Work Psychology in Action Anna Sutton, 2020-11-25

The new edition of this popular, accessible and skills-oriented textbook introduces key psychological concepts and demonstrates how they come into play in the real world of work, while building strong awareness of how business priorities inform and underpin applied psychology. It combines summaries of important research studies with an exploration of topics from different international perspectives to offer students a deeper appreciation of how psychology develops and is used in the world of business. The book takes a practical, problem-solving approach to understanding the role of psychology in the workplace and focuses on employability skills that will benefit students in their future careers. Written by a highly experienced lecturer, this book is ideal for undergraduate and postgraduate business and psychology students taking modules in work psychology. New to this Edition: - Fully updated to include the latest research and theory in the field - Reworked chapter on communication and culture - New material on neuroscience - New features such as 'Psychology and Technology' - Updated 'International Perspectives' feature, including a wider range of countries and perspectives of Indigenous peoples - New examples and case studies from a wider geographical range, including Asia, Australasia and the Middle East

Human Genome Editing National Academies of Sciences, Engineering, and Medicine, National Academy of Medicine, National Academy of Sciences, Committee on Human Gene Editing:

Scientific, Medical, and Ethical

Considerations, 2017-08-13 Genome editing is a powerful new tool for making precise alterations to an organism's genetic material. Recent scientific advances have made genome editing more efficient, precise, and flexible than ever before. These advances have spurred an explosion of interest from around the globe in the possible ways in which genome editing can improve human health. The speed at which these technologies are being developed and applied has led many policymakers and stakeholders to express concern about whether appropriate systems are in place to govern these technologies and how and when the public should be engaged in these decisions. Human Genome Editing considers important questions about the human application of genome editing including: balancing potential benefits with unintended risks, governing the use of genome editing, incorporating societal values into clinical applications and policy decisions, and respecting the inevitable differences across nations and cultures that will shape how and whether to use these new technologies. This report proposes criteria for heritable germline editing, provides conclusions on the crucial need for public education and engagement, and presents 7 general principles for the governance of human genome editing.

Global Economic Prospects, June 2021 World

Bank,2021-08-03 The world economy is experiencing a very strong but uneven recovery, with many emerging market and developing economies facing obstacles to vaccination. The global outlook remains uncertain, with major risks around the path of the pandemic and the possibility of financial stress amid large debt loads. Policy makers face a difficult balancing act as they seek to nurture the recovery while safeguarding price stability and fiscal sustainability. A comprehensive set of policies will be required to promote a strong recovery that mitigates inequality and enhances environmental sustainability, ultimately putting economies on a path of green, resilient, and inclusive development. Prominent among the necessary policies are efforts to lower trade costs so that trade can once again become a robust engine of growth. This year marks the 30th anniversary of the Global Economic Prospects. The Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing economies, on a semiannual basis (in January and June). Each edition includes analytical pieces on topical policy challenges faced by these economies.

African Leadership Rob Elkington, Faith Wambura Ngunjiri, Gloria J. Burgess, Xoliswa Majola, Erwin Schwella, Nico de Klerk, 2023-03-14 African Leadership is an edited collection enriched by the people who have lived and experienced indigenous leadership first-hand, demonstrating how African leadership is distinctive from usual Western

hegemonic paradigms.

World Economic Outlook, April 2019 International Monetary Fund. Research Dept.,2019-04-09 After strong growth in 2017 and early 2018, global economic activity slowed notably in the second half of last year, reflecting a confluence of factors affecting major economies. China's growth declined following a combination of needed regulatory tightening to rein in shadow banking and an increase in trade tensions with the United States. The euro area economy lost more momentum than expected as consumer and business confidence weakened and car production in Germany was disrupted by the introduction of new emission standards; investment dropped in Italy as sovereign spreads widened; and external demand, especially from emerging Asia, softened. Elsewhere, natural disasters hurt activity in Japan. Trade tensions increasingly took a toll on business confidence and, so, financial market sentiment worsened, with financial conditions tightening for vulnerable emerging markets in the spring of 2018 and then in advanced economies later in the year, weighing on global demand. Conditions have eased in 2019 as the US Federal Reserve signaled a more accommodative monetary policy stance and markets became more optimistic about a US-China trade deal, but they remain slightly more restrictive than in the fall.

