The Athletic Brain Amit Katwala,2016 Sport changes your brain. The minds of elite athletes can pull off feats of anticipation and co-ordination that amateurs would find impossible. The athletic brain has been trained through hours and hours of practice - years of sweat and toil. But what if there were a shortcut to training your brain? Cognitive training tools offer the tantalising possibility of breaking the '10,000-hour rule'. Top-level athletes and teams are increasingly tapping into new knowledge of the brain to develop tools and techniques that can offer a shortcut to sporting success, or push the boundaries of performance beyond its current limits. Increasingly, these tools are becoming available to the ordinary amateur, revolutionising the ways in which anyone can improve their skills. Based on interviews with top athletes and the scientists working at the cutting edge of our knowledge, Amit Katwala provides a fascinating insight into the possibilities that are becoming open to us all. He takes us to see how Borussia Dortmund's 'Footbonaut' and touchscreen-based games in the NFL have been achieving excellent results. As with bestsellers such as The Chimp Paradoxand Bounce, by the end of this book, readers will look at sporting performance in a new light, and be able to apply these insights to their own lives.

Wired for Culture: Origins of the Human Social Mind Mark Pagel, 2012-02-07 An evolutionary biologist explores the concept of culture and how it influenced our collective human behaviors from the beginning of evolution through modern times and offers new insights on how art, morality and altruism and self-interest define being human. 20,000 first printing.

Lost in a Good Game Pete Etchells,2019-04-04 'Etchells writes eloquently ... A heartfelt defence of a demonised pastime' The Times 'Once in an age, a piece of culture comes along that feels like it was specifically created for you, the beats and words and ideas are there because it is your life the creator is describing. Lost In A Good Game is exactly that. It will touch your heart and mind. And even if Bowser, Chun-li or Q-Bert weren't crucial parts of your youth, this is a flawless victory for everyone' Adam Rutherford When Pete Etchells was 14, his father died from motor neurone disease. In order to cope, he immersed himself in a virtual world - first as an escape, but later to try to understand what had happened. Etchells is now a researcher into the psychological effects of video games, and was co-author on a recent paper explaining why WHO plans to classify 'game addiction' as a danger to public health are based on bad science and (he thinks) are a bad idea. In this, his first book, he journeys through the history and development of video games - from Turing's chess machine to mass multiplayer online games like World of Warcraft- via scientific study, to investigate the highs and lows of playing and get to the bottom of our relationship with games - why we do it, and what they really mean to us. At the same time, Lost in a Good Game is a very unusual memoir of a writer coming to terms with his grief via virtual worlds, as he tries to work out what area of popular culture we should classify games (a relatively new technology) under.

Wired Up Wrong Rachael Smith,2022-01-20 A new graphic memoir, from the award-winning author of Quarantine Comix. Hoping to better understand her own brain, award-winning comic-creator Rachael Smith set about documenting her experiences and struggles with anxiety and depression through comic strips. The resulting book, Wired Up Wrong, is

both educating and entertaining, holding a mirror up to all the flattering and unflattering aspects of mental health. Featuring Rufus the cat, Barky, a giant black dog who lives inside her head, and two tiny, imaginary gameshow hosts, Comedy Women in Print-shortlisted Rachael Smith's work is at times light-hearted, others heart-breaking, but always brave and honest.

The Future of Food (WIRED Guides) Matthew Reynolds,2021-09-16 The everything-you-need-to-know WIRED guide to food technology and food production in the future With a global population estimated to reach nearly 10 billion by 2050 we face a huge challenge in feeding everyone on the planet. How is that to be achieved? In this brilliantly insightful, one stop guide WIRED journalist Matt Reynolds assesses the limits and drawbacks of current food production and looks at the ways in which they can be tackled. He considers the potential for lab-grown meat to replace inefficient livestock farming. He talks to the scientists hoping to perfect more productive and disease-resistant crops. He explores initiatives to make agriculture less environmentally damaging and to reduce food waste. And he addresses the fundamental question- how do we feed more people while using fewer of the Earth's resources?

The Future of Medicine (WIRED guides) James Temperton, WIRED, 2021-03-25 By the end of this century, living beyond 100 will be the rule rather than the exception. What medical breakthroughs and new technologies will make this possible? In this brilliantly wide-ranging, one-stop guide WIRED journalist James Temperton outlines the medical revolutions that are transforming healthcare. He looks at the burgeoning immune therapies that could one day cure such life-threatening diseases as cancer. He explores the science - and ethics - of genetic engineering and its potential to create 'designer babies'. He considers the role that cutting-edge medical research could play in the treatment of mental and neurological disorders ranging from depression to autism. And he addresses the fundamental question: could medical technology become so sophisticated that we witness the end of ageing?

