**7th International Conference on Practical Applications of Agents and Multi-Agent Systems (PAAMS'09)** Yves Demazeau, Juan Pavón, Juan Manuel Corchado Rodríguez, Javier Bajo, 2009-03-08 PAAMS, the International Conference on Practical Applications of Agents and Multi-Agent Systems is an evolution of the International Workshop on Practical Applications of Agents and Multi-Agent Systems. PAAMS is an international yearly tribune to present, to discuss, and to disseminate the latest developments and the most important outcomes related to real-world applications. It provides a unique opportunity to bring multi-disciplinary experts, academics and practitioners together to exchange their experience in the development of Agents and Multi-Agent Systems. This volume presents the papers that have been accepted for the 2009 edition. These articles capture the most innovative results and this year's trends: Assisted Cognition, E-Commerce, Grid Computing, Human Modelling, Information Systems, Knowledge Management, Agent-Based Simulation, Software Development, Transports, Trust and Security. Each paper has been reviewed by three different reviewers, from an international committee composed of 64 members from 20 different countries. From the 92 submissions received, 35 were selected for full presentation at the conference, and 26 were accepted as posters.

*Writing the Literature Review* Sara Efrat Efron, Ruth Ravid, 2018-09-25 This accessible text provides a roadmap for producing a high-quality literature review--an integral part of a successful thesis, dissertation, term paper, or grant proposal. Each step of searching for, evaluating, analyzing, and synthesizing prior studies is clearly explained and accompanied by user-friendly suggestions,

organizational tips, vignettes, and examples of student work. Also featured are excerpts from peer-reviewed quantitative, qualitative, and mixed methods articles. This is the first book to focus on crafting different types of reviews (systematic, traditional–narrative, or hermeneutic–phenomenological) that reflect the writer's research question, methodological choices, and approaches to knowledge. It describes what all reviews have in common and highlights distinct characteristics of each type. The book includes dos and don'ts for evaluating studies and constructing an argument, and software suggestions for locating, organizing, and arranging sources.

**Pedagogical Features** \*Checklists and To Do activities that break down key steps to take. \*Boxed examples, graphics that organize and visually illustrate key concepts, and summary tables. \*Group activities that invite students to further explore and apply the methods discussed in each chapter. \*Detailed directions for using four different organizing strategies: synthesis matrix, summary table, mapping, and topic outline. \*End-of-chapter summaries and What's Next sections. \*Assessment matrices for reviewing and refining the completed literature review. *Film Restoration* L. Enticknap, 2013-11-13 This is the first monograph-length work intended to enable readers with a humanities background and the general public to understand what the processes and techniques of film restoration do and do not involve, attempting to integrate systematically a discussion about related technological and cultural issues.

*Leading in the Digital World* Amit S. Mukherjee, 2020-02-25 The definitive book on leadership in the digital era: why digital technologies call for leadership that emphasizes creativity,

collaboration, and inclusivity. Certain ideas about business leadership are held to be timeless, and certain characteristics of leaders—often including a square jaw, a deep voice, and extroversion—are said to be universal. In *Leading in the Digital World*, Amit Mukherjee argues that since digital technologies are changing everything else, how could they not change leadership ideologies and styles? As more people worldwide participate equally in business, those assumptions of a leader's ideal profile have become irrelevant. Offering a radical rethinking of leadership, Mukherjee shows why digital technologies call for a new kind of leader—one who emphasizes creativity, collaboration, and inclusivity. Drawing on a global survey of 700 mid-tier to senior executives and interviews with C-level executives from around the world, Mukherjee explains how digital technologies are already reshaping organizations and work and what this means for leaders. For example, globally dispersed businesses can't reserve key leadership roles for people from exclusive groups; leadership must become inclusive, or fail. Leaders must learn to collaborate in a multipolar world of networked organizations, working with co-located and non-co-located colleagues. Leaders must lead for creativity rather than productivity. Focusing on practice, Mukherjee outlines goals and strategies, warns against unthinking assumptions, and explains how leaders can identify the mindsets, behaviors, and actions they need to pursue. With *Leading in the Digital World*, Mukherjee offers the definitive book on leadership for the digital era.

