Political Difference and Global Normative Orders Fränze Wilhelm, 2021-06-09 Once considered a question of an international order based on consolidated statehood and homogeneous social communities within national borders, global order has become a question of alternative political articulations, resistance movements, and cultural diversity, among others. This book first critically analyzes the conditions for the struggles of theorizing global normative order in political and IR theory. Second, to make sense of the presence of difference and possibility for global normative order in view of the simultaneous absence of first foundations, the study draws on post-foundational thinking based on the seminal work of German philosopher Martin Heidegger and Argentine political theorist Ernesto Laclau. Finally, the author develops a theoretical framework for a hauntological approach to global normative order that provides an alternative and theoretically coherent explanation for the emergence of global order. This is of interest to scholars as well as practitioners (including activists) concerned with global social relations, global political discourse, and the construction of global identity and normative order(s).

After Amen Rusty George, 2020-10-13 You've prayed about it. Now what? Though none of us pray enough, we all pray some. There eventually comes a moment when we get desperate enough to cry out to God. We pour out our prayers, making confessions, promises, and deals, then we say Amen. And we wait. And wait. Sometimes the silence is deafening, and we question whether God hears us or not. We wonder if our prayers ever got past the ceiling, if he's even there, or if he is waiting on us to do something. So what do we do while we wait for God to answer our prayers? As a pastor with decades of experience, Rusty George offers a new way to help you connect with God and get answers while you wait. By exploring the ministry of Jesus, you will encounter a variety of people who come to him in need, but receive a mixed response; while some get an immediate answer, some have work to do, and some simply wait. As you read, discover the powerful steps of faith you can take after saying Amen.

Burning Mouth Disease Isaäc van der Waal, 2021-04-26 This book gives a comprehensive overview of the symptoms, causes and treatment of Burning Mouth disease and Burning Mouth-like diseases. Burning mouth disease (BMD), also referred to as burning mouth syndrome, is an enigmatic disease for both the patient and the clinician. When the disease is not recognized as such, the patient may become exposed to a wide variety of redundant treatments, including dental and surgical procedures. The text is science-based including literature from the past decades as well as practice-oriented containing treatment guidelines established on personal experience from the author. Much attention is paid to the symptoms of various diseases that may mimic those of BMD. Neurologic and psychogenic aspects are well covered, as are the many treatment modalities, such as pharmacological and nonpharmacological ones. Step-by-step approaches are outlined in this book to help make an apparently unbearable disease more or less acceptable to live with. This monograph will be of help for all dental and medical healthcare providers who are involved in the diagnosis and management of patients suffering from BMD and BMD-like symptoms.

Essential Radiology Review Adam E. M. Eltorai, Charles H. Hyman, Terrance T. Healey, 2019-12-18 The book is an on-the-spot reference for residents and medical students seeking diagnostic radiology fast facts. Its question-and-answer format makes it a perfect

quick-reference for personal review and studying for board examinations and re-certification. Readers can read the text from cover to cover to gain a general foundation of knowledge that can be built upon through practice or can use choice chapters to review a specific subspecialty before starting a new rotation or joining a new service. With hundreds of high-yield questions and answer items, this resource addresses both general and subspecialty topics and provides accurate, on-the-spot answers. Sections are organized by subspecialty and body area, including chest, abdomen, and trauma, and chapters cover the anatomy, pathophysiology, differential diagnosis, hallmark signs, and image features of major diseases and conditions. Key example images and illustrations enhance the text throughout and provide an ideal, pocket-sized resource for residents and medical students.

