Assessing Internet Development in Germany

UNESCO,2021-09-11 Note: This is an assessment of 109 core indicators and 21 contextual indicators instead of the full set of 303 indicators, and it is therefore not intended to cover all dimensions of the digital ecosystem in the country, but serves to take stock of significant progress and signal those gaps in a need to be improved in adhering to ROAM framework. As the Internet environment is changing very fast, so are the data collected and analysis and recommendations made upon. UNESCO encourages countries to continue the dialogues about the findings, and to update the assessment after due time while also keeping track of the latest developments to monitor and adapt and sometimes strengthen the recommendations to further enhance their impact, as appropriate.

Internet Protocol Television in Germany - Analysing Business Models for Market Success Nikolas Fritz,2008-12-12 Bachelor Thesis from the year 2008 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 86 %, Cologne Business School K ln, 57 entries in the bibliography, language: English, abstract: The medium Television in Germany looks back on a more than 70-years old history. Since the first regular television programme was broadcasted in 1935 - which has been the first worldwide - television was subject of permanent change. Broadcasting and recording techniques, end devices, public perception and acceptance and content developed significantly over the decades. Starting with a single channel broadcasting black and white free-to-air, today consumers with the proper equipment can receive hundreds or even thousands of different channels that serve every imaginable need. Free-to-air broadcasting was little by little replaced by cable and satellite broadcasting, starting in 1983 respectively in 1988. Hand in hand with the digitisation era a new medium arose in the 1990's: broadcasting via the internet. Due to

high bandwidth requirements this distribution channel developed slowly. Even nowadays this represents the bottleneck of the potential TV of the future, called Internet Protocol Television (IPTV). However, IPTV has yet earned an early round of applause which is legitimated by the numerous advantages it offers for the consumer as well as for the distributor, content provider and advertiser.

The Implementation of Free Wifi Service in the German Public

Transport System Claudia Endter, 2013-09 Project Report from the year 2010 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1,3, Oxford Brookes University (Business School), course: International Marketing, language: English, abstract: The implementation of a broadband wireless internet service in the German public transport system is an important step for next generation networks in order to keep Germany up to date with world-wide technological development. Being a highly developed country in terms of IT, Germany is currently a step behind when it comes to free wireless access. The cancellation of Free Wi-Fi in Berlin and the negligence of the international research project 'Broadband Wireless Internet Access in Public Transportation', aided by the German Ministry of Education and Research, is a heavy setback for the country. Instead of setting a good example for other cities, the federal government returned this task to the private companies. Those, like the Deutsche Bahn, are slowly developing wireless access in all of their trains and train stations, but an auspicious plan for the next few years is not yet foreseeable. Several companies, like the Swiss company NetModule AG and Deutsche Telekom AG, offer the technical support which is required for an area-wide coverage of access points, but as of today there are no direct proceedings with local governments or with local public transport companies.

Germany and Denmark Nicholas Hill, 2022-07-07 This new Royal Cruising Club Pilotage Foundation title is the successor to Brian Navin's cruising guide to the area, covering the exposed

North Sea coasts and the more protected Baltic Sea coasts of both Germany and Denmark. Coverage has been updated and expanded from specific routes to a comprehensive sequence of ports and anchorages along each area of coast, with introductory information about places of interest to visit ashore. Author Nicholas Hill cruised the region extensively for many years and has enriched the text with new photographs throughout. Plans include up to date hydrographic data for both German and Danish waters. This cruising guide is an ideal companion for those who plan to explore the more challenging, shifting coastline of the North Sea and the comparatively gentle and intricate indentations and archipelagos in the entrance to the Baltic. It is also a useful resource for anyone sailing on a more direct passage through to the Baltic Sea proper.

The SAGE Handbook of Media and Migration Kevin
Smets, Koen Leurs, Myria Georgiou, Saskia Witteborn, Radhika
Gajjala, 2019-10-31 Migration moves people, ideas and things.
Migration shakes up political scenes and instigates new social
movements. It redraws emotional landscapes and reshapes social
networks, with traditional and digital media enabling,
representing, and shaping the processes, relationships and people
on the move. The deep entanglement of media and migration
expands across the fields of political, cultural and social life. For
example, migration is increasingly digitally tracked and
surveilled, and national and international policy-making draws on
data on migrant movement, anticipated movement, and
biometrics to maintain a sense of control over the mobilities of
humans and things. Also, social imaginaries are constituted in
highly mediated environments where information and emotions
on migration are constantly shared on social and traditional
media. Both, those migrating and those receiving them, turn to
media and communicative practices to learn how to make sense
of migration and to manage fears and desires associated with
cross-border mobility in an increasingly porous but also
controlled and divided world. The SAGE Handbook of Media and
Migration offers a comprehensive overview of media and
migration through new research, as well as a review of present
scholarship in this expanding and promising field. It explores key
interdisciplinary concepts and methodologies, and how these are
challenged by new realities and the links between contemporary
migration patterns and its use of mediated processes. Although
primarily grounded in media and communication studies, the
Handbook builds on research in the fields of sociology,
anthropology, political science, urban studies, science and
technology studies, human rights, development studies, and
gender and sexuality studies, to bring to the forefront key

theories, concepts and methodological approaches to the study of the movement of people. In seven parts, the Handbook dissects important areas of cross-disciplinary and generational discourse for graduate students, early career researcher, migration management practitioners, and academics in the fields of media and migration studies, international development, communication studies, and the wider social science discipline. Part One: Keywords and Legacies Part Two: Methodologies Part Three: Communities Part Four: Representations Part Five: Borders and Rights Part Six: Spatialities Part Seven: Conflicts
