The World Economic Forum Geoffrey Allen Pigman,2007-01-24 This book explores the paradoxes and unique characteristics of the World Economic Forum, highlighting contemporary issues and debates on global governance, economic development and corporate social responsibility. The Forum is one of the most influential, but least understood, global institutions. Its annual meeting in Davos, Switzerland and its regional summits held around the world attract a significant and powerful audience from the worlds of business, economics, politics and civil society. The participants, who include business and political leaders, representatives of international institutions and civil society organizations, academia and the media, meet to debate issues of global concern and to develop possible solutions. Forum members see the organization as an innovative venue bringing together different types of stakeholders to solve global problems. To its critics, however, the Forum's public face conceals a private venue for making business deals. With clear and concise sections, including boxes containing key ideas and arguments, The World Economic Forum is a much needed introduction to an important and controversial organization and will be of considerable interest to students and practitioners of international business, international political economy, economics, development, international relations, and globalization.

Local Economic and Employment Development (LEED) Local Development Benefits from Staging Global Events OECD,2008-04-11 The competition to stage major global events – such as Olympic Games, EXPOs, cultural festivals, and political summits – is more intense than ever before. Product Lifecycle Management (Volume 4): The Case Studies John Stark,2019-05-07 This book presents some twenty case studies, showing how companies in different industry sectors and of different sizes make advances in Product Lifecycle Management (PLM). Like the author's previous volumes, this book provides a valuable resource for those wishing to learn about PLM and how to implement and apply it in their companies. Helping readers to · learn about implementing and benefiting from PLM; · learn about good PLM solutions and best practice; · improve their planning and decision-making abilities; · benefit from the lessons learned by the companies featured in the case studies; · proceed faster and further with PLM the book presents effective PLM solutions and best practices. At the same time, the case studies included demonstrate how different companies implement and benefit from PLM. Each case study is addressed in a separate chapter and details a different situation, enabling readers to put themselves in the situation and think through different actions and decisions. A valuable resource for PLM team managers and employees in engineering and manufacturing companies, the book is also of interest to researchers and students in industrial engineering fields.

Global Leadership Gama Perruci,2018-12-07 The clash of cultures, coupled with rapid technological advances, seems to be pushing us in paradoxical directions. On the one hand, the world seems to be falling apart; while on the other, the world seems to be converging. Do we have thoughtful leaders to guide us through these uncertain times? As globalization breaks down barriers, global leaders are becoming more visible players on the world stage. From executives of multinational corporations (e.g., high-tech entrepreneurs in Silicon Valley) to social activists (e.g., Malala Yousafzai), individuals from many different cultural backgrounds and ages are reshaping the way we see global leadership. These global leaders have to contend with a variety of transnational contexts that call for different leadership styles. This book assesses four of these styles - transactional, participatory, transformational, and directive - with representative case studies for each. It provides practical skills that global leaders must master in order to be more effective at the transnational level - cultivating a global mindset; developing intercultural communication; leveraging diversity and inclusion; and managing intercultural conflict. Global Leadership is valuable reading for educators in undergraduate and graduate leadership programs; practitioners involved in global for-profit and nonprofit organizations; and leadership educators interested in exploring the impact of technology on global leadership. It provides an excellent balance between the study and practice of global leadership.

The Fourth Industrial Revolution Klaus Schwab,2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Politica e azione pubblica nell'epoca della depoliticizzazione Ernesto d'Albergo,Giulio Moini,2019-12-06 Perché leggere un libro sulla

