Silly Words Word Searches Julie Harper, 2012-08-01 This book has 108 word searches which are silly in one way or another. For example, a word might be a combination of two different animals, like “rhinophant,” which is part rhinoceros and part elephant. Some words sound funny (like “phooey”), some words are a play on the English language (like “gooder” and “badder”), and some words include a name as part of the word (like “banJoe”). Other words are silly in yet other ways. All of the words in the same word search puzzle have something in common. A brief note at the bottom of the word search puzzle explains what is silly about each word list. In some cases, if you read the words of the word list in order they will form a wacky sentence. Solve these silly word searches the same way that ordinary word searches are solved – by finding and circling each word in the word list. Words read horizontally, vertically, and diagonally, forward and backward. Solutions are included in the back of the book so that you can check your answers. May you or your children enjoy solving these silly word search puzzles.

Word Searches to Build Your Vocabulary Meredith McNamara,Ross McNamara,2018-11-06 Enjoy the simple pleasure of classic word searches while building your vocabulary at the same time. With 500 vocabulary words crisscrossed throughout our large, easy-to-read puzzles, word sleuths of all ages can train their brain and unplug for awhile. Whether you're looking for a new twist on your favorite puzzles or need a fun way to boost your vocab skills for an upcoming test like the LSAT, GRE, or SAT - you'll find what you're looking for here (it just might be written backwards and diagonally). In a nutshell, we've taken proven educational learning methods and combined them with fun word puzzles to help expose you to new vocabulary words and their meanings. Trust us, you won't even realize you're studying vocabulary and hopefully you'll be trying a few out in conversation very soon! The book is divided into sections of 100 vocabulary words. Each of those sections has then been divided into five groups of twenty words. Whoa, whoa whoa - that's a lot of numbers and you're clearly more of a word person. We get it. Hang in there.

It's really not too complicated. In order to learn each set of twenty words you'll solve two puzzles. The first word search puzzle has both the words and the definitions given to you. Reading through, searching for and circling the words will help your brain process the vocabulary list in multiple different ways to help it 'stick.' The second puzzle you'll solve has shuffled the order and only gives you the definitions. You'll have to fill in the blanks with the words yourself! This process of writing out the word when you are given the definition is a proven method to further help these new vocabulary words take root in your brain. If you get stuck, you can simply hunt for words in the search to jog your memory or flip back to the previous puzzle for guidance (no one will judge you, we promise). Through puzzle solving, repetition, the physical act of writing, and engagement we're confident this book will help you boost your vocabulary and push you down the path of becoming an even bigger nerd.

Word Searches Mark Danna, 2008-07 Kids will love it: here are more than 100 of the best word searches ever created! Each puzzle will entice young solvers with a clever title, and all the searches feature distinctive designs that fit the theme. For example Hang in There is shaped like a trapeze artist and includes things that might hang--like an ornament or your head. The words (approximately 25 per search) go vertically, horizontally, and diagonally; in an unusual touch, every word in a grid crosses at least one other, and all the words in a grid interconnect. And, as a bonus, every puzzle contains a hidden message--an answer to a punny riddle, a punch line to a silly joke--made up of the uncircled letters!