Restorative Cities Jenny Roe, Layla McCay, 2021-07-15

Overcrowding, noise and air pollution, long commutes and lack of daylight can take a huge toll on the mental well-being of city-dwellers. With mental healthcare services under increasing pressure, could a better approach to urban design and planning provide a

solution? The restrictions faced by city residents around the world during the COVID-19 pandemic has brought home just how much urban design can affect our mental health – and created an imperative to seize this opportunity. *Restorative Cities* explores a new way of designing cities, one which places mental health and wellness at the forefront. Establishing a blueprint for urban design for mental health, it examines a range of strategies – from sensory architecture to place-making for creativity and community – and brings a genuinely evidence-based approach that will appeal to designers and planners, health practitioners and researchers alike - and provide compelling insights for anyone who cares about how our surroundings affect us. Written by a psychiatrist and public health specialist, and an environmental psychologist with extensive experience of architectural practice, this much-needed work will prompt debate and inspire built environment students and professionals to think more about the positive potential of their designs for mental well-being.

**Life Lessons Learnt** RICHA TAMHANE ,2020-12-08 This book is a blend of various stories and poems based on the life lessons. Life lessons often make remarkable changes in our lives whether it be big or little changes. It is a bunch of short stories and poetry that our co-authors have poured from their hearts. Lessons break you at times but the wisdom behind it is enough to heal you with more power. Life lessons are a surprise gifts to us which may make us cry at first but we realize it later that those were the moments which filled us with wisdom, wisdom to make our life journey worthwhile!

Gen Z, Explained Roberta Katz,Sarah Ogilvie,Jane Shaw,Linda Woodhead,2022-10-26 An optimistic and nuanced portrait of a generation that has much to teach us about how to live and collaborate

in our digital world. Born since the mid-1990s, members of Generation Z comprise the first generation never to know the world without the internet, and the most diverse generation yet. As Gen Z starts to emerge into adulthood and enter the workforce, what do we really know about them? And what can we learn from them? *Gen Z, Explained* is the authoritative portrait of this significant generation. It draws on extensive interviews that display this generation's candor, surveys that explore their views and attitudes, and a vast database of their astonishingly inventive lexicon to build a comprehensive picture of their values, daily lives, and outlook. Gen Z emerges here as an extraordinarily thoughtful, promising, and perceptive generation that is sounding a warning to their elders about the world around them—a warning of a complexity and depth the “OK Boomer” phenomenon can only suggest. Much of the existing literature about Gen Z has been highly judgmental. In contrast, this book provides a deep and nuanced understanding of a generation facing a future of enormous challenges, from climate change to civil unrest. What's more, they are facing this future head-on, relying on themselves and their peers to work collaboratively to solve these problems. As *Gen Z, Explained* shows, this group of young people is as compassionate and imaginative as any that has come before, and understanding the way they tackle problems may enable us to envision new kinds of solutions. This portrait of Gen Z is ultimately an optimistic one, suggesting they have something to teach all of us about how to live and thrive in this digital world.

**Complications in Equine Surgery** Luis M. Rubio-Martinez, Dean A. Hendrickson, 2021-02-08 *Complications in Equine Surgery* is the first reference to focus exclusively on understanding, preventing, recognizing, managing, and prognosing, technical and post-procedural

complications in equine surgery. Edited by two noted experts on the topic, the book presents evidence-based information using a clear approach, organized by body system. Featuring color images, the book contains detailed coverage of the gastrointestinal, respiratory, musculoskeletal, urogenital, and neurological systems. Each chapter contains a short introduction of the procedure with explanations of when and how the procedure is to be performed. All chapters review how to recognize and prevent technical complications and explain how to manage post-operative complications. This important text: Offers the first resource specifically focused on complications encountered in equine surgery Takes a helpful format organized by body system Provides consistently formatted chapters for ease of use Covers clinically relevant information for dealing with technical and post-operative complications Presents more than 350 color images to illustrate the concepts described Written for general practitioners and specialists, *Complications in Equine Surgery* is an essential resource to decreasing morbidity and mortality and increasing surgical success in horses.

**IBM System Storage DS5000 Series Hardware Guide** Sangam Racherla, Matus Butora, Antonio Dell'Apa, Mario Ganem, Corne

Lottering,Libor Miklas,Hrvoje Stanilovic,Alexander Watson,IBM Redbooks,2013-01-10 This IBM® Redbooks® publication consolidates, in one document, detailed descriptions of the hardware configurations and options offered as part of the IBM System Storage DS5000 families of products. This edition covers updates and additional functions available with the IBM System Storage DS® Storage Manager Version 10.77 (firmware level 7.77). This book presents the concepts and functions used in planning and managing the storage servers, such as multipathing and path failover. The book offers a step-by-step guide to using the Storage Manager to create arrays, logical drives, and other basic (as well as advanced) management tasks. This publication also contains practical information about diagnostics and troubleshooting, and includes practical examples of how to use scripts and the command-line interface. This publication is intended for customers, IBM Business Partners, and IBM technical professionals who want to learn more about the capabilities and advanced functions of the DS5000 series of storage servers with Storage Manager Software V10.77. It also targets those who have a DS5000 storage subsystem and need detailed advice about how to configure it. This book is designed specifically to address the hardware features and configuration of the IBM System Storage DS5000 family and can be used in conjunction with the following IBM Redbooks publications: IBM System Storage DS5000 Series Implementation and Best Practices Guide, SG24-8024 IBM System Storage DS Storage Manager Copy Services Guide, SG24-7822

