The Russian Economy and Foreign Direct Investment Kari

Liuhto, Sergei Sutyurin, Jean-Marc F. Blanchard, 2016-11-10 Before the recent Ukrainian crisis, Russia was one of the main sources of foreign direct investment (FDI) outflow and one of the main targets of FDI inflow in the world. However, the events in the Ukraine, the formation of the Eurasian Economic Union, and China's growing interest in the Russian market and its natural resources have changed the picture completely. This new book brings together an international group of contributors to present a timely and comprehensive analysis of FDI to and from Russia. The book assesses the impact of the changed international political situation on foreign firms operating in Russia, and explores how the new world context has affected Russian investments abroad. The book also considers the future relationship between Russian corporations and the EU and the USA in light of recent events. This book answers an array of key questions including: how have investments from and to Russia

developed in the last 100 years; how are Russian businesses spreading to foreign countries through their indirect investments; and how is the Russian Government influencing the investments of Russian businesses abroad? This volume is of great interest to those who study international economics, modern world economy, and FDI, as well as those interested in international investment movements and the changing role of Russia in international business and the global economy.

Russian Multinationals Andrei Panibratov, 2013-06-19 Russian multinationals are playing an increasingly important role in the world economy, particularly in some key sectors such as oil, gas and metallurgy. At the same time, Russian multinationals differ in many respects from multinationals from other countries in that they often receive special treatment from the Russian government, and, because of past experiences, international investors are often reluctant to invest in them. This book presents a comprehensive overview of Russian multinationals. It discusses the rise of Russian multinationals, examines Russian multinationals' activities in key sectors, analyses the relationship between Russian multinationals and the Russian government and between Russian multinationals and international investors, and concludes by assessing how Russian multinationals are likely to develop in future.

Russian Trade Policy Sergei Sutyurin, Olga Y.

Trofimenko, Alexandra Koval, 2019-05-28 This book reveals the key trends in the modern Russian trade policy to provide a deeper understanding of the main challenges and barriers, possible paths and opportunities in its development. An international team of authors investigates specific factors influencing the Russian trade policy evolution; recent trends in Russia's international trade development;

and the impact of Russia's participation in the World Trade Organization on the domestic economy. Particular attention is paid to regional integration processes that involve Russia and their outcomes; as well as challenges in the remaining and building commercial relations with Russia's traditional and 'new' trade partners, taking into consideration those alienating the West and economic sanctions regimes. The analysis of key trends is combined with a special focus on selected industries and economic partners of Russia. The book contains a variety of case studies investigating the ways in which political and business actors adapt to the transformation of Russian trade policy, how Russia participates in the WTO dispute settlement mechanism, and what the driving forces and outputs are for the national economic agents. Finally, the authors consider what the reasonable expectations might be regarding the future prospects of Russian trade policy. The book presents a unique, comprehensive and multidimensional analysis of modern Russian trade policy. Filling an important gap in the existing literature, this book will be of value to all those interested in Russia's economic development path.

The Economic Dimension of Eurasian Integration Natalia A. Piskulova, 2021-02-24 How impactful has the Eurasian Economic Union (EAEU) been since it was signed in 2015? This book provides a thorough and critical analysis of economic integration in the EAEU from the perspective of international economic relations. It focuses on trade, FDI, manufacturing, energy, transport and logistics, science and education, digital economy, labour and ecology. The book also addresses the global positioning of the EAEU by evaluating its existing and potential trade agreements both with third countries and regional blocks. Although the EAEU is an established regional entity that has achieved a number of quantitative and qualitative economic results,

there needs to be inclusive dialogue at the intra-regional (within the EAEU) and interregional (for instance, BRICS+) levels to further deepen the economic integration in the EAEU. This book will be of interest to academics and policymakers working in Eurasian economic integration, international economic relations and regional studies.

Measuring Economic Growth and Productivity Barbara

Fraumeni, 2019-11-08 Measuring Economic Growth and Productivity:

Foundations, KLEMS Production Models, and Extensions presents new insights into the causes, mechanisms and results of growth in national and regional accounts. It demonstrates the versatility and usefulness of the KLEMS databases, which generate internationally comparable industry-level data on outputs, inputs and productivity.

International Firms' Economic Nationalism and Trade Policies in the Globalization Era Chandan, Harish C., Christiansen, Bryan, 2019-02-15 The current world economy is interconnected; however, due to recent economic crises, trade deficits, and nationalist movements, there is a political trend of economic nationalism that is taking root in countries around the world. As such, global economies

around the world are decreasing their international trade and introducing import tariffs and economic protectionism. **International Firms' Economic Nationalism and Trade Policies in the Globalization Era** provides a comprehensive understanding of the recent rise of economic nationalism in the context of the hyper-connected global economy by providing strategies and country-specific solutions for domestic and international firms. Economic and Legal Foundations of Modern Russian Society Elena G. Popkova, 2017-12-01 Modern societies develop very quickly. However, along with rapid economic growth, comes risk to the economic system. That is why there is a need for study of the institutional base on which modern society is built to enable more effective management and better forecasting for further development. Existing studies and publications on the economic and legal foundations of modern society do not take into account the institutional aspects of its development and thus do not fully reflect its sense and content. This book aims to fill this gap in scientific knowledge. This book views the economic and legal foundations of modern society through the lens of a new institutional theory in relation to Russia. The author focuses on Russia – a unique economic system with a developing market, involved in the processes of international economic globalization and integration. The author analyzes actual problems and perspectives of the development of the modern Russian economy through the prism of a new institutional theory. Institutional theory allows for determination and analyzing foundation of society functioning, and “rules of the game”. Without understanding the institutional foundations, consideration of applied issues of development of economy will be fragmentary, as it would be impossible to understand the logic of existing status quo and perspectives of its change in future. This book should fill this gap in

modern scientific knowledge.

External Dimension of an Emerging Economy, India Byasdeb

Dasgupta,2013-06-19 This book offers an analysis of external dimensions of an emerging economy, India, in the backdrop of neoliberal globalisation. External dimensions of Indian economy signify her inter-relation with the rest of the world in terms of trade and financial flows and how that affects the development process within the country in the age of neoliberal globalisation. It is based on non-mainstream unorthodox approach in Economics and as such is a critique of the mainstream neoclassical position on current neoliberal globalisation. The contents of the book can be classified into as follows – (1) India's external dimension in the colonial period through the trade route ; (2) concerns with India's balance of payments transactions in terms of illegal flows, (3) political economy of development planning in the present era of globalisation, (4) capital flows as it affect the India's external front, (5) Indian industries under the TRIPs regime, (6) regional economic integration of India and (7) foreign capital flows in India during the liberalisation period. The entire book is an attempt to decipher the meaning and significance the process of

globalisation produces for the real economy of India. The uniqueness of the book is that in one place one can find different unorthodox positions dealing with the external dimensions of emerging India, which cannot be found in any other book.
