The Evolution and Demise of the Larger Format Press Camera Reg Holloway, 2008 The first photographers sent on assignment covered the Crimean War in 1855 and the American Civil War from 1861. They did so with simple but large wooden 8x10 inch field cameras on tripods and with wet plates that had to be coated before each exposure. Dry plates became available from the 1870s and at about the same time, the half-tone printing process was perfected in Canada and exported to the United States and Europe, driving up the demand for pictures for publication. The new specialist in photography-the press photographer-required a new type of camera. One that was hand held, robust, big enough to provide a good-sized glass negative for contact printing, with a lens that could be precisely focused, a shutter that would freeze action and an accurate viewfinder. At that stage, nobody had yet thought of such refinements as a rangefinder or exposure meter or an independent source of illumination. In this book Reg Holloway, who was an apprentice reporter/photographer from 1947, describes the types of cameras that were developed to meet the special needs of press photographers. He explains the laborious procedures involved in using the early cameras and along the way he touches on some of the risks that early press photographers took in their attempts to document the world. Including: - The American photographer who had himself suspended from a bunch of weather balloons to gain elevation and who had to be brought back to earth by the bursting of balloons with careful rifle fire. - The Canadian photographer who persuaded his colleagues covering the opening of a railway station to pool their flash powder and caused a frightening explosion. - The pack of

photographers in London in 1924 who broke through a police line to photograph the arrival of six US aviators on the first round-the-world flight. As the author remarks, a scrum in which everybody was wielding a large and heavy wooden camera could be a dangerous situation. The cameras illustrated are in the author's collection, assembled from around the world during 30 years he spent in the British foreign service following his career as a reporter.

Canon EOS Rebel T6s / T6i (760D / 750D) Jeff Revell, 2015-08-13 The Canon EOS T6i and T6s (known as the 760D and 750D outside of U.S.) are powerful new cameras intended for amateurs to semi-professionals who want to jump into photography with the control and capabilities of a DSLR. While the camera manual explains what the camera can do, it doesn't show exactly how to use the camera to create great images! That's where Canon EOS T6i / T6s: From Snapshots to Great Shots comes in. Starting with the top ten things users need to know about the camera, author Jeff Revell carefully guides readers through the operating features. Readers get practical advice from a pro on which settings to use when, great shooting tips, and end of chapter assignments. From Snapshots to Great Shots is a beautiful how-to photography series that provides the perfect blend of instruction, inspiration, and reference for specific camera models and photography concepts. Featuring a clear, elegant design; outstanding images that educate and inspire; and a friendly, accessible voice, this series helps photographers get great shots every time they pick up their camera. DP Review has strongly endorsed this new Rebel camera system, which represents a major upgrade from the T5i camera. Providing a complete body and lens system, both the T6i and T6s are made available as kits with zoom lenses, and include many feature upgrades, perhaps most

significantly, a new 24.2MP APS-C CMOS sensor (up from 18MP on the T5i / 700D) coupled with a new 7560 pixel RGB + IR metering sensor for more accurate metering. Also, for the first time for the Rebel line, both cameras offer built-in Wi-Fi connectivity and NFC. Key T6i / T6s camera features: • 24.2MP APS-C CMOS sensor • 19-point autofocus system • Hybrid CMOS AF III focus system (live view) • 7560 pixel RGB + IR metering sensor with skin tone detection • 3 fully articulating touchscreen LCD • Eye sensor for use with optical viewfinder [T6s only] • LCD information display on top plate [T6s only] • Quick control dial on rear [T6s only] • 5 fps continuous shooting • 1080/30p video • Servo AF in live view [T6s only] • Wi-Fi with NFC

The Way We Were George Forss,2014-09-11 I was not a young man when I started photographing New York City. I started photographing NYC around 1974. I was 32 years old. I got the idea of making scenes of New York City and selling my pictures in the city streets after the invention of resin coated printing paper. With this paper I could make a print and then simply hang it up on clothes pins to dry and put my print in ready-made mat boards with the inset already cut out. I had a plan. I had a job as a messenger delivering packages all around New York. This gave me the means to go around the city looking for interesting subjects to photograph while I was delivering packages. I figured a time would come, once I had taken a certain amount of photos, when I would feel good about leaving my messenger job.