Don't Even Think About It George Marshall,2015-08-18 The director of the Climate Outreach and Information Network explores the psychological mechanism that enables people to ignore the dangers of climate change, using sidebars, cartoons and engaging stories from his years of research to reveal how humans are wired to primarily respond to visible threats.

Sandworm Andy Greenberg, 2020-10-20 With the nuance of a reporter and the pace of a thriller writer, Andy Greenberg gives us a glimpse of the cyberwars of the future while at the same time placing his story in the long arc of Russian and Ukrainian history. —Anne Applebaum, bestselling author of Twilight of Democracy The true story of the most devastating act of cyberwarfare in history and the desperate hunt to identify and track the elite Russian agents behind it: [A] chilling account of a Kremlin-led cyberattack, a new front in global conflict (Financial Times). In 2014, the world witnessed the start of a mysterious series of cyberattacks. Targeting American utility companies, NATO, and electric grids in Eastern Europe, the strikes grew ever more brazen. They culminated in the summer of 2017, when the malware known as NotPetya was unleashed, penetrating, disrupting, and paralyzing some of the world's largest businesses—from drug manufacturers to software developers to shipping

companies. At the attack's epicenter in Ukraine, ATMs froze. The railway and postal systems shut down. Hospitals went dark. NotPetya spread around the world, inflicting an unprecedented ten billion dollars in damage—the largest, most destructive cyberattack the world had ever seen. The hackers behind these attacks are quickly gaining a reputation as the most dangerous team of cyberwarriors in history: a group known as Sandworm. Working in the service of Russia's military intelligence agency, they represent a persistent, highly skilled force, one whose talents are matched by their willingness to launch broad, unrestrained attacks on the most critical infrastructure of their adversaries. They target government and private sector, military and civilians alike. A chilling, globe-spanning detective story, Sandworm considers the danger this force poses to our national security and stability. As the Kremlin's role in foreign government manipulation comes into greater focus, Sandworm exposes the realities not just of Russia's global digital offensive, but of an era where warfare ceases to be waged on the battlefield. It reveals how the lines between digital and physical conflict, between wartime and peacetime, have begun to blur—with world-shaking implications.

CauseWired Tom Watson,2008-11-24 Now in paperback, an eye-opening guide to the massive societal impact of online social networks For today's super-wired, always-on, live-life-in-public young Americans, the causes they support define who they are. Tracks the massive societal impact on causes of online social networks-from blogs, to video, to the rise of social networks Reveals the extraordinary influence of online social networks-in raising money for charity, in changing the political climate and electing candidates, and in raising consciousness for causes From Facebook causes and campaigns on MySpace, to a raft of new startups and innovative projects like Kiva, Change.org and DonorsChoose, this immensely relevant book delivers actionable research and recommendations to help readers launch their own successful wired social campaigns.

Tremors in the Blood Amit Katwala, 2022-04-14

The Wired Homestead Joseph Turow, Andrea L. Kavanaugh, 2003-06-06 Multidisciplinary essays on the effects of the internet on family life, in particular parental oversight of children's use of the World Wide Web. The use of the internet in homes rivals the advent of the telephone, radio, or television in social significance. Daily use of the World Wide Web and e-mail is taken for granted in many families, and the computer-linked internet is becoming an integral part of the physical and audiovisual environment. The internet's features of personalization, interactivity, and information abundance raise profound new issues for parents and children. Most researchers studying the impact of the internet on families begin with the assumption that the family is the central influence in preparing a child to live in society and that home is where that influence takes place. In The Wired Homestead, communication theorists and social scientists offer recent findings on the effects of the internet on the lives of the family unit and its members. The book examines historical precedents of parental concern over new media such as television. It then looks at specific issues surrounding parental oversight of internet use, such as rules

about revealing personal information, time limits, and web site restrictions. It looks at the effects of the web on both domestic life and entire neighborhoods. The wealth of information offered and the formulation of emerging issues regarding parents and children lay the foundation for further research in this developing field. Contributors Robert Kraut, Jorge Reina Schement, Ellen Seiter, Sherry Turkle, Ellen Wartella, and Barry Wellman

The Wired Church 2.0 Len Wilson, Jason Moore, 2008-08-01 Wired Church 2.0 is the go-to guide for church staff and volunteers coordinating multimedia digital technology for worship, the classroom, and marketing. Covering everything from website design and trends in digital media to selecting and training your media team. Wilson and Moore were on the leading edge of media ministry with their 1999 volume The Wired Church: Making Media Ministry. Wired Church 2.0 is the guidebook for a new generation of technology, addressing new multimedia trends, including blogs, podcasts, streaming video, and more. Wired Church 2.0 is a comprehensive how-to book written in an easy-to-understand dummies' guide style. Church media coordinators will learn about the technology, costs, methods, and tricks-of-the-trade for producing high-quality web and video elements for worship, education, and marketing. Len Wilson and Jason Moore run Midnight Oil Productions, a cutting-edge media ministry agency based in Grand Prairie, Texas. They have authored several books together, including Design Matters: Creating Powerful Imagery for Worship (2006), Digital Storytellers: The Art of Communicating the Gospel in Worship (2002) and The Wired Church: Making Media Ministry (1999), all from Abingdon Press.