depoliticizzazione, un concetto difficile non solo da definire, ma anche da pronunciare? Leggere questo libro è utile perché aiuta a decifrare alcune importanti trasformazioni dell'azione pubblica, delle istituzioni e dei rapporti fra società, economia e politica nel corso degli ultimi 30-40 anni e capire se la responsabilità e il potere di fare scelte pubbliche si collocano nella sfera politica o in altre sedi. L'ipotesi del libro è che la categoria di depoliticizzazione dell'azione pubblica, strutturalmente accoppiata con complementari processi di politicizzazione delle azioni di attori "non politici" consenta di rispondere a queste domande in modo articolato. Per controllare teoricamente tale ipotesi sono analizzati i casi delle tensioni depoliticizzanti - e dei connessi processi di (ri)politicizzazione - che interessano la governance europea, le sfide dei populismi all'azione pubblica, il ruolo degli attori economici nelle agende urbane, l'introduzione della valutazione nei meccanismi di gestione dell'università italiana e delle politiche educative, le innovazioni tecnologiche dell'amministrazione pubblica italiana, i processi di homeschooling e i sistemi di welfare contemporanei. La parte conclusiva del lavoro delinea un modello di analisi dei processi di depoliticizzazione e politicizzazione. Con contributi di Sabrina Cavatorto, Simona Colarusso, Ernesto d'Albergo, Edoardo Esposto, Cecilia Ficcadenti, Laura Franceschetti, Dora Gambardella, Orazio Giancola, Giorgio Giovanelli, Emiliano Grimaldi, Rosaria Lumino, Giulio Moini.

Stakeholder Capitalism Klaus Schwab, 2021-01-27 Reimagining our global economy so it becomes more sustainable and prosperous for all Our global economic system is broken. But we can replace the current picture of global upheaval, unsustainability, and uncertainty with one of an economy that works for all people, and the planet. First, we must eliminate rising income inequality within societies where productivity and wage growth has slowed. Second, we must reduce the dampening effect of monopoly market power wielded by large corporations on innovation and productivity gains. And finally, the short-sighted exploitation of natural resources that is corroding the environment and affecting the lives of many for the worse must end. The debate over the causes of the broken economy—laissez-faire government, poorly managed globalization, the rise of technology in favor of the few, or yet another reason—is wide open. Stakeholder Capitalism: A Global Economy that Works for Progress, People and Planet argues convincingly that if we don't start with recognizing the true shape of our problems, our current system will continue to fail us. To help us see our challenges more clearly, Schwab—the Founder and Executive Chairman of the World Economic Forum—looks for the real causes of our system's shortcomings, and for solutions in best practices from around the world in places as diverse as China, Denmark, Ethiopia, Germany, Indonesia, New Zealand, and Singapore. And in doing so, Schwab finds emerging examples of new ways of doing things that provide grounds for hope, including: Individual agency: how countries and policies can make a difference against large external forces A clearly defined social contract: agreement on shared values and goals allows government, business, and individuals to produce the most optimal outcomes Planning for future generations: short-sighted presentism harms our shared future, and that of those yet to be born Better measures of economic success: move beyond a myopic focus on GDP to more complete, human-scaled measures of societal flourishing By accurately describing our real situation, Stakeholder Capitalism is able to pinpoint achievable ways to deal with our problems. Chapter by chapter, Professor Schwab shows us that there are ways for everyone at all levels of society to reshape the broken pieces of the global economy and—country by country, company by company, and citizen by citizen—glue them back together in a way that benefits us all.

India Automated: How the Fourth Industrial Revolution is Transforming India Pranjal Sharma, 2019-11-07 Rethinking the future of India through automation. From scavenging to lunar missions, from railway factories to healthcare and even tax planning, automation is growing faster and deeper in India than is visible. In a country where more than a million people get ready for jobs every month, this rise in automation can appear as an unwelcome change or a threat to their livelihood. But the reality is that automation is enhancing efficiency, accuracy and accountability of India's working professionals in ways that haven't been seen before. Automation is helping generate information in a data-poor country. It is making India's private sector more active and government's functioning more transparent and reliable. Through several case studies of private enterprises and government departments, India Automated chronicles the transformation that India is undergoing and how robotics and process automation are infusing proficiency in our work and personal lives. Automation is turning to be one of the most impactful results of the Fourth Industrial Revolution technologies in India. AI, drones, blockchain, cybersecurity, 3D printing, augmented and virtual reality include automated processes. These are also opening new categories of employment for job seekers. This book argues for deeper collaboration between industrial and government sectors to ensure that automation enhances India's steady growth while also mitigating its negative impact. With this forward-looking approach, Pranjal Sharma brings us face to face with the reality that it is imperative for India to align itself with this revolution.

