Planning for Community-based Disaster Resilience Worldwide Adenrele Awotona, 2016-10-14 We are witnessing an ever-increasing level and intensity of disasters from Ecuador to Ethiopia and beyond, devastating millions of ordinary lives and causing long-term misery for vulnerable populations. Bringing together 26 case studies from six continents, this volume provides a unique resource that discusses, in considerable depth, the multifaceted matrix of natural and human-made disasters. It examines their bearing on the loss of human and productive capital; the conduct of national policies and the setting of national development priorities; and on the nature of international aid and bilateral assistance strategies and programs of donor countries. In order to ensure the efficacy and appropriateness of their support for disaster survivors, international agencies, humanitarian and disaster relief organizations, scholars, non-governmental organizations, and members of the global emergency management community need to have insight into best practices and lessons learned from various disasters across national and cultural boundaries. The evidence obtained from the numerous case studies in this volume serves to build a worldwide community that is better informed about the cultural and traditional contexts of such disasters and better enabled to prepare for, respond to, and finally rebuild sustainable communities after disasters in different environments. The main themes of the case studies include: • the need for community planning and emergency management to unite in order to achieve the mutual aim of creating a sustainable disaster-resilient community, coupled with the necessity to enact and implement appropriate laws, policies, and development regulations for disaster risk reduction; • the need to develop a clear set of urban planning and urban design principles for improving the built environment's capacities for disaster risk management through the integration of disaster risk reduction education into the curricula of colleges and universities; • the need to engage the whole community to build inclusive governance structures as prerequisites for addressing climate change vulnerability and fostering resilience and sustainability. Furthermore, the case studies explore the need to link the existence and value of scientific knowledge accumulated in various countries with decision-making in disaster risk management; and the relevance and transferability from one cultural context to another of the lessons learned in building institutional frameworks for whole community partnerships.

Marktqualität und Insiderhandel auf Kapitalmärkten Gernot Hinterleitner, Philipp Hornung, 2016-07-05 Gernot Hinterleitner und Philipp Hornung verbinden über ein wirtschaftswissenschaftliches Experiment zwei Gebiete der Finanzmarktforschung. Zuerst wird die Marktqualität unterschiedlicher Handelsformen analysiert, anschließend wird der Insiderhandel innerhalb dieser Marktformen betrachtet. Die Autoren zeigen, dass eine Eröffnungsauktion die Informationseffizienz des Eröffnungspreises gegenüber einer ausschließlich kontinuierlichen Auktion signifikant erhöht. Ein positiver Spillover Effect erzeugt hierbei auch eine höhere Marktqualität. Das Verhalten von Kapitalmarktteilnehmern mit Insiderinformation verdeutlicht, dass Insider auch bei Konkurrenz untereinander ihre Aufträge möglichst unauffällig platzieren. Zusätzlich werden geschlechtsspezifische Unterschiede sichtbar, wenn das Risiko der Aufdeckung abgeschätzt wird.

Handbook of Risk Management in Energy Production and Trading Raimund M. Kovacevic, Georg Ch. Pflug, Maria Teresa Vespucci, 2013-11-27 This book presents an overview of the risks involved in modern electricity production, delivery and trading, including technical risk in production, transportation and delivery, operational risk for the system operators, market risks for traders, and political and other long term risks in strategic management. Using decision making under uncertainty as a methodological background, the book is divided into four parts, with Part I focusing on energy markets, particularly electricity markets. Topics include a nontechnical overview of energy markets and their main properties, basic price models for energy commodity prices, and modeling approaches for electricity price processes. Part II looks at optimal decisions in managing energy systems, including hydropower dispatch models, cutting plane algorithms and approximative dynamic programming; hydro-thermal production; renewable; stochastic investments and operational optimization models for natural gas transport; decision making in operating electricity networks; and investment in extending energy production systems. Part III explores pricing, including electricity swing options and the pricing of derivatives with volume control. Part IV looks at long-term and political risks, including energy systems under aspects of climate change, and catastrophic operational risks, particularly risks from terrorist attacks.

An Introduction to International Health Michael Seear, 2012-11 At a time when developed world populations are healthier and richer than they have ever been, why is there still so much poverty and disease in the world? Why do rich countries hold so many poor countries in debt and why do millions of children die every year from avoidable diseases? This new edition attempts to answer these pressing questions. An Introduction to International Health, Second Edition is a comprehensive and detailed exploration of international health and the modern aid industry. This provocative new edition is masterfully constructed around four essential themes: What is international health? Why is population health so poor in developing countries? What is the extent of the problem? What can be done about it? The thoroughly updated second edition provides answers to these questions and includes new discussions on war, governance and human rights in developing countries, and the various issues surrounding water, sanitation, and infectious diseases. Solutions are examined via primary health care strategies, poverty alleviation, and developing world debt relief, as well as human rights interventions. Unique to this book is its how-to component. The final section discusses how to work safely and effectively in a developing country. This eye-opening text is an essential read for all those interested in international health.

Oil, Gas, and Mining Peter D. Cameron, Michael C. Stanley, 2017-06-01 Oil, Gas, and Mining: A Sourcebook for Understanding the Extractive Industries provides developing countries with a technical understanding and practical options around oil, gas, and mining sector development issues. A central premise of the Sourcebook is that good

technical knowledge can better inform political, economic, and social choices with respect to sector development and the related risks and opportunities. The guidance provided by the Sourcebook assumes a broad set of overarching principles, all centered on good governance and directed at achieving positive and broadly based sustainable development outcomes. This Sourcebook is rich in presenting options to challenges, on the understanding that contexts and needs vary, and that there is much to be gained from appreciating the lessons learned from a broad set of experiences.

