An International Annotated Bibliography of Strindberg Studies 1870-2005: Autobiographies, novels, poetry, letters, historical

works, natural history and science, linguistics, painting and the other arts, politics, psychopathology, biography, miscellaneous, dissertations Michael Robinson, 2008 This copiously annotated

bibliography documents and examines the whole range of commentary on Strindberg's works and activity in many fields besides the plays for which he is internationally best known. These include his prose fiction and poetry, his work as an historian and

natural historian, and his relationship to the other arts, most notably his painting. It is concerned with both lasting works of literary and dramatic criticism, as well as reviews of his books and plays in the theatre, and some more ephemeral material, all of this in several languages. Organised generically and by subject and individual work, the bibliography enables the reader to trace the changing impact of Strindberg and his works in various countries and during different periods. It is thus very much a study in reception as well as a bibliographical record of published material. It traces the developing image of Strindberg and his writing both during his lifetime and in subsequent years, and with frequent cross reference offers a comprehensive overview of a literary and existential project that has rarely been matched for its multifaceted diversity. The bibliography is published in three parts. Volume 1, General Studies (978-0-947623-81-4) and Volume 2, The Plays (978-0-947623-82-1) are also now available. Michael Robinson is Emeritus Professor of Drama and Scandinavian Studies at the University of East Anglia, Norwich.

A Biographical Bibliography. Explorers, Scientists & Visitors In the World's Karst 852 BC to the Present Christine Ballinger, Trevor Shaw, To je zelo dolgočasna knjiga. Tako kot slovar vsebuje samo dejstva: dejstva, ki jih ni mogoče najti drugje. Ljudje, ki so pomembni za preučevanje jam in krasa, so znani po tem, kaj so počeli, kaj so napisali in na koga so vplivali. Toda večkrat o njih poznamo zgolj ime. Morda o nekaterih vemo tudi kaj več, med njimi so kralji, romanopisci ali zdravniki. Nekateri, denimo Darwin ali Freud, so svet celo spremenili, toda večinoma so imeli le neizstopajoče normalno življenje, med katerim so tudi raziskovali, preučevali ali pisali o jamah. To so tista življenja, o katerih je težko najti kaj več. V knjigi je 4634 gesel, ki vsebujejo podatke iz rojstnih listov, osmrtnic, neobjavljenih pisem in omembe drugih ljudi. Šele ta širši pogled iz njih naredi prave ljudi. V nekaterih primerih je bilo

njihovo zanimanje za jame del njihovega poklicnega življenja. V mnogih drugih le spodbuda in sprostitev v sicer napornem življenju. Toda v vsakem primeru so ista oseba in isti možgani uživali oboje; in oboje ju je osebno izoblikovalo. Razumemo jih lahko le s pomočjo tukaj zbranih bibliografskih virov.

Small Nations and Colonial Peripheries in World War I, 2016-02-02 This edited volume examines the experience of World War I of small nations, defined here in terms of their relative weakness vis-à-vis the major actors in European diplomacy, and colonial peripheries, encompassing areas that were subject to colonial rule by European empires and thus located far from the heartland of these empires. The chapters address subject nations within Europe, such as Ireland and Poland; neutral states, such as Sweden and Spain; and overseas colonies like Tunisia, Algeria and German East Africa. By combining analyses of both European and extra-European experiences of war, this collection of essays provides a unique comparative perspective on World War I and points the way towards an integrated history of small nations and colonial peripheries. Contributors are Steven Balbirnie, Gearóid Barry, Jens Boysen, Ingrid Brühwiler, William Buck, AUde Chanson, Enrico Dal Lago, Matias Gardin, Richard Gow, Florian Grafl, Dónal Hassett, Guido Hausmann, Róisín Healy, Conor Morrissey, Michael Neiberg, David Noack, Chris Rominger, Danielle Ross and Christine Strotmann.

Microwave Radiometry and Remote Sensing of the Earth's Surface and Atmosphere

0 Pampaloni,
Paloscia,2023-06-14 This book contains a selection of refereed papers presented at the 6 Specialist Meeting on Microwave Radiometry and Remote Sensing of the Environment held in Florence, Italy on March 15-18, 1999. Over the last two decades, passive microwave remote sensing has made considerable

progress, and has achieved significant results in the study of the Earth's surface and atmosphere. Many years of observations with ground-based and satellite-borne sensors have made an important contribution to improving our knowledge of many geophysical processes of the Earth's environment and of global changes. The evolution in microwave radiometers aboard satellites has increased steadily over recent years. At the same time, many investigations have been carried out both to improve the algorithms for the retrieval of geophysical parameters and to develop new technologies. The book is divided into four main sections: three of these are devoted to the observation of the Earth's surface and atmosphere, and the fourth, to future missions and new technologies. The first section deals with the study of sea and land surfaces, and reports recent advances in remote sensing of ocean wind, sea ice, soil moisture and vegetation biomass, including electromagnetic modelling and the assimilation of radiometric data in models of land surface processes. The following two sections are devoted to the measurement of atmospheric quantities which are of fundamental importance in climatology and meteorology, and, since they influence radio-wave propagation, they also impact on several other fields, including geodesy, navigational satellite and radioastronomy. The last section presents an overview of new technologies and plans for future missions.