Wired to the World, Chained to the Home Penny Gurstein, 2001 How does working at home change people's activity patterns, social networks, and their living and working spaces? Will telecommuting solve many of society's ills, or create new ghettos? Penny Gurstein combines a background in planning, sociology of work, and feminist theory with qualitative and quantitative data from ten years of original research, including in-depth interviews and surveys, to understand the impact of home-based work on daily life patterns. She analyzes the experiences of employees, independent contractors, and self-employed entrepreneurs, and presents significant findings regarding the workload, mobility, differences according to work status and gender, and the tensions in trying to combine work and domestic activities in the same setting.

Wired-A Romance Gary Wolf,2003-07-08 The Electric Kool-Aid Acid Test for our own age, the story of a dreamer who turned American media upside down—and suffered the consequences Louis Rossetto had no money, no home, no job. Five years later he owned the hottest magazine in America and was poised to become an international tycoon, with America's most powerful financiers by his side. Rossetto was the founder and editor of Wired, whose hyperactive Day-Glo pages proclaimed that every American institution was obsolete. Instantly, Wired, was everywhere—on television, passed around the halls of Congress, displayed in the office of the president of the United States. Wired,'s headquarters in San Francisco became a pilgrimage site for everybody who wanted to be at the white-hot center of the digital revolution. Not since the early days of Jann Wenner and Rolling Stone had anybody so brilliantly channeled the enthusiasms of his era. But this was only the beginning. Wired cast an uncanny spell, creating a feedback loop that grew stunningly out of control. Wired,'s online site, HotWired, designed and sold

the first banner advertisements for the World Wide Web, unleashing a commercial frenzy. Wired, reached for empire, with a book-publishing company, a broadcast division, and foreign editions all over the globe. But as the market's enthusiasm outstripped the limits of reason, Rossetto faced a battle over the fate of Wired that would prove the ultimate test of his radical ideas. Gary Wolf, one of Wired,'s most popular writers, takes no prisoners in this insider's account, telling a story that is alternately thrilling, hilarious, heartbreaking, and absurd. Now that bumper stickers read-ing please god—just one more bubble have been sighted on the highways of California, Wired—A Romance goes beyond the dot.com clichés and paints a deeply affecting portrait of the boom.

Extreme Economies Richard Davies, 2020-01-14 A New Statesman best book of the year | New York Times Editors' Choice pick A Financial Times best economics book of 2019 An accessible, story-driven look at the future of the global economy, written by a leading expert To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the modern economy and beyond in his globe-trotting book. From a prison in rural Louisiana where inmates purchase drugs with prepaid cash cards to the poorest major city on earth, where residents buy clean water in plastic bags, from the world's first digital state to a prefecture in Japan whose population is the oldest in the world, how these extreme economies function—most often well outside any official oversight-offers a glimpse of the forces that underlie human resilience, drive societies to failure, and will come to shape our collective future. While the people who inhabit these places have long been dismissed or ignored, Extreme Economies revives a foundational idea from medical science to turn the logic of modern economics on its head, arguing that the outlier economies are the place to learn about our own future. Whether following Punjabi migrants through the lawless Panamanian jungle or visiting a day-care for the elderly modeled after a casino, Davies brings a storyteller's eye to places where the economy has been destroyed, distorted, and even turbocharged. In adapting to circumstances that would be unimaginable to most of us, the people he encounters along the way have helped to pioneer the economic infrastructure of the future. At once personal and keenly analytical, Extreme Economies is an epic travelogue for the age of global turbulence, shedding light on today's most pressing economic questions.

Serving a Wired World Katie Hindmarch-Watson, 2020-11-10 In the public imagination, Silicon Valley embodies the newest of the new—the cutting edge, the forefront of our social networks and our globally interconnected lives. But the pressures exerted on many of today's communications tech workers mirror those of a much earlier generation of laborers in a very different space: the London workforce that helped launch and shape the massive telecommunications systems operating at the turn of the twentieth century. As the Victorian age ended, affluent Britons came to rely on information exchanged along telegraph and telephone wires for seamless communication: an efficient and impersonal mode of sharing thoughts, demands, and desires. This embrace of seemingly unmediated communication obscured the labor involved in the smooth operation of the network, much as our reliance on social media and app interfaces does today. Serving a Wired World is a history of information service work embedded in the daily maintenance of liberal Britain and the status quo in the early years of the twentieth century. As Katie

Hindmarch-Watson shows, the administrators and engineers who crafted these telecommunications systems created networks according to conventional gender perceptions and social hierarchies, modeling the operation of the networks on the dynamic between master and servant. Despite attempts to render telegraphists and telephone operators invisible, these workers were quite aware of their crucial role in modern life, and they posed creative challenges to their marginalized status—from organizing labor strikes to participating in deviant sexual exchanges. In unexpected ways, these workers turned a flatly neutral telecommunications network into a revolutionary one, challenging the status quo in ways familiar today.

