**Aviation Weather Services** National Research Council,Division on Engineering and Physical Sciences,Commission on Engineering and Technical Systems,National Aviation Weather Services Committee,1995-12-02 Each time we see grim pictures of aircraft wreckage on a rain-drenched crash site, or scenes of tired holiday travelers stranded in snow-covered airports, we are reminded of the harsh impact that weather can have on the flying public. This book examines issues that affect the provision of national aviation weather services and related research and technology development efforts. It also discusses fragmentation of responsibilities and resources, which leads to a less-than-optimal use of available weather information and examines alternatives for responding to this situation. In particular, it develops an approach whereby the federal government could provide stronger leadership to improve cooperation and coordination among aviation weather providers and users.

Addressing Significant Weather Impacts on Airports Steven Barrett,ICF International (Firm),Burrst, Inc. (Firm),KRAMER aerotek,2016 TRB's Airport Cooperative Research Program (ACRP) Report 160: Addressing Significant Weather Impacts on Airports provides a web toolkit that raises airport operator awareness about vulnerabilities caused by significant weather events. The toolkit helps airports develop more robust contingency and recovery plans, in addition to their airport emergency plans. This toolkit focuses on events that are rare but plausible; that is, events that may have happened in the distant past, or in adjacent geographic areas, but are not common event types at the airport itself, and therefore may not be in the forefront of the airport managers' minds. -- Publisher's description