Taking Responsibility for Tough Choices World Economic Forum. Meeting, William H. Gates, 2005

The Rise of Africa's Small & Medium Size Enterprises Ambassador Robin Renee Sanders, 2017-02-08 Ambassador (Dr.) Robin Renee Sanders' new book on The Rise of Africa's Small & Medium Size Enterprises (SMEs) is an insightful examination of the dramatic shift in the development paradigm for Sub Saharan Africa -- driven in large part by the imaginative, innovative, and insta-impact leadership of the region's small businesses or SMEs. SMEs have helped drive economic development, growth and aided in increasing the size of the Continent's middle class, Sanders says. With the Introduction to the book by renown civil rights leader Ambassador Andrew Young, and the Foreword by Sub Saharan Africa's leading businessman, Mr. Aliko Dangote, Sanders' book credits the determination of Africa SMEs and entrepreneurs (which includes African nationals, immigrants and African Americans) for stepping into the void left by 40-years of post-independence development approaches that had little impact on reducing overall poverty and creating jobs in the region. Africa's dynamic entrepreneurial spirit of Generation-Xers and Millennials' are and have formed SMEs and social enterprises that today are responsible for conceiving and inventing many of the new apps, and answers to address the region's age-old poverty issues, Sanders emphasizes. Africa SMEs are not only a key driver for jobs, but serve as an additional catalyst to grow the middle class. Sanders argues that it was the Rise of the Africa SME - converging with technology and its mobility - that has changed, over the last decade, the focus and direction of development in Sub Saharan Africa. The book has a few vignettes from Sanders' diplomatic life and work as CEO of the FEEEDS Advocacy Initiative with Africa SMEs over the years, as well as regional examples of some of innovative things Africa entrepreneurs are doing in sectors ranging from agriculture and food security to energy and climate change. The book also walks readers through what donors, foundations and African stock markets are doing today to help in the SME space. Sanders ends with recommendations of what more can be done by donors, African governments, and the new U.S. administration to further assist Africa SMEs, particularly the group she calls the critical mass, and those at the fragile end of Africa's middle class.

The Googlization of Everything Siva Vaidhyanathan, 2012-03-13 In the beginning, the World Wide Web was exciting and open to the point of anarchy, a vast and intimidating repository of unindexed confusion. Into this creative chaos came Google with its dazzling mission—To organize the world's information and make it universally accessible—and its much-quoted motto, Don't be evil. In this provocative book, Siva Vaidhyanathan examines the ways we have used and embraced Google—and the growing resistance to its expansion across the globe. He exposes the dark side of our Google fantasies, raising red flags about issues of intellectual property and the much-touted Google Book Search. He assesses Google's global impact, particularly in China, and explains the insidious effect of Googlization on the way we think. Finally, Vaidhyanathan proposes the construction of an Internet ecosystem designed to benefit the whole world and keep one brilliant and powerful company from falling into the evil it pledged to

avoid.

Information Needs of Communities Steven Waldman,2011-09 In 2009, a bipartisan Knight Commission found that while the broadband age is enabling an info. and commun. renaissance, local communities in particular are being unevenly served with critical info. about local issues. Soon after the Knight Commission delivered its findings, the FCC initiated a working group to identify crosscurrent and trend, and make recommendations on how the info. needs of communities can be met in a broadband world. This report by the FCC Working Group on the Info. Needs of Communities addresses the rapidly changing media landscape in a broadband age.
