Burgundy Explorations Walter Moore, 2013-05-31 Geographically, this guidebook focuses on the eastern part of the Burgundy Region in eastern France. There are 15 cycling routes mapped and profiled. The routes also include 47 discussions of a few villages, historical people and points of interest along the way. Included with each route is the latest method for listing Waypoints that locates its longitude and latitude in degrees, minutes and seconds (to the hundredth), and in digital format; the GPS information. As with all other BICYCLE YOUR FRANCE guidebooks, this guide also offers a companion, QUEUE SHEETS, with just the Waypoint GPS located listings, route maps and elevation profile. Details: English; 15 two-page page color route maps; 2 single page color overview maps; 2 color town maps; 252 color photographs and illustrations. In addition to the print format, this guidebook

and the Queue Sheets are available in print from Amazon. My first guidebook and old friend, BICYCLE YOUR FRANCE: EXPLORING BURGUNDY, is renovated and revamped as BURGUNDY EXPLORATIONS. All eleven of the original route maps have been redrawn. Four new routes are included. Elevation data was acquired every 200 meters on each route and new profiles drafted. With each new guidebook I become more convinced that the best way to engage totally with a region is to bicycle it. Get out there you cycling pilgrims. Each itinerary discusses a few villages, points of interest along the route. All circuits are on paved roads, except for three kilometers on a partly gravel, partly potholed stretch used to avoid some traffic. Motor vehicle traffic on these routes is light. To optimize your vacation or holiday time, the guide helps to anticipate and cope with sources of travel stress and manage costs. To develop your awareness, it also incorporates notes on history, people, geography, structures and geology.

Defending National Treasures Elizabeth Karlsgodt,2011-04-07 *Defending National Treasures* explores the fate of art and cultural heritage during the Nazi occupation of France. The French cultural patrimony was a crucial locus of power struggles between German and French leaders and among influential figures in each country. Karlsgodt examines the preservation policy that the Vichy regime enacted in an assertion of sovereignty over French art museums, historic monuments, and archeological sites. The limits to this sovereignty are apparent from German appropriations of public statues, Jewish-owned art collections, and key Germanic works of art from French museums. A final

chapter traces the lasting impact of the French wartime reforms on preservation policy. In *Defending National Treasures*, Karlsgodt introduces the concept of patrimania to reveal examples of opportunism in art preservation. During the war, French officials sought to acquire coveted artwork from Jewish collections for the Louvre and other museums; in the early postwar years, they established a complicated guardianship over unclaimed art recovered from Germany. A cautionary tale for our own times, *Defending National Treasures* examines the ethical dimensions of museum acquisitions in the ongoing noble quest to preserve great works of art.

Heritage Sites of Astronomy and Archaeoastronomy in the Context of the UNESCO World Heritage Convention Clive L. N. Ruggles, 2012 This Thematic Study is a joint venture between ICOMOS, the advisory body to UNESCO on cultural sites, and the International Astronomical Union. It presents an overall vision on astronomical heritage, attempts to identify what constitutes outstanding universal

significance to humankind in relation to astronomy, and identifies broad issues that could arise in the assessment of cultural properties relating to astronomy. This is the first Thematic Study in any field of science heritage. It is elaborated using examples of properties from around the world, including some already on the World Heritage List or national Tentative Lists. The subject matter ranges from early prehistory to modern astrophysics and space heritage, and also prominently includes dark sky issues and modern observatory sites. An e-version of the Thematic Study was published in June 2010 in time to be presented to the 2010 meeting of UNESCO's World Heritage Committee, where it was duly approved. It has been circulated officially by the WHC to all of UNESCO's National Commissions. This full-colour paperback edition with some updates, and reformatted to new ICOMOS standards, was published in 2011 and is now offered for public sale.

World Heritage Sites and Indigenous Peoples' Rights Stefan Disko,Helen Tugendhat,2014 This book includes twenty case studies of World Heritage sites from around the world that explore, from a human rights perspective, indigenous peoples' experiences with World Heritage sites and with the processes of the World Heritage Convention. The book will serve as a resource for indigenous peoples, World Heritage site managers, and UNESCO, as well as academics, and it will contribute to discussions about what changes or actions are needed to ensure that World Heritage sites can play a consistently positive role for indigenous peoples, in line with the spirit of the United Nations Declaration on the Rights of Indigenous Peoples.
