**Richard Campbell, Christopher Martin, Bettina
Fabos, Shawn Harmsen**

40 Under 40 Nicholas R. Bell, 2012 Published in conjunction with the exhibition of the same name, on view at the Renwick Gallery of the Smithsonian American Art Museum, Washington, DC, July 20, 2012-February 13, 2013.

Media Essentials Richard Campbell, Christopher Martin, Bettina Fabos, Shawn Harmsen, 2019-10-02 A concise and affordable resource for the mass communication course, Media Essentials provides a flexible, informative, and relevant breakdown of what the media is, how it works, and how it impacts today's most talked-about subjects. From #metoo to content streaming to social media and politics, students learn how a wide variety of recent developments have impacted the mass-media landscape—and how past innovation and change have informed our current media world. Media Essentials is available with LaunchPad, a robust online platform designed to help students fully engage with course content—and with the world of mass media. From our acclaimed LearningCurve adaptive quizzing, which helps students learn and retain concepts, to compelling features like an interactive e-book and a variety of entertaining and thought-provoking video clips, LaunchPad gets students connected with—and interested in—the information they need to succeed in class.

Endangered Wildlife (Ewl Ews1 C) David Bellamy, **AWI-1-** United States. Department of Agriculture, **EHealth2015 - Health Informatics Meets EHealth** Dieter Hayn, Günter Schreier, Elske Ammenwerth, Alexander Hörbst, 2015 Traditionally, medicine has involved therapies chosen according

to clinical guidelines, often arrived at through clinical trials which categorized patients into patient groups. Such clinical guidelines would dictate that all patients within a specific group should be treated in exactly the same way. More recently, the paradigm has shifted towards personalized medicine, and in future, individual treatment plans will depend more on the specific characteristics of individual patients, including genomic data. This book presents the proceedings of the 9th scientific eHealth conference, the eHealth Summit Austria, held in Vienna, Austria, in June 2015. Among the main topics addressed at the conference were: active and ambient assisted living (AAL); eHealth education; electronic patient and health records; ethical legal and economic aspects of eHealth; ICT for integrated treatment, research and personalized medicine; patient portals and personal health records; semantic interoperability of information systems; and visualization of clinical or epidemiological data. One of the first fields of application for personalized medicine has been oncology, with current diagnostic tools including molecular risk factors, biomarkers and individual genomes. The next step in personalized medicine will be to extend these to a more general, personalized health approach. Such individual risk assessment and preventive strategies promise to have a huge impact on our healthcare systems, and this book will be of interest to all those involved in healthcare research, provision and practice.

Computational Thinking Education in K-12 Siu-Cheung Kong, Harold Abelson, 2022-05-03 A guide to

computational thinking education, with a focus on artificial intelligence literacy and the integration of computing and physical objects. Computing has become an essential part of today's primary and secondary school curricula. In recent years, K–12 computer education has shifted from computer science itself to the broader perspective of computational thinking (CT), which is less about technology than a way of thinking and solving problems—"a fundamental skill for everyone, not just computer scientists," in the words of Jeanette Wing, author of a foundational article on CT. This volume introduces a variety of approaches to CT in K–12 education, offering a wide range of international perspectives that focus on artificial intelligence (AI) literacy and the integration of computing and physical objects. The book first offers an overview of CT and its importance in K–12 education, covering such topics as the rationale for teaching CT; programming as a general problem-solving skill; and the "phenomenon-based learning" approach. It then addresses the educational implications of the explosion in AI research, discussing, among other things, the importance of teaching children to be conscientious designers and consumers of AI. Finally, the book examines the increasing influence of physical devices in CT education, considering the learning opportunities offered by robotics. Caspersen, Christian Dindler, Daniella DiPaola, Nardie Fanchamps, Christina Gardner-McCune, Mark Guzdial, Kai Hakkarainen, Fredrik Heintz, Paul Hennissen,

Aliens: Kidnapped Jim Woodring, 1999-03-09 In the dark reaches of the universe lies a remote planet that holds both forbidden pleasures and unspeakable horrors. For three naive smugglers, it's also a place to unload a deadly cargo: an Alien egg. But something about this particular egg is scaring off the black marketeers. And when it hatches, the nightmare will have just begun.

No Longer Newsworthy Christopher R.

Martin, 2019-05-15 Until the recent political shift pushed workers back into the media spotlight, the mainstream media had largely ignored this significant part of American society in favor of the moneyed upscale consumer for more than four decades. Christopher R. Martin now reveals why and how the media lost sight of the American working class and the effects of it doing so. The damning indictment of the mainstream media that flows through *No Longer Newsworthy* is a wakeup call about the critical role of the media in telling news stories about labor unions, workers, and working-class readers. As Martin charts the decline of labor reporting from the late 1960s onwards, he reveals the shift in news coverage as the mainstream media abandoned labor in favor of consumer and business interests. When newspapers, especially, wrote off working-class readers as useless for their business model, the American worker became invisible. In *No Longer Newsworthy*, Martin covers this shift in focus, the loss of political voice for the working class, and the emergence of a more conservative media in the form of Christian television, talk radio, Fox News, and conservative websites. Now, with our fractured society and news media, Martin offers the mainstream media recommendations for how to push back against right-wing media and once again

embrace the working class as critical to its audience and its democratic function.

Media in Society Richard Campbell, Joli Jensen, Douglas Gomery, Bettina Fabos, Julie Frechette, 2013-07-12 Critiquing the mass media, and the role those media play in our lives, requires a critical eye. Media in Society gives students in upper level media courses a unique narrative-based approach to media criticism, exploring the stories media tell—as well as the stories we tell about the media when we describe how it affects us. Organized thematically, Media in Society examines topics like narrative genre, entertainment culture, news, politics, and economics, emphasizing both the pleasures and pitfalls of the media narratives that surround us. Written by an esteemed team of media scholars, specifically for media students, this compact and affordable text makes a great backbone or addition to a media and society course.

Framed! Christopher R. Martin, 2018-08-06 Christopher R. Martin argues that the mainstream news media (and the large corporations behind them) put the labor movement in a bad light even while avoiding the appearance of bias. Martin has found that the news media construct common ground narratives between labor and management positions by reporting on labor relations from a consumer perspective. Martin identifies five central storytelling frames using this consumer orientation that repeatedly emerged in the news media coverage of major labor stories in the 1990s: the 1991–94 shutdown of the General Motors Willow Run Assembly Plant in Ypsilanti, Michigan;

the 1993 American Airlines flight attendant strike; the 1994–95 Major League Baseball strike, the 1997 United Parcel Service strike, and the 1999 protests against the World Trade Organization's conference in Seattle. In Martin's view, the news media's consumer take on the labor movement has the effect of submerging issues of citizenship, political activity, and class relations, and elevating issues of consumption and the myth of a class-free America. Instead of facilitating a public sphere, the democratic ideal in which the public can engage in discovery and rational-critical debate, Martin says, news organizations have fostered a consumer sphere, in which public discourse and action is defined in terms of consumer interests—the impact of strikes, lock-outs, shut-downs, and protests on the general consumer economy and the price, quality, and availability of things such as automobiles, airline flights, and baseball tickets.
