The Cultural Histories of Radio Luxembourg and Europe n°1 Richard Legay, 2024-01-31 This book focuses on two commercial radio stations, Radio Luxembourg and Europe n°1, which were popular institutions in Western Europe throughout the Long Sixties, working across media and broadcasting transnationally. It argues that the existence of an overarching 'dispositif' of commercial radio stations enabled them to operate on various dimensions and differentiated them from other broadcasters. The book therefore answers current calls in media history to look beyond national and single-medium borders and contributes to the cultural and media history of Western Europe.

Western Broadcasting at the Dawn of the 21st Century Leen d' Haenens, Frieda Saeys, 2021-06-21 The main objectives of the series correspond to those of the journal *Communications: The European Journal of Communication Research*, also published by Mouton de Gruyter. The discipline of communication science is concerned with investigation of the structure and function of mass communication processes and their impact on society and social groups. How these processes have an impact on values, knowledge, opinions and behaviour of individuals similarly constitutes an important area of concern for the discipline. The Communications Monograph series emphasizes these concerns of the discipline through publication of books taking a European social science perspective. Inasmuch as mass communication cannot be studied distinct from other modes of communication, the purpose of the Series is to publish material covering other communication forms - intrapersonal, interpersonal, organizational - in addition to mass communication. In other words, the Communications Monograph series encompasses the entire field of communication science as its domain of interest. Special attention is addressed to the publication of titles that serve as main texts for academic courses and focus on such topics as communication theory and methodology, mass media and production of mediated messages, media use, reception processes, and media impact, political and marketing communication, advertising, public relations and propaganda, media policy, new media technologies and electronic networks, media history and media development.

C.S. Lewis in a Time of War Justin Phillips, 2006-01-24 C. S. Lewis is universally recognized as one of the intellectual giants of the twentieth century. A noted scholar, Lewis was able to reach a vast popular audience during his lifetime and continues to attract thousands of new readers every year. But how did Lewis first become a popular public figure? During the most desperate years of World War II, Lewis was asked by the British Broadcasting Corporation's recently created Home Service to give radio addresses on Christianity to a nation shaken by war. The choice was controversial. At first dismissed by critics as a layman who was unqualified to tackle such weighty issues, Lewis proved to be enormously persuasive. These radio talks were eventually published as *Mere Christianity*, which now ranks as one of the great classics of religious literature. This rich chapter in Lewis's life, which deals with his love-hate relationship with the new medium of broadcasting, has received little attention from biographers and commentators. Yet it was Lewis's work on the radio that made him a household name. By combining narrative skill and adroitly quoting from correspondence, Phillips captures Lewis's reservations, vexations, achievements, and, finally, his enormous success. *C. S. Lewis in a Time of War* is a fascinating look at how these talks were created and the enthusiastic response they generated at a time when bombing in London caused many radio stations to be evacuated. This book reveals a rich, previously untapped vein of Lewis's life and work that will intrigue his millions of fans.

That Magic Feeling John C. Winn, 2009-06-16 From *Revolver* to *Let It Be*, *That Magic Feeling: The Beatles Recorded Legacy, Volume Two, 1966-1970*, continues the chronicle of the group's spectacular career from its creative zenith to its irrevocable split. As the Beatles moved into the mid and late 1960s, their collective and individual musical talent and innovations evolved at an unparalleled pace. Like its companion volume, *Way Beyond Compare: The Beatles' Recorded Legacy, Volume One, 1957-1965*, this unique work thoroughly chronicles all known and available Beatles recordings during this period of incredible creative growth. Have you ever watched a Beatles film clip and wondered: • Where was that filmed? • Is any more of that footage available? Have you ever heard a Beatles interview and asked: • When was that taped? • Where's the best place to find the complete recording? *That Magic Feeling* answers these and thousands of similar questions. With more than 500 entries, it includes recording sessions, concerts, newsreel footage, press clips, TV and film performances, home movies, radio interviews, documentaries, studio outtakes, home demos, and alternative mixes—all of which are given complete coverage for the first time. Author John C. Winn has spent two decades poring over, scrutinizing, organizing, and analyzing hundreds of hours of audio and video recordings and compiling them into a digestible chronological framework, creating the ultimate reference guide to the Beatles' legendary musical and cultural evolution.