Social Matthew D. Lieberman, 2013-10-08 We are profoundly social creatures--more than we know. In Social, renowned psychologist Matthew Lieberman explores groundbreaking research in social neuroscience revealing that our need to connect with other people is even more fundamental, more basic, than our need for food or shelter. Because of this, our brain uses its spare time to learn about the social world--other people and our relation to them. It is believed that we must commit 10,000 hours to master a skill. According to Lieberman, each of us has spent 10,000 hours learning to make sense of people and groups by the time we are ten. Social argues that our need to reach out to and connect with others is a primary driver behind our behavior. We believe that pain and pleasure alone guide our actions. Yet, new research using fMRI--including a great deal of original research conducted by Lieberman and his UCLA lab--shows that our brains react to social pain and pleasure in much the same way as they do to physical pain and pleasure. Fortunately, the brain has evolved sophisticated mechanisms for securing our place in the social world. We have a unique ability to read other people's minds, to figure out their hopes, fears, and motivations, allowing us to effectively coordinate our lives with one another. And our most private sense of who we are is intimately linked to the important people and groups in our lives. This wiring often leads us to restrain our selfish impulses for the greater good. These mechanisms lead to behavior that might seem irrational, but is really just the result of our deep social wiring and necessary for our success as a species. Based on the latest cutting edge research, the findings in Social have important real-world implications. Our schools and businesses, for example, attempt to minimalize social distractions. But this is exactly the wrong thing to do to encourage engagement and learning, and literally shuts down the social brain, leaving powerful neuro-cognitive resources untapped. The insights revealed in this pioneering book suggest ways to improve learning in schools, make the workplace more productive, and improve our overall well-being.

Wired Bob Woodward, 2012-03-06 This reissue of Bob Woodword's classic book about John Belushi—one of the most interesting performers and personalities in show business history—"is told with the same narrative style that Woodward employed so effectively in All the President's Men and The Final Days" (Chicago Tribune). John Belushi was found dead of a drug overdose March 5, 1982, in a seedy hotel bungalow off Sunset Boulevard in Hollywood. Belushi's death was the beginning of a trail that led Washington Post reporter Bob Woodward on an investigation that examines the dark side of American show business—TV, rock and roll, and the movie industry. From on-the-record interviews with 217 people, including Belushi's widow, his former partner Dan Aykroyd, Belushi's movie

directors including Jack Nicholson and Steven Spielberg, actors Chevy Chase, Robin Williams, and Carrie Fisher, the movie executives, the agents, Belushi's drug dealers, and those who live in the show business underground, the author has written a close portrait of a great American comic talent, and of his struggle to succeed and to survive that ended in tragedy. Using diaries, accountants' records, phone bills, travel records, medical records, and interviews with firsthand witnesses, Woodward has followed Belushi's life from childhood in a small town outside Chicago to his meteoric rise to fame. Bob Woodward has written a spellbinding account of rise and fall, a cautionary tale for our times, and a poignant and gentle portrait of a young man who had so much, gave so much, and lost so much.

The Winter of Our Disconnect Susan Maushart, 2011-06-28 For any parent who's ever IM-ed their child to the dinner table - or yanked the modem from its socket in a show of primal parental rage - this account of one family's self-imposed exile from the Information Age will leave you ROFLing with recognition. But it will also challenge you to take stock of your own family connections, to create a media ecology that encourages kids - and parents - to thrive. When journalist and commentator Susan Maushart first decided to pull the plug on all electronic media at home, she realised her children would have sooner volunteered to go without food, water or hair products. At ages 14, 15 and 18, her daughters and son didn t use media. They inhabited media. Just exactly as fish inhabit a pond. Gracefully. Unblinkingly. And utterly without consciousness or curiosity as to how they got there. Susan s experiment with her family was a major success and she found that having less to communicate with, her family is communicating more. At the simplest level, The Winter of Our Disconnect is the story of how one family survived six months of wandering through the desert, digitally speaking, and the lessons learned about themselves and technology along the way. At the same time, their story is a channel to a wider view - into the impact of new media on the lives of families, into the very heart of the meaning of home.
