A Research Agenda for Transforming Separation

Science National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Chemical Sciences and Technology, Committee on a Research Agenda for a New Era in Separation Science, 2019-10-30 Separation science plays a critical role in maintaining our standard of living and quality of life. Many industrial processes and general necessities such as chemicals, medicines, clean water, safe food, and energy sources rely on chemical separations. However, the process of chemical separations is often overlooked during product development and this has led to inefficiency, unnecessary waste, and lack of consensus among chemists and engineers. A reevaluation of system design, establishment of standards, and an increased focus on the advancement of separation science are imperative in supporting increased efficiency, continued U.S. manufacturing competitiveness, and public welfare. A Research Agenda for Transforming Separation Science explores developments in the industry since the 1987 National Academies report, Separation and Purification: Critical Needs and Opportunities. Many needs stated in the original report remain today, in addition to a variety of new challenges due to improved detection limits, advances in medicine, and a recent emphasis on sustainability and environmental stewardship. This report examines emerging chemical separation technologies, relevant developments in intersecting disciplines, and gaps in existing research, and provides recommendations for the application of improved separation science technologies and processes. This research serves as a foundation for transforming separation science, which could reduce global energy use, improve human and environmental health, and advance more efficient practices in

various industries.

America, the Band Jude Warne, 2020-05-15 As if recovering from a raucous dream of the 1960s, Gerry Beckley, Dewey Bunnell, and Dan Peek arrived on 1970s American radio with a sound that echoed disenchanted hearts of young people everywhere. The three American boys had named their band after a country they'd watched and dreamt of from their London childhood Air Force base homes. What was this country? This new band? Classic and timeless, America embodied the dreams of a nation desperate to emerge from the desert and finally give their horse a name. Celebrating the band's fiftieth anniversary, Gerry Beckley and Dewey Bunnell share stories of growing up, growing together, and growing older. Journalist Jude Warne weaves original interviews with Beckley, Bunnell, and many others into a dynamic cultural history of America, the band, and America, the nation. Reliving hits like "Ventura Highway," "Tin Man," and of course, "A Horse with No Name" from their 19 studio albums and incomparable live recordings, this book offers readers a new appreciation of what makes some music unforgettable and timeless. As America's music stays in rhythm with the heartbeats of its millions of fans, new fans feel the draw of a familiar emotion. They've felt it before in their hearts and thanks to America, they can now hear it, share it, and sing along.

The Nubian Past David N. Edwards, 2004-07-29 This cutting-edge synthesis of the archaeology of Nubia and Sudan from prehistory to the nineteenth century AD is the first major work on this area for over three decades. Drawing on results of the latest research and developing new interpretive frameworks, the area which has produced the most spectacular archaeology in sub-Saharan Africa is examined here by an author with extensive experience in this field. The geographical range of the book extends through the Nubian north, the Middle Nile Basin, and includes what has become the modern Sudan. Using period-based chapters, the region's long-term history is traced and a potential

for a more broadly framed and inclusive 'historical archaeology' of Sudan's more recent past is explored. This text breaks new ground in its move beyond the Egyptocentric and more traditional culture-histories of Nubia, often isolated in Africanist research, and it relocates the early civilizations and their archaeology within their Sudanic Africa context. This is a captivating study of the area's history, and will inform and enthral all students and researchers of Archaeology and Egyptology.

The Image of the Ordered World in Ancient Nubian Art László Török, 2002 This volume presents the first comprehensive study of the Kushite concepts of order in the state and in the cosmos as they were conceptualized in royal and temple texts, in urban architecture, in the structure of temple iconography, and in the relationship between the society and the temples as places of popular worship, archives of historical memory, and centres of cultural identity.