Cradle to Cradle William McDonough,Michael Braungart,2010-03-01 A manifesto for a radically different philosophy and practice of manufacture and environmentalism Reduce, reuse, recycle urge environmentalists; in other words, do more with

less in order to minimize damage. But as this provocative, visionary book argues, this approach perpetuates a one-way, cradle to grave manufacturing model that dates to the Industrial Revolution and casts off as much as 90 percent of the materials it uses as waste, much of it toxic. Why not challenge the notion that human industry must inevitably damage the natural world? In fact, why not take nature itself as our model? A tree produces thousands of blossoms in order to create another tree, yet we do not consider its abundance wasteful but safe, beautiful, and highly effective; hence, waste equals food is the first principle the book sets forth. Products might be designed so that, after their useful life, they provide nourishment for something new-either as biological nutrients that safely re-enter the environment or as technical nutrients that circulate within closed-loop industrial cycles, without being downcycled into low-grade uses (as most recyclables now are). Elaborating their principles from experience (re)designing everything from carpeting to corporate campuses, William McDonough and Michael Braungart make an exciting and viable case for change.

AI and education Miao, Fengchun, Holmes, Wayne, Ronghuai Huang, Hui Zhang, UNESCO, 2021-04-08 Artificial Intelligence (AI) has the potential to address some of the biggest challenges in education today, innovate teaching and learning practices, and ultimately accelerate the progress towards SDG 4. However, these rapid technological developments inevitably bring multiple risks and challenges, which have so far outpaced policy

debates and regulatory frameworks. This publication offers guidance for policy-makers on how best to leverage the opportunities and address the risks, presented by the growing connection between AI and education. It starts with the essentials of AI: definitions, techniques and technologies. It continues with a detailed analysis of the emerging trends and implications of AI for teaching and learning, including how we can ensure the ethical, inclusive and equitable use of AI in education, how education can prepare humans to live and work with AI, and how AI can be applied to enhance education. It finally introduces the challenges of harnessing AI to achieve SDG 4 and offers concrete actionable recommendations for policy-makers to plan policies and programmes for local contexts. Families Caring for an Aging America National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Committee on Family Caregiving for Older Adults, 2016-11-08 Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S.

population. Families Caring for an Aging America examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

Moon Witch, Spider King Marlon James,2022-02-15
“Masterfully flips the first installment on its head... James makes the mythic tantalizingly real.” –Esquire Even more brilliant than the first.” –Buzzfeed An Instant New York Times Bestseller and NPR Best Book of 2022 pick From Marlon James, author of the bestselling National Book Award finalist *Black Leopard, Red Wolf*, the second book in the Dark Star trilogy. In *Black Leopard, Red Wolf*, Sogolon the Moon Witch proved a worthy adversary to Tracker as they clashed across a mythical African landscape in search of a mysterious boy who disappeared. In *Moon Witch, Spider King*, Sogolon takes center stage and gives

her own account of what happened to the boy, and how she plotted and fought, triumphed and failed as she looked for him. It's also the story of a century-long feud—seen through the eyes of a 177-year-old witch—that Sogolon had with the Aesi, chancellor to the king. It is said that Aesi works so closely with the king that together they are like the eight limbs of one spider. Aesi's power is considerable—and deadly. It takes brains and courage to challenge him, which Sogolon does for reasons of her own. Both a brilliant narrative device—seeing the story told in *Black Leopard, Red Wolf* from the perspective of an adversary and a woman—as well as a fascinating battle between different versions of empire, *Moon Witch, Spider King* delves into Sogolon's world as she fights to tell her own story. Part adventure tale, part chronicle of an indomitable woman who bows to no man, it is a fascinating novel that explores power, personality, and the places where they overlap.

