Medical Innovation in the Changing Healthcare Marketplace

National Research Council, Institute of Medicine, Board on Health Care Services, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, 2002-06-06 A wave of new health care innovation and growing demand for health care, coupled with uncertain productivity improvements, could severely challenge efforts to control future health care costs. A committee of the National Research Council and the Institute of Medicine organized a conference to examine key health care trends and their impact on medical innovation. The conference addressed the following question: In an environment of renewed concern about rising health care costs, where can public policy stimulate or remove disincentives to the development, adoption and diffusion of high-value innovation in diagnostics, therapeutics, and devices?

WHO Expert Committee on Specifications for Pharmaceutical Preparations World Health Organization, 2016 The World Health Organization (WHO) Expert Committee on Specifications for Pharmaceutical Preparations advises the Director-General of WHO in the area of medicines quality assurance. It provides independent expert recommendations and guidance to ensure that medicines meet standards of quality, safety and efficacy in all WHO Member States. Its advice is developed through a broad consensus-building process and covers all areas of quality assurance of medicines, from their development to their distribution to patients. In the area of quality control, the Expert Committee reviewed new and revised

specifications and general texts for inclusion in The International Pharmacopoeia, and received the annual report of the European Directorate for the Quality of Medicines & HealthCare (EDQM), the custodian centre for International Chemical Reference Substances (ICRS). The Committee adopted a number of monographs, general texts and ICRS. It noted the report on Phase 6 of the External Quality Assurance Assessment Scheme (EQAAS) and on new approaches to ensure sustainability of this scheme through user fees. The Committee further acknowledged the progress of good pharmacopoeial practices (GPhP), and adopted the document on GPhP which was prepared by the consecutive international meetings of world pharmacopoeias. In the various quality assurance-related areas the Expert Committee was presented with a number of new and revised guidelines related to good manufacturing practices (GMP), distribution and trade of pharmaceuticals and regulatory practice. It adopted 10 guidelines as listed below as well as 22 new specifications and general texts for inclusion in The International Pharmacopoeia. The Committee took note of ongoing work to promote collaboration and information exchange through the good regulatory practice project and welcomed the development of a comprehensive set of guidelines for all national regulatory authorities through this project.

Background Papers on Industry's Changing Role in Health Care Delivery R.H. Eg Dahl, 1977-11-30 Excerpt from Conference Address
One of the most complex and significant social issues facing our nation is reform of our national health system. I am personally committed, and Goodyear Tire & Rubber is committed, to doing everything we can to help improve that system while simultaneously gaining some measure of control over the tremendous rate of cost escalation. I feel very strongly that in the months ahead, business leaders must become

actively involved in a concerted effort to strike a balance between our desire to assure the best medical care for all and the reality of doing so at a cost our society can afford. For the past two years I have been chairman of the Business Roundtable's Task Force on Health and in that capacity have been working closely with the Washington Business Group on Health. Through this exposure and the encouraging results of Goodyear's own cost containment activities, I was asked to serve on HEW Secretary Califano's Advisory Committee on National Health Insurance. This committee, representing a broad spectrum of interests and expertise, will be meeting in cities across the country and will hold hearings in Washington before entering into final discussions with HEW and other administration officials. The result of its work is to be combined with that of the HEW staff in formulating the basis of President Carter's national health insurance proposal.

Informed Consent and Health Thierry Vansweevelt, Nicola Glover-Thomas, 2020-04-24 Informed consent is the legal instrument that purports to protect an individual's autonomy and defends against medical arbitrariness. This illuminating book investigates our evolving understanding of informed consent from a range of comparative and international perspectives, demonstrating the diversity of its interpretations around the world. Chapters offer a nuanced analysis of the problems that impede the understanding and implementation of the concept of informed consent and explore the contemporary challenges that continue to hinder both the patient and the medical community.
