Mercato dei media Fouad Sabry, 2024-04-08 Che cos'è il mercato dei media Un mercato, noto anche come mercato dei media, mercato televisivo, regione dei media, area di mercato designata (DMA), area del mercato televisivo o semplicemente mercato, è una regione in cui la popolazione ha accesso alla stessa (o comparabile) offerta di stazioni televisive e radiofoniche. I mercati possono includere anche altre forme di media, come giornali e contenuti Internet. È possibile che corrispondano o si sovrappongano ad una o più aree metropolitane; tuttavia, anche le regioni rurali che hanno un numero limitato di grandi centri abitati possono essere riconosciute come mercati. È vero anche il contrario: aree metropolitane estremamente grandi possono occasionalmente essere suddivise in più parti diverse. È possibile che le regioni del mercato si sovrappongano, il che significa che gli individui che vivono alla periferia di un mercato dei media potrebbero essere in grado di ottenere informazioni da altri mercati comodamente situati nelle vicinanze. Queste misurazioni sono compilate negli Stati Uniti da Nielsen Media Research e sono ampiamente utilizzate nel processo di misurazione dell'audience. Dal completamento dell'acquisizione di Arbitron nel settembre 2013, Nielsen ha effettuato misurazioni dell'audience sia per la radio che per la televisione. Media Market Fouad Sabry, 2024-04-07 What is Media Market A market, also known as a media market, broadcast market, media region, designated market area (DMA), television market area, or simply market, is a region in which the population has access to the same (or comparable) television and radio station offerings. Markets may also include other forms of media, such as newspapers and content from the internet. It is possible for them to correspond with or overlap with one or more metropolitan areas; however, rural regions that have a limited number of large population centers can also be recognized as markets. The opposite is also true: extremely big metropolitan areas can occasionally be divided into a number of different pieces. It is possible for market regions to overlap, which means that individuals who live on the periphery of one media market may be able to get information from other markets that are conveniently located nearby. These measurements are compiled in the United States by Nielsen Media Research, and they are utilized extensively in the process of audience measurement. Since the completion of its acquisition of Arbitron in September 2013, Nielsen has been doing audience measurements for both radio and television.
