Mobile World Lynne Hamill, 2005-07-13 This book brings together the perspectives of key researchers to explore lessons on social shaping, examining what can be learned from the adoption of mobile devices that can be applied to other, newer, digital technologies. Forecasting the impact of new technology is always difficult. Occasionally demand is underestimated, but more often it is overestimated, & at great cost. Digital technology is unlike anything that has gone before, making it particularly difficult to understand its implications for businesses, public services & society in general. By looking at what has happened in the past & now, & offering methods of using this knowledge to look forward, this book will contribute to reducing expensive forecasting errors in the future. Key reading for all those involved with the future of mobile communications, this book is a valuable resource, particularly for advanced undergraduates & postgraduates on Mobile Technology courses, practitioners, & researchers working in mobile communications, CSCW & HCI.

Managing the Mobile Workforce: Leading, Building, and Sustaining Virtual Teams David Clemons, Michael Kroth, 2010-11-12 Tools and strategies for hiring, training, supporting, and motivating the fast-growing modern mobile workforce, which in 2011 will surpass 1 billion worldwide. Clemons, a leading training solutions innovator, outlines the eight essentials for creating and sustaining a passionate and productive mobile work force. Includes sections on choosing the right technologies to enable and empower mobile workers.

A History of Mobile in 22 Objects Margaret McCrummen Fowler, 2020 Museums exist to tell histories through objects. In a new publication and corresponding exhibition *A History of Mobile in 22 Objects* (October 30, 2020 - December 31, 2021), the History Museum of Mobile has endeavored to tell a very big history through a decidedly small number of objects. Twenty-two unexpected and compelling artifacts from the museum's collection weave together over 300 years of Mobile history, from the pre-Colonial era to the 21st-century port. Together, they are an accessible, object-based guide to Mobile history--

Immigration Economics George J. Borjas, 2014-06-09 Nearly 3% of the world's population no longer live in the country where they were born. George Borjas synthesizes the theories, models, and econometric methods used to identify the causes and consequences of international labor flows, and lays out with clarity a full spectrum of topics with crucial implications for framing debates over immigration.

Rural-urban Migration in Developing Countries Somik V. Lall, Harris Selod, 2006 The migration of labor from rural to urban areas is an important part of the urbanization process in developing countries. Even though it has been the focus of abundant research over the past five decades, some key policy questions have not found clear answers yet. To what extent is internal migration a desirable phenomenon and under what circumstances? Should governments intervene and, if so, with what types of interventions? What should be their policy objectives? To shed light on these important issues, the authors survey the existing theoretical models and their conflicting policy implications and discuss the policies that may be justified based on recent relevant empirical studies. A key limitation is that much of the empirical literature does not provide structural tests of the theoretical models, but only provides partial findings that can support or invalidate intuitions and in that sense, support or invalidate the policy implications of the models. The authors' broad assessment of the literature is that migration can be beneficial or at least be turned into a beneficial phenomenon so that in general migration restrictions are not desirable. They also identify some data issues and research topics which merit further investigation. --World Bank web site.

Gender Diversity in Senior Positions and Firm Performance Lone Engbo

Christiansen,Huidan Lin,Ms.Joana Pereira,Petia Topalova,Rima Turk,2016-03-07 This paper examines the link between gender diversity in senior corporate positions and financial performance of 2 million companies in Europe. We document a positive association between corporate return on assets and the share of women in senior positions and establish two potential channels through which gender diversity may affect firm performance. The positive correlation is more pronounced in, first, sectors where women form a larger share of the labor force (such as the services sector) and, second, where complementarities in skills and critical thinking are in high demand (such as high-tech and knowledge-intensive sectors).

Labor Economics, second edition Pierre Cahuc,Stephane Carcillo,Andre Zylberberg,2014-08-01 The new edition of a widely used, comprehensive graduate-level text and professional reference covering all aspects of labor economics, with substantial new material. This landmark graduate-level text combines depth and breadth of coverage with recent, cutting-edge work in all the major areas of modern labor economics. Its command of the literature and its coverage of the latest theoretical, methodological, and empirical developments make it also a valuable resource for practicing labor economists. This second edition has been substantially updated and augmented. It incorporates examples drawn from many countries, and it presents empirical methods using contributions that have proved to be milestones in labor economics. The data and codes of these research publications, as well as numerous tables and figures describing the functioning of labor markets, are all available on a dedicated website (www.labor-economics.org), along with slides that can be used as course aids and a discussion forum. This edition devotes more space to the analysis of public policy and the levers available to policy makers, with new chapters on such topics as discrimination, globalization, income redistribution, employment protection, and the minimum wage or labor market programs for the unemployed. Theories are explained on the basis of the simplest possible models, which are in turn related to empirical results. Mathematical appendixes provide a toolkit for understanding the models.

Regional Development in Africa Norbert Edomah,2020-08-19 Regional development is a broad term but can be seen as a general effort to reduce regional disparities by supporting (employment and wealth-generating) economic activities in regions. In the past, regional development policy tended to try to achieve these objectives by means of large-scale infrastructure development and by attracting inward investment" (OECD, 2014).A territorial and regional approach to development is crucial in addressing regional challenges, regional economic competitiveness, and reducing socio-economic discrepancies. This book provides a forum to articulate and discuss Africa's regional development issues in view of the rising opportunities within the African region. This volume contains 14 chapters and is organized in four sections: Introduction; Industry, Trade and Investment in Africa; Agricultural Services and the Water-energy-food Nexus in Africa; and Environmental and Cultural Dimensions to Africa's Regional Development.

Globalized Water Graciela Schneier-Madanes,2014-05-01 Globalized Water presents a compilation of voices that forms a unique scientific exploration of contemporary water management models and governance issues. The book describes the water paradox-how a local resource has become a global product-and the implications of this in how we identify challenges and make

policy in the water sector. Over the last 20 years, the foundations of local and national water systems have been rocked by a wave of changes. The authors in this book, experts in a wide range of disciplines, address the resulting debates and issues: water as a commodity and patrimony, technological rent, liberalization and privatization, the continuing evolution of water management and policy at the European level, decision making and stakeholder participation, conflict and consensus, and the inevitable growth of counterpowers at the local and international levels, promoted by the advocates of sustainable development. The selected case studies are from Europe (primarily France but also Spain, Germany, the United Kingdom, and Portugal), Latin America (Argentina, Bolivia), the United States, Lebanon, and India. From this diverse collection of comparative perspectives and research methods, Globalized Water seeks to advance interdisciplinary research, contributing to a new and dynamic role for social sciences and governance on water.