The Business Romantic Tim Leberecht, 2015-01-06
In this smart, playful, and provocative book, one of today's most original business thinkers argues that we underestimate the importance of romance in our lives and that we can find it in and through business—by designing products, services, and experiences that connect us with something greater than ourselves. Against the backdrop of eroding trust in capitalism, pervasive technology, big data, and the desire to quantify all of our behaviors, *The Business Romantic* makes a compelling case that we must meld the pursuit of success and achievement with romance if we want to

create an economy that serves our entire selves. A rising star in data analytics who is in love with the intrinsic beauty of spreadsheets; the mastermind behind a brand built on absence; an Argentinian couple who revolutionize shoelaces; the founder of a foodie-oriented start-up that creates intimate conversation spaces; a performance artist who offers fake corporate seminars for real professionals—these are some of the innovators readers will meet in this witty, deeply personal, and rousing ramble through the world of Business Romanticism. The Business Romantic not only provides surprising insights into the emotional and social aspects of business but also presents “Rules of Enchantment” that will help both individuals and organizations construct more meaningful experiences for themselves and others. The Business Romantic offers a radically different view of the good life and outlines how to better meet one’s own desires as well as those of customers, employees, and society. It encourages readers to expect more from companies, to give more of themselves, and to fall back in love with their work and their lives.

It's Complicated Danah Boyd, 2014-02-25 Surveys the online social habits of American teens and analyzes the role technology and social media plays in their lives, examining common misconceptions about such topics as identity, privacy, danger, and bullying.

Investment Climate Reforms World Bank World Bank, 2015-11-02 Private firms are at the forefront of the development process, providing more than 90 percent of jobs, supplying goods and services, and

representing a significant source of tax revenues. Their ability to grow, create jobs, and reduce poverty depends critically on a well-functioning investment climate--defined as the policy, legal, and institutional arrangements underpinning the functioning of markets and the level of transaction costs and risks associated with starting, operating, and closing a business. The World Bank Group has provided extensive support to investment climate reforms. This evaluation by the Independent Evaluation Group (IEG) assesses the relevance, effectiveness, and social value of World Bank Group support to investment climate reforms as it relates to concerns for inclusion and shared prosperity. IEG finds that the World Bank Group has supported a comprehensive menu of investment climate reforms and has improved investment climate in countries, as measured by number of laws enacted, streamlining of processes and time, or simple cost savings for private firms. However, the impact on investment, jobs, business formation, and growth is not straightforward. Regulatory reforms need to be designed and implemented with both economic and social costs and benefits in mind; IEG found that, in practice, World Bank Group support focuses predominantly on reducing costs to businesses. In supporting investment climate reforms, the World Bank and the International Finance Corporation use two distinct but complementary business models. Despite the fact that investment climate is the most integrated business unit in the World Bank Group, coordination is mostly informal, relying mainly on personal contacts. IEG recommends that

the World Bank Group expand its range of diagnostic tools and integrate them in the areas of the business environment not yet covered by existing tools; develop an approach to identify the social effects of regulatory reforms on all groups expected to be affected by them beyond the business community; and exploit synergies by ensuring that World Bank and IFC staff improve their understanding of each other's work and business models.

Parenting Matters National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young

Children, 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and

create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

The Senate Intelligence Committee Report on Torture (Academic Edition) Senate Select Committee On Intelligence, 2020-02-18 The study edition of book the Los Angeles Times called, The most

extensive review of U.S. intelligence-gathering tactics in generations. This is the complete Executive Summary of the Senate Intelligence Committee's investigation into the CIA's interrogation and detention programs -- a.k.a., The Torture Report. Based on over six million pages of secret CIA documents, the report details a covert program of secret prisons, prisoner deaths, interrogation practices, and cooperation with other foreign and domestic agencies, as well as the CIA's efforts to hide the details of the program from the White House, the Department of Justice, the Congress, and the American people. Over five years in the making, it is presented here exactly as redacted and released by the United States government on December 9, 2014, with an introduction by Daniel J. Jones, who led the Senate investigation. This special edition includes:

- Large, easy-to-read format.
- Almost 3,000 notes formatted as footnotes, exactly as they appeared in the original report. This allows readers to see obscured or clarifying details as they read the main text.
- An introduction by Senate staffer Daniel J. Jones who led the investigation and wrote the report for the Senate Intelligence Committee, and a forward by the head of that committee, Senator Dianne Feinstein.
