A Liberal Education Brendan Appfeld, Emanuel Coman, John Gerring, Stephen Jessee, 2023-12-31 An innovative and comprehensive account of the modern university's impact on social and political attitudes.

Public Finance and Public Policy in the New Century Sijbren Cnossen, Hans-Werner Sinn, 2003 The 16 essays in this book were written to celebrate the 90th birthday of Richard Musgrave and to commemorate the tenth anniversary of CES, the Center for Economic Studies at the University of Munich. Musgrave is considered to be a founding father of modern public economics. He belongs to the intellectual tradition that views government as an instrument that can be used to correct market failure and to establish the society that people want. Although his work fits within the individualistic framework of modern economics, he also draws on principles of moral philosophy.

Social Love and the Critical Potential of People Silvia Cataldi, Gennaro Iorio, 2022-09-23 This book unveils the concept of social love as a kind of Karst River that flows through the history of sociology, reassessing it as a form criticism by people in everyday life. Adopting an interdisciplinary perspective, this book offers both theoretical and empirical reflections on social love. It shows that love is not only central to the human experience, but that it can also help to interpret and intervene in social problems such as climate change, poverty, xenophobia, and the (post-)Covid crisis, recognizing people as actors in social change. It explores the idea of love as a key element in the promotion of solidarity and recognition in today's plural and unequal societies. Based on empirical research on social love conducted through both qualitative and quantitative methods, especially in Europe and Latin America, this book explores the social dimension of love. Providing overviews on key questions and studies on current issues, the book is essential reference and resource for researchers, students, social workers, and professionals in social sciences, social philosophy, anthropology, social psychology, sociology of emotions and postmodern literature.

Women, Social Leadership, and the Second World War James Hinton, 2002-11-21 The associational life of middle-class women in twentieth-century England has been largely ignored by historians. During the Second World War women's clubs, guilds, and institutes provided a basis for the mobilization of up to a million women, mainly housewives, into unpaid part-time work. Women's Voluntary Service, which was set up by the Government in 1938 to organize this work, generated a rich archive of reports and correspondence which provide the social historian with a unique window into the female public sphere. Questioning the view that the Second World War served to democratize English society, James Hinton shows how the war enabled middle-class social leaders to reinforce their claims to authority. Displaying 'character' through their voluntary work, the leisured women at the centre of this study made themselves indispensable to the war effort. James Hinton delineates these 'continuities of class', reconstructing intimate portraits of local female social leadership in contrasting settings across provincial England (towns large and small, shire counties, the Durham coalfield), tracing complex and often acerbic rivalries within the voluntary sector, and uncovering gulfs of mutual distrust and incomprehension dividing publicly active women along gendered frontiers of class and party. This study reminds us how much Britain's wartime mobilization relied on a Victorian ethos of public service to cope with the profoundly un-Victorian problems of total war. The women's associations so evocatively explored here reached the apex of their effectiveness during the Second World War, sustaining an uneasy balance between voluntarism and the expanding power of the state. In the longer term female social leaders found themselves marginalized by bureaucracy and professionalization. The stories told here demonstrate that the Second World War changed English society far less than is often assumed. It was not until the 1950s and 1960s that practices and attitudes laid down in the nineteenth century finally lost their purchase.

The Oxford Handbook of Social and Political Trust Eric M. Uslaner, 2018-01-02 This volume explores the foundations of trust, and whether social and political trust have common roots. Contributions by noted scholars examine how we measure trust, the cultural and social psychological roots of trust, the foundations of political trust, and how trust concerns the law, the economy, elections, international relations, corruption, and cooperation, among myriad societal factors. The rich assortment of essays on these themes addresses questions such as: How does national identity shape trust, and how does trust form in developing countries and in new democracies? Are minority groups less trusting than the dominant group in a society? Do immigrants adapt to the trust levels of their host countries? Does group interaction build trust? Does the welfare state promote trust and, in turn, does trust lead to greater well-being and to better health outcomes? The Oxford Handbook of Social and Political Trust considers these and other questions of critical importance for current scholarly investigations of trust.

Freedom of Religion at Stake Dion A. Forster, Elisabeth Gerle, Goran Gunner, 2019-11-01 How can freedom of religion protect the dignity of every human being and safeguard the well-being of creation? This question arises when considering the competing claims among faith traditions, states, and persons. Freedom of religion or belief is a basic human right, and yet it is sometimes used to undermine other human rights. This volume seeks to unpack and wrestle with some of these challenges. In order to do so scholars were invited from different contexts in Africa and Europe to write about freedom of religion from various angles. How should faith traditions in a minority position be protected against majority claims and what is the responsibility of the religious communities in this task? When does the state risk overstepping its boundaries in the delicate balance between freedom of religion and other human rights? How can new voices, who claim their human rights in relation to gender roles, reproductive rights, and as sexual minorities, be heard within their faith traditions? These are some of the questions that are raised by the authors. This is a book for all who are engaged in faith communities, leaders as well as people trying to be recognized. It is also important reading for all interested in international legal frameworks for freedom of religion, state advisers, and human right defenders.

Smart Technologies for Smart Nations Purnendu Mandal, John Vong, 2015-10-27 This book emphasizes the need for new directions and approaches for social and economic development in the emerging nations of the Asia-Pacific region through the use of Smart Technologies. It takes a holistic view of socio-economic and technical developments

taking place through ASEAN and South Asia. Compared to practices in the 20th century, the use of Smart Technologies is likely to have a faster and greater impact on emerging nations (Smart Nations). Smart Technologies for Smart Nations: Perspectives from the Asia-Pacific Region is core reading for academics, professionals, and policymakers interested in technological developments in ASEAN and South Asia.

Global Catholicism, Tolerance and the Open Society Arno Tausch,Stanislaw Obirek,2019-09-03 This book systematically assesses the political and social values of the more than 1.3 billion Catholics around the globe, by far the largest denomination of Western Christianity. Based on an extensive analysis of data from the World Values Survey and other global opinion surveys, the book sheds new light on the value systems and opinions of Roman Catholics. The authors highlight core problems and challenges the Church is currently facing in adapting to the modern world, including Catholic anti-Semitism, religious and sexual tolerance, and opinions towards democracy, while also offering an anthropological reflection on how well the Church is adapting or failing to adapt to the requirements of an open society.