*Language, Data, and Knowledge* Jorge Gracia,Francis Bond,John P. McCrae,Paul Buitelaar,Christian Chiarcos,Sebastian Hellmann,2017-06-08 This book constitutes the proceedings of the First International Conference on Language, Data and Knowledge, LDK 2017, held in Galway, Ireland, in June 2017. The 14 full papers

and 19 short papers included in this volume were carefully reviewed and selected from 68 initial submissions. They deal with language data; knowledge graphs; applications in NLP; and use cases in digital humanities, social sciences, and BioNLP.

**Linguistic Linked Data** Philipp Cimiano, Christian Chiarcos, John P. McCrae, Jorge Gracia, 2020-01-13 This is the first monograph on the emerging area of linguistic linked data. Presenting a combination of background information on linguistic linked data and concrete implementation advice, it introduces and discusses the main benefits of applying linked data (LD) principles to the representation and publication of linguistic resources, arguing that LD does not look at a single resource in isolation but seeks to create a large network of resources that can be used together and uniformly, and so making more of the single resource. The book describes how the LD principles can be applied to modelling language resources. The first part provides the foundation for understanding the remainder of the book, introducing the data models, ontology and query languages used as the basis of the Semantic Web and LD and offering a more detailed overview of the Linguistic Linked Data Cloud. The second part of the book focuses on modelling language resources using LD principles, describing how to model lexical resources using Ontolex-lemon, the lexicon model for ontologies, and how to annotate and address elements of text represented in RDF. It also demonstrates how to model annotations, and how to capture the metadata of language resources. Further, it includes a chapter on representing linguistic categories. In the third part of the book, the authors describe how language resources can be transformed into LD and how links can be inferred and added to the data to increase connectivity and linking between different datasets. They also discuss using LD resources for

natural language processing. The last part describes concrete applications of the technologies: representing and linking multilingual wordnets, applications in digital humanities and the discovery of language resources. Given its scope, the book is relevant for researchers and graduate students interested in topics at the crossroads of natural language processing / computational linguistics and the Semantic Web / linked data. It appeals to Semantic Web experts who are not proficient in applying the Semantic Web and LD principles to linguistic data, as well as to computational linguists who are used to working with lexical and linguistic resources wanting to learn about a new paradigm for modelling, publishing and exploiting linguistic resources.

### **Creativity and Universality in Language** Mirko Degli

Esposti, Eduardo G. Altmann, Francois Pachet, 2016-05-18 This book collects research contributions concerning quantitative approaches to characterize originality and universality in language. The target audience comprises researchers and experts in the field but the book may also be beneficial for graduate students. Creativity might be considered as a morphogenetic process combining universal features with originality. While quantitative methods applied to text and music reveal universal features of language and music, originality is a highly appreciated feature of authors, composers, and performers. In this framework, the different methods of traditional problems of authorship attribution and document classification provide important insights on how to quantify the unique features of authors, composers, and styles. Such unique features contrast, and are restricted by, universal signatures, such as scaling laws in word-frequency distribution, entropy measures, long-range correlations, among others. This interplay between innovation and universality is also an essential

ingredient of methods for automatic text generation. Innovation in language becomes relevant when it is imitated and spread to other speakers and musicians. Modern digital databases provide new opportunities to characterize and model the creation and evolution of linguistic innovations on historical time scales, a particularly important example of the more general problem of spreading of innovations in complex social systems. This multidisciplinary book combines scientists from various different backgrounds interested in quantitative analysis of variations (synchronic and diachronic) in language and music. The aim is to obtain a deeper understanding of how originality emerges, can be quantified, and propagates.

**The Film Till Now** Paul Rotha, 1951

**Nitrate Won\_Nét Wait** Anthony Slide, 2013-05-03 This study looks at the preservation process: newsreel, television, and color preservation; the often controversial issue of colorization; and commercial film archives. It provides detailed histories of the major players in the preservation battle including the International Museum of Photography at George Eastman House, the American Film Institute, the Museum of Modern Art, the UCLA Film and Television Archive, and the Library of Congress. This first historical overview of film preservation in the United States is also highly controversial in its

exposure and criticism of the politicization of film preservation in recent years, and the rising bureaucracy which has often lost sight of preservation and restoration as the ultimate purpose of film archives.