The David Bowie Chronology, Volume 1 1947 - 1974 Patrick Lemieux, 2018-02-13 *The David Bowie Chronology, Volume 1*, is a comprehensive look at his recording and release history. From the time he left school to pursue a career in music, David Bowie was always working. After years of struggling with bands, releasing singles and a debut album, all of which failed to chart, success first came with *Space Oddity* in 1969. The 1972 album *The Rise And Fall Of Ziggy Stardust And The Spiders From Mars* made David Bowie a household name. This Chronology covers every aspect of David Bowie's recording career. It looks at his singles, albums and rarities. Demos, alternate versions, remixes and edits, side projects and his work with other artists such as Mott The Hoople and Lou Reed are all explored. The information is presented date by date in chronological order, accompanied by detailed descriptions of each song version, guest appearance, edit, non-album track and alternate version. The book also covers his tours and live appearances.

Engagement in 21st Century French and Francophone Culture Helena Chadderton, Angela Kimyongür, 2017-11-08 In the face of the contested legacy of engagement in the Francophone context, this interdisciplinary collection demonstrates that French and Francophone writers, artists, intellectuals and film-makers are using their work to confront unforeseen and unprecedented challenges, campaigns and causes in a politically uncertain post-9/11 world. Composed of eleven essays and a contextualising introduction, this volume is interdisciplinary in its treatment of engagement in a variety of forms, as it reassesses the relationship between different types of cultural production and society as it is played out in the twenty-first century. With a focus on both the development of different cultural forms (Part 1) and on the particular crises that have attracted the attention of cultural practitioners (Part 2), this volume maps and analyses some of the ways in which cultural texts of all kinds are being used to

respond to, engage with and challenge crises in the contemporary Francophone world.

French Cartoon Art in the 1960s and 1970s Wendy Michallat,2018-07-25 Pilote’s unique position in a new and fast developing youth press market The French comic magazine Pilote hebdomadaire arrived in a weakening comics market in 1959 largely dominated by syndicated translations of American comics and comics inspired by a Catholic ethos. It tailored its content and tone to an older adolescent reader far removed from that of France’s infant comic. Pilote’s profile set it on a turbulent course subject to the vicissitudes and fickleness of fashion which situated it within an emerging teenager press under pressure to renew and innovate to survive. When it made cartoons its defining characteristic in 1963, Pilote articulated its uniqueness by channelling teenager discourse through them whilst also trying to encourage a zest for education in a modernising and economically buoyant France of exciting new opportunities. Pilote’s cartoon art thus became a dynamic repository for the ideas and attitudes of France’s educated youth which evolved into the radical discourses of the lifestyle and political revolutions of the late 1960s and early 1970s. This book tells how Pilote hebdomadaire’s unique positioning in a new and fast developing youth press market for teenagers provided the forum and catalyst for the bande dessinée’s stylistic evolution over the course of the 1960s and 1970s.

Harmful Interference in Regulatory Perspective Mahulena Hofmann,2022-10-30 This collection analyses the regulatory aspects of harmful interference faced by those entities operating space communication and broadcasting. While technology reacts to this international phenomenon with the development of continuously improving technological systems for preventing and combating harmful interference, its international regulatory and legal framework develops at a much slower pace. Issues discussed include the increasing deterioration of signals from broadcasting and communication satellites, including cases of intentional interference known as ‘jamming’; the human rights balance between freedom of expression and protection from hate speech; the efficacy of the current regulatory system and the legal consequences of non-compliance; the role of national authorities, and supranational bodies such as the EU and UN. The contributors include experts drawn from international and national academia, the ITU, national regulatory authorities and operators to present an international, multidimensional, and critical analysis of this complex phenomenon.

Across the Waves Derek W Vaillant,2017-10-18 In 1931, the United States and France embarked on a broadcasting partnership built around radio. Over time, the transatlantic sonic alliance came to personify and to shape American-French relations in an era of increased global media production and distribution. Drawing on a broad range of American and French archives, Derek Vaillant joins textual and aural materials with original data analytics and maps to illuminate U.S.-French broadcasting's political and cultural development. Vaillant focuses on the period from 1931 until France dismantled its state media system in 1974. His analysis examines mobile actors, circulating programs, and shifting governmental and other institutions shaping international radio's use in times of war and peace. He explores the extraordinary achievements, the miscommunications and failures, and the limits of cooperation between America and France as they shaped a new media environment. Throughout, Vaillant explains how radio's power as an instantaneous mass communications tool produced, legitimized, and circulated various notions of states, cultures, ideologies, and peoples as superior or inferior.
