The Development of the British Empire Howard Robinson,1922 Robinson wrote this book to introduce American students to an important part of history that wasn't taught extensively at schools and colleges in the United States. The author discusses the growth of Great Britain, with particular emphasis on recent years, as progress had been quite rapid in the 100 years prior to his book's publication. Newfoundland appears as a topic in both chapters four and twenty-three, as both a British colony and neighbor to the Dominion of Canada. In chapter four, Robinson explains how the importance of the fishery to Britain lead to the colonization of the island and the resulting problems with the French. Chapter twenty-three includes a further description of Newfoundland's fishery, her government, and the possibility of joining Confederation.

Geography of the World's Major Regions John Cole,2003-09-02 This volume presents a global view of today's most pressing issues through an analysis of the twelve major regions of the world. Environmental degradation, natural catastrophe, population pressures and human conflict all impact in different ways and to different degrees on the society and environment of these regions. Economic and political restructuring within each region is covered, and topics include: natural resources; agriculture; industry and services; the role of the military; and the impact of global economic change. This work is intended as an introduction for students studying the changing geography of the world, but should also provide a useful overview to students researching specific regions, seeking comparative analysis of regions, or following general courses on the economic and political geography of both the post-industrial and the developing worlds. Over 250 photographs, maps and figures complement a range of boxed case-studies, key points, questions and guides to further reading.

Columbia Chronologies of Asian History and Culture John S. Bowman,2000-09-05 Containing more information on Asian culture than any other English-language reference work, Columbia Chronologies of Asian History and Culture is the first of its kind: a set of more than thirty chronologies for all the countries of Asia—East, South, Southeast, and Central—from the Paleolithic era through 1998. Each entry is clearly dated and, unlike most chronologies found in standard history texts, the entries are complete and detailed enough to provide virtually a sequential history of the vast and rich span of Asian cultures. The contributing writers and editors have ensured the book's usefulness to general readers by identifying individuals and groups, locating places and regions, explaining events and movements, and defining unfamiliar words and concepts. The thirty-two chronologies on individual countries, in conjunction with a detailed index, allow readers to find specific information quickly and efficiently, whether they seek the date for the invention of the iron plow or gunpowder, the fall of the Han Dynasty in China, or Ho Chi Minh's declarations of Vietnamese independence. This invaluable reference culminates with three appendices: National/Independence Days, Scientific-Technological Achievements in Asia, and Asia: A Chronological Overview, which provides an accessible summary of key events and developments in various fields of activity throughout the continent. The Columbia Chronologies of Asian History and Culture features: three discrete chronologies on (1) Politics/History, (2) Art/Culture/Religion, and (3) Science/Economics/Everyday Life for each of Asia's three major cultures—China, India, and Japan—as well as a combined chronology for each of the other nations; detailed entries of thousands of historical events as well as important milestones in religion, philosophy, literature, and the arts; entries on technological developments and natural events (famines, floods, etc.) affecting the lives of ordinary people; and authoritative and accessibly written entries by a team of Asian scholars from Columbia, Harvard, and other major research universities. Beyond its detailed accounting of Asia's political history, Columbia Chronologies of Asian History and Culture also gives full recognition to religious, intellectual, artistic, and general cultural achievements, as well as to scientific, technological, industrial, agricultural, and economic developments. Concise yet complete, it will stand as an indispensable reference work in the field of Asian studies.

The Ice Balloon Alec Wilkinson,2013-01-08 In 1897, at the height of the heroic age of Arctic exploration, the visionary Swedish explorer S. A. Andrée made a revolutionary attempt to discover the North Pole by flying over it in a hydrogen balloon. Thirty-three years later, his expedition diaries and papers would be discovered on the ice. Alec Wilkinson uses the explorer’s papers and contemporary sources to tell the full story of this ambitious voyage, while also showing how the late 19th century’s spirit of exploration and scientific discovery drove over 1,000 explorers to the unforgiving Arctic landscape. Suspenseful and haunting, Wilkinson captures Andrée’s remarkable adventure and illuminates the detail, beauty, and devastating conditions of traveling and dwelling on the ice.
