions covering key concepts, protocols, and technologies in wireless communication systems. Delve deep into modulation schemes, multiple access techniques, and network architectures while enhancing your problem-solving skills. Whether you're preparing for exams or seeking to reinforce your practical knowledge, this guide equips you with the tools needed to excel. Master wireless communication and navigate the ever-evolving landscape of wireless technology with confidence using this indispensable resource.

Intelligent Environments 2017 C. Analide,P. Kim,2017-08-18 The term Intelligent Environments (IEs) refers to the physical spaces in which IT and other pervasive computing technologies are integrated and used to achieve specific goals for the user, the environment or both. The ultimate objectives of IEs are enriching user experience, enabling better management and increasing user awareness of that environment. This book presents the proceedings of the 13th International Conference on Intelligent Environments, held in Seoul, Korea, in August 2017. The conference provides a multidisciplinary collaborative forum for researchers and practitioners from computer science, electronic engineering, building architecture, art and design, sociology, government and education to present theoretical and practical results related to the development and applications of Intelligent Environments. IE'17 focuses on the development of advanced Intelligent Environments, as well as other newly emerging and rapidly evolving topics. The book also includes the proceedings of the following associated workshops, held during the first 2 days of the conference, which emphasize the multi-disciplinary and transversal aspects of IEs: the 6th International Workshop on the Reliability of Intelligent Environments (WoRIE'17); the 1st International Workshop on Intelligent Systems for Agricultural Production and Environmental Protection (ISAPEP'17); the 1st Workshop on Citizen Centric Smart Cities Solutions (CCSCS'17); and the 1st International Workshop on Advanced Multiple Access in Mobile Telecommunications (AMAMT'17). Providing a state-of-the-art overview of the discipline, this book will be of interest to professionals from a diversity of fields whose work involves the development or application of Intelligent Environments.

Communication Technologies for Vehicles Thomas Strang,Andreas Festag,Alexey Vinel,Rashid Mehmood,Cristina Rico Garcia,Matthias Röckl,2011-03-23 This book constitutes the joint refereed proceedings of the Third International Workshop on Communication Technologies for Vehicles, Nets4Cars 2011 and the First International Workshop on Communication Technologies for Vehicles in the Railway Transportation, Nets4Trains 2011, held in Oberpfaffenhofen, Germany, in March 2011. The 7 full papers of the rail track and 12 full papers of the road track presented together with a keynote were carefully reviewed and selected from 13 and 21 submissions respectively. They provide an overview over the latest technologies and research in the field of intra- and inter-vehicle communication and present original research results in areas relating to communication protocols and standards, mobility and traffic

models, experimental and field operational testing, and performance analysis.

Handbook of Green Information and Communication Systems Mohammad S. Obaidat, Alagan Anpalagan, Isaac Woungang, 2012-11-20 This book gives a comprehensive guide on the fundamental concepts, applications, algorithms, protocols, new trends and challenges, and research results in the area of Green Information and Communications Systems. It is an invaluable resource giving knowledge on the core and specialized issues in the field, making it highly suitable for both the new and experienced researcher in this area. Key Features: Core research topics of green information and communication systems are covered from a network design perspective, giving both theoretical and practical perspectives Provides a unified covering of otherwise dispersed selected topics on green computing, information, communication and networking Includes a set of downloadable PowerPoint slides and glossary of terms for each chapter A 'whose-who' of international contributors Extensive bibliography for enhancing further knowledge Coverage includes: Smart grid technologies and communications Spectrum management Cognitive and autonomous radio systems Computing and communication architectures Data centres Distributed networking Cloud computing Next generation wireless communication systems 4G access networking Optical core networks Cooperation transmission Security and privacy Core research topics of green information and communication systems are covered from a network design perspective, giving both a theoretical and practical perspective A 'whose-who' of international contributors Extensive bibliography for enhancing further knowledge

Introduction to Geospatial Information and Communication Technology (GeoICT) Rifaat Abdalla, 2016-07-25 This book is designed to help students and researchers understand the latest research and development trends in the domain of geospatial information and communication (GeoICT) technologies. Accordingly, it covers the fundamentals of geospatial information systems, spatial positioning technologies, and networking and mobile communications, with a focus on OGC and OGC standards, Internet GIS, and location-based services. Particular emphasis is placed on introducing GeoICT as an integrated technology that effectively bridges various information-technology domains.

Between the Public and Private in Mobile Communication Ana Serrano Tellería, 2017-06-14 Mobile devices' impact on daily life has raised relevant questions regarding public and private space and communication. Both the technological environment (operating systems, platforms, apps) and media ecosystems (interface design, participatory culture, social media) influence how users deal with the public and private, intimate and personal spheres. Leading researchers in communication, art, computer engineering, education, law, sociology, philosophy, and psychology here explore current methodologies for studying the dichotomy of the public and private in mobile communication, providing a foundation for further research.

International Conference on IoT, Intelligent Computing and Security Rajeev Agrawal, Pabitra Mitra, Arindam Pal, Madhu Sharma Gaur, 2023-04-01 This book comprises select peer-reviewed papers from the International Conference on IoT, Intelligent Computing and Security, IICS 2021. The contents focus on the latest research in artificial intelligence, IoT, intelligent computing, and leading technological convergence security challenges. The book also discusses AI-driven automation of highly connected smart devices across the globe presenting the fast technological shift with the futuristic scenario, bursting perspective of IoT, computational intelligence, and security concerns. This book supports the transfer of vital knowledge to the next generation of researchers, students, and practitioners in academia and industry.

Emerging Wireless Communication and Network Technologies Karm Veer Arya, Robin Singh Bhadoria, Narendra S.

Chaudhari,2018-06-09 The book covers a wide range of wireless communication and network technologies, and will help readers understand the role of wireless technologies in applications touching on various spheres of human life, e.g. healthcare, agriculture, building smart cities, forecasting and the manufacturing industry. The book begins by discussing advances in wireless communication, including emerging trends and research directions for network technologies. It also highlights the importance of and need to actively develop these technologies. In turn, the book addresses different algorithms and methodologies which could be beneficial in implementing 5G Mobile Communication, Vehicular Ad-hoc Networks (VANET), Reliable Cooperative Networks, Delay Tolerant Networks (DTN) and many more contexts related to advanced communications. It then addresses the prominence of wireless communication in connection with the Internet of Things (IoT), Mobile Opportunistic Networks and Cognitive Radio Networks (CRN). Lastly, it presents the new horizons in architecture and building protocols for Li-Fi (Light-Fidelity) and Wearable Sensor Technology.

Strategy and Communication for Innovation Nicole Pfeffermann,Julie Gould,2017-03-06 This contributed volume presents a state-of-the-art compendium for startups and corporations, focusing on corporate ventures. The book is based on the volume Strategy and Communication for Innovation and includes up-to-date discussions which help to better understand strategy and communication from a startup perspective.
