Write And Learn Pages' Word Search Puzzles book is a fun way for kids to pass the time while adding new words to their vocabulary. Libraries Supporting Online Learning Christina D. Mune, 2020-10-07 Using practical examples from librarians in the field, this book lays out current issues in online learning and teaches librarians how to adapt a variety of library services—including instruction, reference, and collection development—to online education. Recent studies highlighting the challenges faced by online learners show that skills librarians are uniquely qualified to teach, such as information and digital literacy and source evaluation, can improve academic performance in online courses and enhance the online learning experience. Just as embedded librarianship was developed to answer the needs of online courses when they emerged in the early 2000s, online learning librarian Christina Mune now teaches online librarianship as a set of realistic strategies for serving a variety of online education models. Each chapter of *Libraries Supporting Online Learning* addresses a different strategy for supporting online students and/or faculty, with all strategies derived from real-world practices. Librarians will find information on best practices for creating digital literacy tutorials and dynamic content, providing patrons with open access and open educational resources, helping patrons to avoid copyright issues, promoting peer-to-peer learning and resource sharing, posting to social media, and developing scalable reference services. The tools and practical examples in this book will be useful for all educators interested in increasing the efficacy of online learning.