COVID-19 and Cities Miguel A. Montoya,Aleksandra Krstikj,Johannes Rehner,Daniel Lemus-Delgado,2022-01-01 This book brings together the work of more than 25 scholars from different parts of the world who analyze the challenges posed by the new coronavirus and how it can transform the lives of the cities. Through 19 chapters organized into three sections - experiences, responses and uncertainties - the authors offer a novel perspective about the resilience of the metropolis to face the most important sanitary crisis in the twenty-first century. History shows that cities can innovate and change profoundly in a response to disasters or after suffering an intense crisis, such as a pandemic or dramatic local spread of infectious diseases. In many cases, cities evolve to better urban systems, as literature based on the resilience perspective suggests. From this perspective, this book is a unique contribution to the academic discussion offering a multidisciplinary approach to analyze the impact of COVID-19 in the cities.

Science Fiction in Translation Ian Campbell,2022-01-01 Science Fiction in Translation: Perspectives on the Global Theory and Practice of Translation focuses on the process of translation and its implications. The volume explores the translation of works of science fiction (SF) from one language to another and the translation of SF tropes, terms, and ideas of SF theory into cultures outside the West. Providing a comprehensive examination of the state of translation into English, the essays consider how representative the body of translated work of SF is from the source language/culture. It also considers the social, political, and economic choices in selecting a work to translate. The book illustrates the dramatic growth both in SF production outside the Anglosphere, the translation of works from other languages into English, and the practice of translating English-language SF into other languages. Altogether, the essays map the theory, practice, and business of SF translation around the world.

American Readers at Home Ludovic Balland,2018 Between September and December 2016, Ludovic Balland set out to document how Americans were making sense of the campaigns and the constant hum of media coverage in the run up to and aftermath of the contentious general election. On his 13,000-mile road trip across the country, he called on twenty cities and attended major events, such as the inauguration and the Women's March in Washington, DC. The result of this four-month road trip is American Readers at Home, which collects interviews with more than two hundred people living in cities and small towns across the United States. With print media struggling to survive in an age of twenty-four-hour real-time news and social media feeds, American Readers at Home presents a new, personalized model of story-telling in journalism that reaches audiences by emphasizing how everyday news items relate to personal experience and form people's views. Throughout the trip, Ballard and his collaborators spoke with a wide variety of American citizens, reflecting the diversity of perspectives in the contemporary United States, including people of vastly different social, economic, and cultural backgrounds and both everyday citizens as well as politicians and celebrities. Through their statements and the expressive full-page color portraits featured in the book, we are encouraged to consider their perspectives--their hopes, fears, and expectations

both before and after the election. Filled with fascinating insights, American Readers at Home is the comprehensive archive of this fascinating media project originally published across multiple platforms, including the project's website and social media channels, as well as local print and online newspapers and radio and television stations that distributed the interviews. It forms a highly original record of the United States at a time when at a time when the country was facing great uncertainty and change.

Stolen Churches or Bridges to Orthodoxy? Vladimir Latinovic, Anastacia K. Wooden, 2021-01-15 Throughout their shared history, Orthodox and Eastern Catholic Churches have lived through a very complex and sometimes tense relationship --not only theologically, but also politically. In most cases such relationships remain to this day; indeed, in some cases the tension has increased. In July 2019, scholars of both traditions gathered in Stuttgart, Germany, for an unprecedented conference devoted to exploring and overcoming the division between these churches. This book, the second in a two-volume set of the essays presented at the conference, explores the ecumenical and practical implications of the relationship between Orthodox and Eastern Catholic Churches. Like the conference, the volume brings together representatives of these Churches, as well as theologians from different geographical contexts where tensions are the greatest. The published essays represent the great achievements of the conference: willingness to engage in dialogue, general openness to new ideas, and opportunities to address difficult questions and heal inherited wounds.

