**The New Cosmos** Albrecht Unsöld,Bodo

Baschek,2013-03-09 Astronomy, astrophysics and space research have developed extensively and rapidly in the last few decades. The new opportunities for observation afforded by space travel, the development of high-sensitivity light detectors and the use of powerful computers have revealed new aspects of the fascinating world of galaxies and quasars, stars and planets. The fourth, completely revised edition of The New Cosmos bears witness to this explosive development. It provides a comprehensive but concise introduction to all of astronomy and astrophysics. It stresses observations and theoretical principles equally, requiring of the reader only basic mathematical and scientific background knowledge. Like its predecessors, this edition of The New Cosmos will be

welcomed by students and researchers in the fields of astronomy, physics and earth sciences, as well as by serious amateur astronomers.

**Caracterización multimodal rigurosa de dispositivos de microondas implementados en tecnología guiada** Ángel Antonio San Blas

Oltra,2017-09-05 Este libro aborda la caracterización multimodal rigurosa de dispositivos de microondas implementados en tecnología guiada. Un gran número de dispositivos utilizados actualmente en las bandas de microondas y ondas milimétricas (filtros, diplexores, multiplexores, etc.) están constituidos por la conexión en cascada de guías de onda de diferente sección transversal, siendo por tanto necesario el estudio multimodal riguroso de las distintas uniones planares que se producen entre los diferentes tipos de medios guiados. Por otro lado, este libro también estudia el análisis y diseño de diferentes tipos de uniones multi-puerto en guía rectangular (codos rectos y uniones en T en plano H y en plano E, uniones en T mágica y uniones turnstile) compensadas con postes conductores de geometría cilíndrica. Este tipo de uniones se emplean muy frecuentemente en una gran variedad de dispositivos pasivos de microondas, como son divisores de potencia, acopladores direccionales, transductores ortomodales, etc.
