Believe in People Charles Koch, Brian Hooks, 2020-11-17 A surprising take on how you can help tackle the really big problems in society—from one of America's most successful entrepreneurs. People are looking for a better way. Towering barriers are holding millions of people back, and the institutions that should help everyone rise are not doing the job. Crumbling communities. One-size fits all education. Businesses that rig the economy. Public policy that stifles opportunity and emboldens the extremes. As a result, this country is quickly heading toward a two-tiered society. Today's challenges call for nothing short of a paradigm shift – away from a top-down approach that sees people as problems to be managed, toward bottom-up solutions that empower everyone to realize their potential and foster a more inclusive society. Such a shift starts by asking: What would it mean to truly believe in people? Businessman and philanthropist Charles Koch has devoted his life to answering that question. Learn what he's discovered during his 60-year career to help you apply the principles of empowerment in your life, in your business, and in society. By learning from the social movements and applying the principles that have enabled social progress throughout history, Koch has achieved more than he dreamed possible – building one of the world's most successful companies and founding Stand Together, one of America's most innovative philanthropic communities. Stand Together CEO Brian Hooks and Koch show how the only way to solve the really big problems – from poverty and addiction to harmful business practices and destructive public policy – is for each and every one of us to find and take action in our unique role as part of the solution. Full of compelling examples of what works – including several first-person accounts from individuals whose lives have been transformed – Koch and Hooks' refreshing approach promotes partnership instead of partisanship and speaks to people from different perspectives and all walks of life. They show that no injustice is too tough to overcome if you share a deep belief in people, are willing to unite with anyone to do right, and work to empower others from the bottom up.

The Science of Success Charles G. Koch, 2007-03-22 Praise for *THE SCIENCE OF SUCCESS* Evaluating the success of an individual or company is a lot like judging a trapper by his pelts. Charles Koch has a lot of pelts. He has built Koch Industries into the world's largest privately held company, and this book is an insider's guide to how he did it. Koch has studied how markets work for decades, and his commitment to pass that knowledge on will inspire entrepreneurs for generations to come. –T. Boone Pickens A must-read for entrepreneurs and corporate executives that is also applicable to the wider world. MBM is an invaluable tool for engendering excellence for all groups, from families to nonprofit entities. Government leaders could avoid policy failures by heeding the science of human behavior. –Richard L. Sharp, Chairman, CarMax My father, Sam Walton, stressed the importance of fundamental principles—such as humility, integrity, respect, and creating value—that are the foundation for success. No one makes a better case for these principles than Charles Koch. –Rob Walton, Chairman, Wal-Mart What accounts for Koch Industries' spectacular success? Charles Koch calls it Market-Based Management: a vision that nurtures personal qualities of humility and integrity that build trust and the confidence to enhance future success through learning from failure, and a culture of thinking in terms of opportunity cost and comparative advantage for all employees. –Vernon Smith, 2002 Nobel laureate in economics In a very thoughtful, creative, and understandable way, Charles Koch explains how he has used the science of human behavior to create a culture that has produced one of the world's largest and most successful private companies. A must-read for anyone interested in creating value. –William B. Harrison Jr., Former Chairman and CEO, JPMorgan Chase & Co. The same exacting thought, rooted in the realities of human nature, that the framers of the U.S. Constitution put into building a nation of entrepreneurs,

Charles Koch has framed to build an enduring company of entrepreneurs—a company larger than Microsoft, Dell, HP, and other giants. Every entrepreneur should study this book. —Verne Harnish, founder, Young Entrepreneurs' Organization, author of Mastering the Rockefeller Habits, CEO, Gazelles Inc.

The Complete Idiot's Guide to Journalism Christopher K. Passante, 2007 Never has the world of journalism been so explosive, so global, and so competitive. Forget hourly news flashes; we live in a world of 24-hour breaking news with radio and TV stations and Internet sites updating stories by the minute and newspapers adjusting to stay fresh, in-depth, and relevant. While the number of newspapers and TV and radio stations has dropped over the last half century in the United States, instant, free-access Internet news portals have grown precipitously to not only fill any gaps in coverage but to force Big Media to change its game plans or risk losing readership. But in no way does this suggest any aspect of journalism is heading for the garbage heap—especially newspapers. Never before have Americans been so engaged in their world, and many mediums are needed to satiate that collective appetite for knowledge.

Counterrevolution Melinda Cooper,2024-03-12 A thorough investigation of the current combination of austerity and extravagance that characterizes government spending and central bank monetary policy At the close of the 1970s, government treasuries and central banks took a vow of perpetual self-restraint. To this day, fiscal authorities fret over soaring public debt burdens, while central bankers wring their hands at the slightest sign of rising wages. As the brief reprieve of coronavirus spending made clear, no departure from government austerity will be tolerated without a corresponding act of penance. Yet we misunderstand the scope of neoliberal public finance if we assume austerity to be its sole setting. Beyond the zero-sum game of direct claims on state budgets lies a realm of indirect government spending that escapes the naked eye. Capital gains are multiply subsidized by a tax system that reserves its greatest rewards for financial asset holders. And for all its airs of haughty asceticism, the Federal Reserve has become adept at facilitating the inflation of asset values while ruthlessly suppressing wages. Neoliberalism is as extravagant as it is austere, and this paradox needs to be grasped if we are to challenge its core modus operandi. Melinda Cooper examines the major schools of thought that have shaped neoliberal common sense around public finance. Focusing, in particular, on Virginia school public choice theory

and supply-side economics, she shows how these currents produced distinct but ultimately complementary responses to the capitalist crisis of the 1970s. With its intellectual roots in the conservative Southern Democratic tradition, Virginia school public choice theory espoused an austere doctrine of budget balance. The supply-side movement, by contrast, advocated tax cuts without spending restraint and debt issuance without guilt, in an apparent repudiation of austerity. Yet, for all their differences, the two schools converged around the need to rein in the redistributive uses of public spending. Together, they drove a counterrevolution in public finance that deepened the divide between rich and poor and revived the fortunes of dynastic wealth. Far-reaching as the neoliberal counterrevolution has been, Cooper still identifies a counterfactual history of unrealized possibilities in the capitalist crisis of the 1970s. She concludes by inviting us to rethink the concept of revolution and raises the question: Is another politics of extravagance possible?

North of Mulholland Martin M. Cooper, 2010-03 North of Mulholland is a distillation of experiences, opinions, and stories springing from Southern California's San Fernando Valley, but expanding into a world view of where we have been, where we are, and where we may be headed. Mr. Cooper's wide-ranging travels; his fascination with Churchill, antique typewriters, and books; and his critical eye for our surroundings, have spawned more than fifty fascinating essays for the San Fernando Valley Business journal. He takes on everything from strip malls to Countrywide Home Loans; from the Los Angeles Times to technology; and from Los Angeles' City Council to Nebraska's legislature. He ruminates on fire and water; long-gone businesses; living up the street from Michael Jackson's family compound; and the elephant at the Los Angeles Zoo. For those who live or work in the San Fernando Valley, this is a book for you. For those don't live in the San Fernando Valley, this is also a book for you.--Dust jacket.