Sustainable Bioconversion of Waste to Value Added Products Inamuddin, Anish Khan, 2021-04-20 This edited book discusses various processes of feedstocks bioconversion such as bioconversion of food waste, human manure, industrial waste, beverage waste, kitchen waste, organic waste, fruit and vegetable, poultry waste, solid waste, agro-industrial waste, cow dung, steroid, lignocellulosic residue, biomass, natural gas etc. Nowadays, the industrial revolution and urbanization have made human life comfortable. However, this requires excess usage of natural resources starting from food and food products, to energy resources, materials as well as chemicals. The excess use of natural resources for human comfort is expected to high fuel prices, decline natural resources as well as cause a huge hike in the cost of raw materials. These factors are pushing researchers to grow environmentally friendly processes and techniques based on inexpensive and sustainable feedstock to accomplish such worldwide targets. Bioconversion, otherwise called biotransformation, is the change of natural materials, for example, plant or animal waste, into usable items or energy sources by microorganisms. Bioconversion is an environmentally friendly benevolent choice to supplant the well-established chemical procedures utilized these days for the production of chemicals and fuels. A variety of alternatives advancements are being considered and are directly accessible to acquire diverse valuable end-products through bioprocesses. This book discusses in detail the process and techniques of bioconversion by focusing on the organic feedstock of animal and plant origin. It brings solutions to the bioconversion of various feedstock into value-added products.

The Surrounded by Art Barbara Staubli, Barbara Hatebur, 2021-05-15 Julius Baer, established in Zurich in 1890, is a leading Swiss wealth management group. For nearly as long, the founding family has been engaged in supporting visual and performing arts. In 1981, on the initiative of its then chief executive Hans J. Bär (1927-2011), the company began to build its own collection of contemporary art, guided by the belief that art in a business environment enhances the culture of discussion and is inspirational to employees and clients alike. Today, the Julius Baer Art Collection comprises more than 5,000 works in a range of media--painting, drawing, sculpture, photography, and video--by Swiss artists, both internationally renowned ones and emerging talents. This book offers a survey of the

collection that is on rotating display at the bank's offices around the world and highlights its origins and evolution over the past four decades. artistic positions of thirty-five contemporary Swiss artists, such as John M Armleder, Silvia Bächli, Miriam Cahn, Lutz & Guggisberg, Markus Raetz, Shirana Shahbazi, and Roman Signer, are introduced through brief texts and illustrations of some 350 works from the collection.

Gladys Kalichini Daniela Leykam, Christoph Tannert, 2021-03-08 Gladys Kalichini (born 1989 in Chingola, Zambia) is a contemporary visual artist and academic who investigates how women have been portrayed in relation to a dominant, colonial past. For example, the artist sheds light on instances in which women have been deleted from historical narratives and the collective memory of society. As a result of her extensive research, Kalichini has demonstrated that women were intentionally marginalized in the official representations of Zambia's and Zimbabwe's struggles for independence. In her elaborate multimedia installations and video art, which she often develops on the basis of research material and photos from archives, Kalichini highlights the omissions in the dominant representations of the two countries' fight for freedom. She thus expands the history of their liberation struggle by drawing attention to the deletion and invisibility of female freedom fighters. By reminding the public of several of these women, Kalichini creates a diverse and complex alternative narrative of national independence.

Mechanics of Anisotropic Materials Jacek J. Skrzypek, Artur W. Ganczarski, 2015-05-09 The book is focused on constitutive description of mechanical behaviour of engineering materials: both conventional (polycrystalline homogeneous isotropic or anisotropic metallic materials) and non-conventional (heterogeneous multicomponent anisotropic composite materials). Effective material properties at the macro-level depend on both the material microstructure (originally isotropic or anisotropic) as well as dissipative phenomena occurred on fabrication and consecutive loading phase (hardening) resulting in irreversible microstructure changes (acquired anisotropy). The material symmetry is a background and anisotropy is a core around which the book is formed. In this way a revision of classical rules of enhanced constitutive description of materials is required.

The Future of Local Self-Government Tomas Bergström, Jochen Franzke, Sabine Kuhlmann, Ellen Wayenberg, 2021-01-12 This book presents new research results on the challenges of local politics in different European countries, including Germany, the Netherlands, the Nordic countries and Switzerland, together with theoretical considerations on the further development and strengthening of local self-government. It focuses on analyses of the most recent developments in local democracy and administration.