An Introduction to Global Health Michael Seear, Obidimma Ezezika, 2017-12-18 Newly revised and thoroughly updated, the third edition of *An Introduction to Global Health* is constructed around three essential questions: why is population health so poor in developing countries, what is the scope of the issue, and how can it be remediated? By considering aspects of the topic that are often neglected—including poverty, malnutrition, wars, governance, and humanitarian disasters—Seear and Ezezika provide a comprehensive overview of the various determinants of global health and its inevitable companion, the modern aid industry. This informative and accessible introduction examines potential solutions to health inequity via a combination of primary health care strategies, poverty alleviation, developing world debt relief, and human rights interventions. With an updated discussion of global health in relation to the Sustainable Development Goals, as well as the addition of chapter summaries, critical-thinking questions, and recommended readings, this new edition is an ideal resource for both university-level students and anyone keen to inform themselves on this urgent problem.

Casting a Giant Shadow Rachel S. Harris, Dan Chyutin, 2021-07-06 Film came to the territory that eventually became Israel not long after the medium was born. *Casting a Giant Shadow* is a collection of articles that embraces the notion of transnationalism to consider the limits of what is Israeli within Israeli cinema. As the State of Israel developed, so did its film industries. Moving beyond the early films of the Yishuv, which focused on the creation of national identity, the industry and its transnational ties became more important as filmmakers and film stars migrated out and foreign films, filmmakers, and actors came to Israel to take advantage of high-quality production values and talent. This volume, edited by Rachel Harris and Dan Chyutin, uses the idea of transnationalism to challenge the concept of a singular definition of Israeli cinema. *Casting a Giant Shadow* offers a new understanding of how cinema has operated artistically and structurally in terms of funding, distribution, and reception. The result is a thorough investigation of the complex structure of the transnational and its impact on national specificity when considered on the global stage.

Fractal Approaches for Modeling Financial Assets and Predicting Crises Nekrasova, Inna, Karnaukhova, Oxana, Christiansen, Bryan, 2018-02-09 In an ever-changing economy, market specialists strive to find new ways to evaluate the risks and potential reward of economic ventures. They start by assessing the importance of human reaction during the economic planning process and put together systems to measure financial markets and their longevity. *Fractal Approaches for Modeling Financial Assets and Predicting Crises* is a critical scholarly resource that examines the fractal structure and long-term memory of the financial markets in order to predict prices of financial assets and financial crises. Featuring coverage on a broad range of topics, such as computational process models, chaos theory, and game theory, this book is geared towards academicians, researchers, and students seeking current research on pricing and predicting financial crises.

Forensic Criminology Andy Williams, 2014-09-02 This text provides an examination of the aetiological development of forensic criminology in the UK. It links the subjects of scientific criminology, criminal investigations, crime scene investigation, forensic science and the legal system and it provides an introduction to the important processes that take place between the crime scene and the courtroom. These processes help identify, define and label the 'criminal' and are crucial for understanding any form of crime within society. The book includes sections on: • the epistemological and ontological philosophies of the natural sciences; • the birth of scientific criminology and its search for the criminal 'body'; • the development of early forms of forensic science and crime scene investigation; • investigating crime; • information, material and evidence; • crime analysis and crime mapping; • scientific support and crime scene examination; and • forensic science and detection methods and forensics in the courtroom. The text combines coverage of historical research and contemporary criminal justice processes and provides an introduction to the most common forensic practices, procedures and uses that enable the identification and successful prosecution of criminals. *Forensic Criminology* is essential for students of criminology, criminal justice, criminal investigations and crime science. It is also useful to those criminal justice practitioners wishing to gain a more in-depth understanding of the links between criminology, criminal investigations and forensics techniques.

Ingrained Lesley Head, Jennifer Atchison, Alison Gates, 2012 Theoretically, this book develops new insights by bringing together human geography, biogeography and archaeology to provide a long term perspective on human-wheat relations. Although the relational, more-than-human turn in the social sciences has seen a number of plant-related studies, these have not yet fully engaged with the question of what it means to be a plant. The book draws on diverse literatures to tackle this question, advancing thinking about how plants act in their worlds, and how we can better understand our shared worlds.

Free Justice Sara Mayeux, 2020-04-28 Every day, in courtrooms around the United States, thousands of criminal defendants are represented by public defenders--lawyers provided by the government for those who cannot afford private counsel. Though often taken for granted, the modern American public defender has a surprisingly contentious history--one that offers insights not only about the carceral state, but also about the contours and compromises of twentieth-century liberalism. First gaining appeal amidst the Progressive Era fervor for court reform, the public defender idea was swiftly quashed by elite corporate lawyers who believed the legal profession should remain independent from the state. Public defenders took hold in some localities but not yet as a nationwide standard. By the 1960s, views had shifted. Gideon v. Wainwright enshrined the right to counsel into law and the legal profession mobilized to expand the ranks of public defenders nationwide. Yet within a few years, lawyers had already diagnosed a crisis of underfunded, overworked defenders providing inadequate representation--a crisis that persists today. This book shows how these conditions, often attributed to recent fiscal emergencies, have deep roots, and it chronicles the intertwined histories of constitutional doctrine, big philanthropy, professional in-fighting, and Cold War culture that made public defenders ubiquitous but embattled figures in American courtrooms.
