### **Special Edition Using Mac OS X, V10.3 Panther**

Brad Miser, 2004 The Panther release of Mac OS X continues the development of the Macintosh operating system. Mac OS X has become the dominant OS on the Macintosh platform and is currently the default OS on all new Macintosh computers. Mac OS X is a complex and powerful operating system for which no documentation is provided by Apple outside of the Apple Help system, which contains very limited information. Special Edition Using Mac OS X Panther provides the in-depth, wide ranging coverage that enables Mac users to get the most out of the operating system and included tools. This book explains how to get the most out of the core OS, including the Finder, desktop, and system customization. The book also shows readers how to use OS X's Internet applications for email, Web surfing, and .mac for publishing content on the Net. One of the book's major strengths is the extensive coverage of iTunes, iPhoto, iDVD, and iMovie. QuickTime and QuickTime Pro are also covered. The book helps readers understand and configure the technologies to expand their systems.

*Applied Linear Statistical Models* Michael H.  
Kutner, 2005 *Applied Linear Statistical Models 5e* is the long established leading authoritative text and reference on statistical modeling. For students in most any discipline

where statistical analysis or interpretation is used, ALSM serves as the standard work. The text includes brief introductory and review material, and then proceeds through regression and modeling for the first half, and through ANOVA and Experimental Design in the second half. All topics are presented in a precise and clear style supported with solved examples, numbered formulae, graphic illustrations, and Notes to provide depth and statistical accuracy and precision. Applications used within the text and the hallmark problems, exercises, and projects are drawn from virtually all disciplines and fields providing motivation for students in virtually any college. The Fifth edition provides an increased use of computing and graphical analysis throughout, without sacrificing concepts or rigor. In general, the 5e uses larger data sets in examples and exercises, and where methods can be automated within software without loss of understanding, it is so done.

Old House Interiors, 2005-08 National architectural magazine now in its fifteenth year, covering period-inspired design 1700–1950. Commissioned photographs show real homes, inspired by the past but livable. Historical and interpretive rooms are included; new construction, additions, and new kitchens and baths take their place along with restoration work. A feature on furniture appears in every issue. Product coverage is extensive. Experts offer advice for homeowners and designers on finishing, decorating, and furnishing period homes of every era. A garden feature, essays, archival material, events and exhibitions, and book reviews round out the editorial. Many readers claim the beautiful advertising—all of it design-related, no “lifestyle” ads—is as important to them as the articles.
