**The Buddy Workout** Toni Terry, 2017-12-28 Like many of us, Toni Terry has tried out every fitness and diet fad going. From gym memberships to detoxes, her characteristic determination got her through the punishing workouts and regimes. And yet,

after a month or a year, she always got bored; something was missing and she wasn't quite achieving the results she'd hoped for. What changed and turned her into the social media phenomenon she is today was a whole new approach to fitness and eating well. And what was the magic ingredient? People. Feeling intimidated at the thought of working out on her own with a personal trainer, she hit on the idea of asking her friends to join her. As soon as she started exercising with friends and family, Toni not only started enjoying herself, she also grew more motivated, got the body she always wanted, and felt healthier and happier than ever before. The Buddy Workout will chronicle Toni's journey from her battle with a serious back condition as a teenager, to busy family life with world-class footballer John Terry and her passion for fitness and maintaining a healthy lifestyle. Toni's easy-to-follow fitness programme includes workouts she does on a regular basis with her trainer Bradley Simmonds, and she'll also provide ideas for 5-minute workouts you can build into your busy life, top tips for keeping motivated and looking your best, as well as delicious and nutritious recipes you can share with family and friends.

**Running Heavy** Jeff Grant,2019-12-01 Running Heavy provides you with motivation, inspiration and knowledge to make a huge impact on your running and overall fitness. I wrote this eBook and developed the 2 included 8-week training programs with an intense passion for helping people overcome the same challenges I've experienced starting as an overweight runner and completing challenging ultramarathons and endurance events around for the past two and a half decades. Running Heavy offers

a powerful 360-degree approach to support two groups of runners – those carrying: 1) Extra Bodyweight: overweight, heavy, big-boned, more bodyfat than you want, need to pass a running test while heavy, worried about your knees. If you feel heavy when you run, you're covered here. 2) Extra Weight carried, pulled or pushed: athletes who want to build speed, power, durability, and endurance from running with weight vests, prowlers, sleds, tires, buddies and other loads. If your job, sport or training passion involves moving heavy loads quickly with your body, you're covered here. Learn how to run heavy without getting hurt Coach Grant takes you through an in-depth course on injury prevention, safe technique, realistic and effective progressions and more. You'll learn the 11 rules of heavy running, why each rule matters, and how to use these rules to run in a way to reach your goals without trashing your body. His program even dives into the mind training topic of mental weight, emotional baggage, body image, ego and other factors that weigh many people down. Whether you are running while overweight or throwing on a weight vest / PPE and dragging a sled, the fundamentals are the same across both groups. The safety considerations, injury prevention, supplemental strength and flexibility work are the same. The progressions and mind game tactics are all the same. You may even find yourself in both groups at one or more points in your life. There is no program like this that approaches weighted running holistically, from equipment to progressions, from mind to body, from knowledge to full training plans. You'll never view running heavy the same after completing the Running Heavy program. Training Plans, Workout Libraries and Mind Hacks This program includes two separate 8-week training programs, a library of workouts for weight vests, sleds and other loads, and a toolbox full of mind training tools. For those interested in exercise science, Running Heavy draws from the key studies in this relatively young field of study. The programming is based on science as well as Coach Grant's 25+ years of experience

finishing and coaching runners to finish some of the most extreme races on the planet. About the Coach Coach Jeff Grant has trained Navy SEALs, Professional Athletes, Law Enforcement Officers, Celebrities and MORE! Jeff trains in the Swiss Alps where he lives and coaches Tier 1 Clients and leads adventure travel expeditions around the globe.

### **Pulling Back the Curtain on Qualitative Research**

William E. Thompson, Mica L. Thompson, 2022-12-30 In *Pulling Back the Curtain on Qualitative Research*, the authors maintain that for sociologists the entire world is a laboratory. Seldom do they attend social gatherings without observing people and their interaction in a systematic and intellectually curious way. Regular trips to the grocery store, church services, and engagement with social media all open the door to sociological questioning and encourage forms of empirical observation and data collection. Here, in this practical and in-depth guide to conducting qualitative sociological field research, the authors offer step-by-step guidance to the processes of choosing a research question and forming research objectives; gaining entry to research settings; and reporting and analyzing findings. Each chapter features a past research assignment, wherein the authors draw attention to important ethical considerations and extract the many lessons, quirks, and unanticipated findings they experienced along the way that readers should prepare for and apply while conducting their own qualitative fieldwork. Over the span of several field studies, this book offers readers a behind-the-scenes look at some tested and trusted qualitative methodologies. Designed to be a guide for undergraduate and graduate level students, its real-life meditations would make a meaningful addition to anyone serious about conducting sociological research.

November Project: The Book Brogan Graham,Bojan Mandaric,Caleb Daniloff,2016-04-12 November Project: The Book is the story of how two irreverent, way-outside-the-box fitness fanatics are flipping the fitness industry on its head and literally making the world a better place, one city at a time. No facility. No machines. Just two dudes and a tribe of thousands. Welcome to November Project's world takeover. What started 4 years ago as a simple monthlong workout pact between two former Northeastern University oarsmen in Boston has grown into an

international fitness phenomenon. November Project espouses free, public, all-weather, outdoor group sweats that turn strangers into friends and connect everyone to the city in which they live. It's been described as everything from flashmob fitness to "the fight club of running clubs" and a cult. But November Project prides itself on defying categories. In November Project: The Book, Brogan Graham (a.k.a. BG) and Bojan Mandaric, in their own spicy, big-hearted words, chronicle, along with tribe member and writer Caleb Daniloff, their fitness movement's genesis, evolution, operations, membership, "secret sauce," and future—and along the way, show you how you can get fit and societally engaged. The book also includes illustrated workouts; the keys to meaningful civic engagement; information on using your city as a gym; advice on starting an NP tribe; tips on growing, sustaining, and invigorating membership through social media; and thoughts on the collective power of community.

**Sexual Selection in Homo sapiens** Menelaos Apostolou,2017-06-20 The present book aims to examine how sexual selection works in the human species. Almost all scholarly effort focuses on sexual selection in non-human species and extrapolates the findings to the human one. However, human mating has a unique pattern not found in any other species, namely parental influence over mate choice. Across preindustrial

societies, the typical pattern of long-term mating is arranged marriage, where parents choose spouses for their children. By doing so, parents effectively become a sexual selection force. Traits that enhance an individual's chance to be selected as a son- or a daughter-in-law confer important reproductive advantages to those who are endowed with them, increasing in frequency in the population. The author has coined the term parental choice to describe the sexual selection force that arises from parental control over mating. He synthesizes extensive theoretical and empirical work in order to understand and model this force. The aim is to understand which factors give rise to parental choice and to combine these insights into constructing a more formal model. It also aims to further examine whether the predictions of the model fit the patterns of mating found across different types of human societies, and how the model can be used to understand the evolution of behavioral traits involved in mating. By synthesizing the various arguments put forward and published across the literature, the book offers a comprehensive argument and overview of an aspect of sexual selection unique to our species. Furthermore, the book revises and extends previously made arguments and models, while it provides useful insights on how the proposed revision of sexual selection theory can enable us to understand a wide range of human behavioral phenomena. It should be key reading for those interested in studying sexual selection in general and in the *Homo sapiens* species in particular.
