You Wouldn't Want to Live Without The Internet! Anne Rooney,David Salariya,2021-02-02 The Internet has become one of the most important inventions in our daily lives, revolutionising everything from the way businesses work to the friendships people share. This book tells the story of the internet, from its early development to the creation of the World Wide Web, and today's broadband culture. You Wouldn't Want to Live Without the Internet! is part of a brand-new science and technology strand within the internationally acclaimed You Wouldn't Want to Be series. The clear, engaging text and humorous illustrations bring the subject to life and stimulate young readers' curiosity about the world around them. Specially commissioned cartoon-style illustrations in full colour make these books attractive and accessible even to reluctant readers. Information is conveyed through captions, labels and humorous speech bubbles in addition to the main text. Illustrated sidebars headed 'How It Works', 'Top Tip' or 'You Can Do It' supply more facts, describe simple, safe experiments, or steps that readers can take to help make the world a better place. Each volume includes a timeline and a list of 'Did You Know?' facts.

Global Literacies and the World Wide Web Gail E. Hawisher,Cynthia L. Selfe,2005-07-05 The World Wide Web is transforming the way that information is distributed, received and acted upon. Global Literacies and the World Wide Web provides a critical examination of the new on line literacy practices and values, and how these are determined by national, cultural and educational contexts. Gail Hawisher and Cynthia L. Selfe have brought together scholars from around the world, including: Mexico, Hungary, Australia, Palau, Cuba, Scotland, Greece, Japan, Africa and the United States. Each represents and examines on line literacy practices in their specific culture. Global Literacies and the World Wide Web resists a romanticised and inaccurate vision of global oneness. Instead, this book celebrates the dynamic capacity of these new self defined literacy communities to challenge the global village myth with robust, hybrid redefintions of identity that honour ethnic, cultural, economic, historical, and ideological differences. This is a lively and original challenge to conventional notions of the relationship between literacy and technology.

Teaching Information Technology 14+ Evershed, Jane,Roper, Jayne,2010-10-01 The world of information technology is diverse, impacting on, driving and supporting westernised business and industry as well as affecting every individual. Teachers of IT need to ensure that students recognise and understand why information technology is so important to business and society, as well as helping them to develop functional skills. Teaching Information Technology 14+ helps teachers of IT do just that. It explores the nature of Information Technology (IT), describes some of the current issues and debates surrounding IT and suggests appropriate strategies for successful learning and assessment. In addition to providing teachers with support in differentiating between the numerous Information Technology qualifications, it also includes some examples of relevant teaching and learning strategies and includes case studies and quotations from successful IT teachers and industry practitioners, drawn from a range of environments to highlight key concepts. Teaching Information Technology 14+ is not designed simply as another resource book, but as a means to engage students in the wider aspects of IT through the inclusion of reflective questions, encouraging readers to research and debate the place of IT today.

Online around the World Laura M. Steckman,Marilyn J. Andrews,2017-05-24 Covering more than 80 countries around the world, this book provides a compelling, contemporary snapshot of how people in other countries are using the Internet, social media, and mobile apps. How do people in other countries use the social media platform Facebook differently than Americans do? What topics are discussed on the largest online forum—one in Indonesia, with more than seven million registered users? Why does Mongolia rate in the top-ten countries worldwide for peak Internet speeds? Readers of *Online around the World: A Geographic Encyclopedia of the Internet, Social Media, and Mobile Apps* will discover the answers to these questions and learn about people's Internet and social media preferences on six continents—outside of the online community of users within the United States. The book begins with an overview of the Internet, social media platforms, and mobile apps that chronologically examines the development of technological innovations that have made the Internet what it is today. The country-specific entries that follow the overview provide demographic information and describe specific events influenced by online communications, allowing readers to better appreciate the incredible power of online interactions across otherwise-unconnected individuals and the realities and peculiarities of how people communicate in today's fast-paced, globalized, and high-technology environment. This encyclopedia presents social media and the Internet in new light, identifying how the use of language and the specific application of human culture impacts emerging technologies and communications, dramatically affecting everything from politics to social activism, education, and censorship.

Critiquing Violent Crime in the Media Maria Mellins,Sarah Moore,2022-01-01 This book explores the recent surge in true crime by critically exploring how murder and violence are represented in documentaries, films, podcasts, museums, novels and in the press, and the effects. From a range of contributors, it touches on a wide variety of topics overall and illustrates how examining true crime across the changing popular media landscape can contribute to important debates in contemporary culture and society. It encourages a critical eye towards understanding the harmful stereotypes, myths and misinformation that popular media can bring. Arranged into four sections, including: true crime trials, representations of victims, the consumption of serial killer narratives, and true crime spaces, each chapter explores different themes and topics across traditional and newer media. These topics include: emotion and appeals for justice in Making a Murderer, #MeToo and misogyny in crime narratives, true crime journalism being exploitative, the ethics of consuming dark tourism and the appetite for true crime, live streamed murder, and the ways in which true murder accounts might lend insight into other types of crime such as domestic violence and stalking. This book stimulates discussion on undergraduate courses in crime, media and culture as well as in film and media studies, and it also speaks to those with a general interest in true crime.

Handbook of Mobile Learning Zane L. Berge,Lin Muilenburg,2013-06-19 Winner of the AECT Division of Distance Learning (DDL) Distance Education Book Award! This handbook provides a comprehensive compendium of research in all aspects of mobile learning, one of the most significant ongoing global developments in the entire field of education. Rather than focus on specific technologies, expert authors discuss how best to utilize technology in the service of improving teaching and learning. For more than a decade, researchers and practitioners have been exploring this area of study as the growing popularity of smartphones, tablets, and other such devices, as well as the increasingly sophisticated applications for these devices, has allowed educators to accommodate and support an increasingly mobile society. This handbook provides the first authoritative account of the theory and research that underlies mobile learning, while also exemplifying models of current and future practice.

Social Consequences of Internet Use James E. Katz,Ronald E. Rice,2002-08-30 A study of the impact of Internet use on American society, based on a series of nationally representative surveys conducted from 1995 to 2000. Drawing on nationally representative telephone surveys conducted from 1995 to 2000, James Katz and Ronald Rice offer a rich and nuanced picture of Internet use in America. Using quantitative data, as well as case studies of Web sites, they explore the impact of the Internet on society from three perspectives: access to Internet technology (the digital divide), involvement with groups and communities through the Internet (social capital), and use of the Internet for social interaction and expression (identity). To provide a more comprehensive account of Internet use, the authors draw comparisons across media and include Internet nonusers and former users in their research. The authors call their research the Syntopia Project to convey the Internet's role as one among a host of communication technologies as well as the synergy between people's online activities and their real-world lives. Their major finding is that Americans use the Internet as an extension and enhancement of their daily routines. Contrary to media sensationalism, the Internet is neither a utopia, liberating people to form a global egalitarian community, nor a dystopia-producing armies of disembodied, lonely individuals. Like any form of communication, it is as helpful or harmful as those who use it.
