Countries of the World in Minutes Jacob F. Field,2018-11-27 For each of the 195 officially recognized countries of the world, a mini essay clearly and concisely explains its key history, characteristics, and social and political structures. Alongside, an outline map shows each country's global location, main geographic features, and capital city, while a table of essential data details its population, political system, languages, major religions, currency, gross domestic product, main industries, and much more.

A Guide to Countries of the World Peter Stalker,2010-06-10 An up-to-date handbook providing an overview of every country in the world. Maps and geographical details are given along with the historical and contemporary social, economic, religious and political issues that shape each country. Also provides economic and social indicators, such as GDP and life expectancy, and hundreds of useful web links.

Every Nation for Itself Ian Bremmer,2012-05-03 Following the acclaim for *The End of the Free Market*, Ian Bremmer is back with *Every Nation for Itself*, where he addresses the next big issue for the shifting world economy. 'Smart and snappy ... provides the most cogent prediction of how the politics of a post-America world will play out' *New Statesman* What happens when nobody's running the world? The United States is in financial crisis and can't hold onto the reins of the G-20. But China has no interest in international leadership, Europe is trying to save the euro, and emerging powers like Brazil and India are focused on domestic development. No government has the time, resources or political capital needed to take an international lead. The world power structure is about to have a vacancy...at the top. Welcome to the G-Zero world, in which no single country has the power to shape a truly global agenda. That means we are about to see 20 years of conflict over economics, finance and climate change. Bestselling author and strategist Ian Bremmer reveals how world powers are rapidly turning into gated communities, locked in competition. Who will prevail? 'A prodigy in the US global commentariat. Mr Bremmer's rehearsal of the consequences should make us all wise up' *Financial Times* 'An author who is always full of insights' *George Osborne* Ian Bremmer is the president of the world's leading global political risk research and consulting firm, Eurasia Group. He has written for the *Wall Street Journal*, *Washington Post*, *Newsweek*, and *Harvard Business Review*. His six books include *The J Curve* and *The End Of The Free Market*.

An Atlas of Countries That Don't Exist Nick Middleton,2017-03-21 A “fascinating” journey to little-known and contested lands around the globe, from Tibet to the Isle of Man to Elgaland-Vargaland (*Geographical Magazine*). What is a country? Acclaimed travel writer and Oxford geography don Nick Middleton brings to life the origins and histories of fifty states that, lacking international recognition and United Nations membership, exist on the margins of legitimacy in the global order. From long-contested lands like Crimea and Tibet to lesser-known territories such as Africa's last colony and a European republic that enjoyed independence for a single day, Middleton presents fascinating stories of shifting borders, visionary leaders, and “forgotten” peoples. “Engrossing . . . You'll not find Middle-earth, Atlantis or Lilliput inside, but you will find something just as intriguing . . . sure to prompt discussions about what makes a country a ‘real country.’” —*Seattle Times*

Factfulness Hans Rosling,Anna Rosling Rönnlund,Ola Rosling,2018-04-03 INSTANT NEW YORK TIMES BESTSELLER “One of the most important books I've ever read—an indispensable guide to thinking clearly about the world.” – Bill Gates “Hans Rosling tells the story of ‘the secret silent miracle of human progress’ as only he can. But *Factfulness* does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly.” —Melinda Gates *Factfulness* by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases. - Former U.S. President Barack Obama *Factfulness*: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world's population live in poverty; why the world's population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In *Factfulness*, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don't know what we don't know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn't mean there aren't real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, *Factfulness* is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- “This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn't enough. But I hope this book will be.” Hans Rosling, February 2017.

The Global Constitution Anonymous,2020-01-01 The recent Coronavirus pandemic has taught us that our individual governments are not up to the job of taking on global challenges. What will happen when the next global crisis brought forth by the growing Climate Crisis? What will happen when things get really raunchy and we are all forced to fight for the scraps of a failing world environment coming soon? The only answer is to form a new Global Government and for that we will all need a Global Constitution that is acceptable

to all and that protects and extends the RIGHTS AND FREEDOMS that we all agree are God-given and deserve to be given to all persons living on the Earth today - not just the lucky few who happen to be born in a more politically advanced society. No one should be forced to live under a tyrant or dictator. Nowhere on this planet should laws be made that we all abide by without a DEMOCRATIC PROCESS of approval by the people who are wanting to live under the laws of the land. No country should be able to bully another country because they have bigger cannons or the latest machine guns, cannons, bombs and bombers. No country should live in fear of a neighbor. No person should live in fear of their government. Every person should have the right to a say in how their government works and be the authority in every sense of the word. All people should have the right to a referendum on any given issue whose results must be obeyed by the government because all government derives from the people. Government's purpose is not to enslave its people, but to be enslaved by them. No government shall have the right to destroy the planet even if they are able to keep their destruction within their own borders. The Earth belongs to us all. Not a square inch of it belongs to a politician, a ruler, a political party or a corporation. All of the Earth is shared by all and its resources must never be squandered and there should be a global authority capable of enforcing the preservation of the Earth. If you don't complete reading this book and you are not 100% convinced that it's time for a Global Constitution, then I believe you are the results of hundreds of years of brainwashing and all is lost for the Human Race if there is more of you than people who are not brainwashed and can still think clearly. This is not Communism. This is not Socialism. This is not Republican or Democratic. This Global Constitution is merely the life-long research and original thought of one person, the author, who believes that the equality and harmony and unity offered by a Global Constitution for all people of the Earth is completely logical and will someday be taken for granted by countless generations of our kind for thousands of years to come - that is if we can survive the mess that out-dated, horse-and-buggy political systems have delivered to us and which is killing us, even bringing us to the edge of Extinction. With a completely new and revolutionary move in the right direction, Humankind can avert total catastrophe and it is in this spirit that the completely new Global Constitution, the One World Government to Save The Earth is offered.

Saving Globalization Mike Moore,2009-12-02 Globalization is not new, nor is it a policy, it's a process that has existed as long as man looked over the horizon, travelled and traded. It can't be stopped but it can be slowed. It came to a grinding halt in August 1914 and the Marxist detour cost millions of lives and lost three generations their opportunity and hope in many countries. More wealth has been created in the past 60 years than in all of history. After the most successful decade of sustained economic growth in history, this progress is threatened. Extreme inequality, corruption and environmental degradation threaten the stability and legitimacy of many developing countries' regimes. Anti-globalization and anti-capitalist campaigners' confidence has been emboldened due to the present economic crisis. Protectionist rhetoric is growing as are the arguments to control and regulate markets. Leaders are meeting to discuss how to face these problems and create a new international architecture. How did we get to this position? What should we do? What is it that determines why some contemporary states are successful while others have failed? Saving Globalization departs from its analysis of the globalised economy in the twenty-first century to answer these question by tracing the development of what Moore considers to be 'the big ideas of history': democracy, independent courts, the separation of church and state, property rights, independent courts, a professional civil service, and civil society. Democratic capitalism has worked for most people. Why? It is a remarkable story, from the Greeks to the Geeks, encompassing technological progress and the corrections and contradictions between liberty and equality, technology, growth and the environment. In defence of the many virtues and opportunities that globalisation offers, Mike Moore makes the case for a fresh and new approach to our international Institutions and for domestic policies that promote equity and fairness. The book controversially attacks the new enemies of reason and evidence. The threats now come from all sides, especially workers in developed countries who fear for their jobs. Mike Moore is a political practitioner turned theoretician.
