Competition Policies and Consumer Welfare Lahcen Achy, Susan

Joeke, 2016-09-30 The fundamental goal of competition law is to support productivity and innovativeness; in fact, the short-term effect of enforcement actions is often a reduction in product prices. This book reports the findings of consumer market studies into a range of goods and services in developing countries in Africa, Asia and Latin America. It finds a pervasive lack of competition in those markets, which not only reduces the standard of

living of consumers, including poor and vulnerable groups, but also softens the incentives on firms to improve the efficiency of their operations and the quality of their products

Curb Your Enthusiasm: The Fintech Hype Meets Reality in the Remittances Market Tito Nícias Teixeira da Silva Filho, 2022-12-02 Fintech has become one of the most popular topics among policymakers and experts. It usually comes with the qualifier “disruptive”. Thus, the hype is easy to understand: fintech would upend the financial system due to its disruptive nature, as it would allow financial services to be completed faster, cheaper, and more efficiently. Indeed, many have predicted that the remittances market was on the verge of being disrupted as remittances are considered too costly while remittance service providers inefficient, opaque, and outdated. Therefore, there seems to be no better setting for assessing the allegedly disruptive effects of fintech. Against that background, this paper investigates how those predictions have fared so far. Contrary to expectations, it found that instead of disrupting incumbents fintechs have increasingly been entangled with them. Therefore, not only there is no evidence of disruption, but it is unlikely to occur in the foreseeable future. Even so, the paper argues that fintechs play an important role in the remittances market.

Achieving Organizational Excellence Flevy Lasrado, 2018-05-01 This book bridges two essential aspects of assessing and achieving business excellence in 21st-century organizations. The author argues that transnational companies face a twofold challenge: managing global knowledge networks and multicultural project teams on the one hand; and interacting and collaborating across boundaries using global communication technologies, on the other. The author also argues that this dual challenge calls for the creation of a business excellence program that fits and thrives within these multicultural environments. In response, he reviews corporate practices in quality management and business excellence frameworks that have been extensively used on a transnational scale to drive organizational performance. The book approaches quality management as an element that is no longer a choice, but has now become a necessity if companies want to compete in highly globalized environments.

Financial Inclusion at the Bottom of the Pyramid Carol Realini, Karl Mehta, 2015-07-15 As incredible as it may seem in this hyper-connected, technologically advanced era, half the planet's population exist as “Financial nomads”—those who nourish and shelter themselves without using traditional banking services. While the wealthy live at the top of a metaphorical pyramid, taking financial security and banking services for granted, there are billions of people who struggle at the pyramid's base in an exhausting state of financial exclusion and insecurity. Times are changing

rapidly, but despite global uncertainty, technology has the capacity to reach and equip people in all walks of life. Advances in communications have reconfigured the ease with which we interact with our money—and these advances can provide innovative financial services to the unbanked and underserved around the world. Financial inclusion for all is indeed within our reach, and with this conviction, authors Karl Mehta and Carol Realini propose a vision for a better world and a blueprint to get there.

The Report: Saudi Arabia 2014 Oxford Business Group,2014-08-18 Home to an estimated 15.9% of the world's proven oil reserves, Saudi Arabia is the single largest economy in the Middle East and North Africa. According to the Ministry of Finance, real GDP grew by 3.8% to \$746bn in 2013. While oil income is expected to continue to account for the majority of government revenues for the foreseeable future, the non-oil sector has expanded significantly in recent decades growing 9.3% in 2013. Indeed, while some Western countries may be seeing a return to cautious optimism and leading emerging economies are weighing the potential impact on capital flows of tapering in the US Federal Reserve's quantitative easing programme, Saudi Arabia is seeing sustained growth buoyed by high global oil prices and internal investment in its own infrastructure. Some 15 years after Saudi Arabia attended the inaugural meeting of G20 countries, its key economic indicators make it the envy of many other member states. Given the size of Saudi economy within the regional and indeed global market, OBG looks in depth at bilateral trade between ASEAN nations and the GCC.

Remittance Markets in Africa Sanket Mohapatra,Dilip Ratha,2011-01-01 Remittances sent by African migrants have become an important source of external finance for countries in the Sub-Saharan African region. In many African countries, these flows are larger than foreign direct investment and portfolio debt and equity flows. In some cases, they are similar in size to official aid from multilateral and bilateral donors. Remittance markets in Africa, however, remain less developed than other regions. The share of informal or unrecorded remittances is among the highest for Sub-Saharan African countries. Remittance costs tend to be significantly higher in Africa both for sending remittances from outside the region and for within-Africa (South-South) remittance corridors. At the same time, the remittance landscape in Africa is rapidly changing with the introduction of new remittance technologies, in particular mobile money transfers and branchless banking. This book presents findings of surveys of remittance service providers conducted in eight Sub-Saharan African countries and in three key destination countries. It looks at issues relating to costs, competition, innovation and regulation, and discusses policy options for leveraging remittances for development in Africa.

Disaster Management for 2030 Agenda of the SDG V. K. Malhotra,R. Lalitha S. Fernando,Nivedita P. Haran,2020-09-26 This book shows how specifically each goal of Sustainable Development Goals could be incorporated in country wise developmental programmes set to transform the world. It highlights how a combination of initiatives on mitigation of disasters and a robust progress could build a resilient society. The book discusses multidimensional processes such as administrative, financial and social challenges which can

mitigate disasters and help in an advancement towards SDG Goals. It highlights the embeddedness of SDGs in disaster mitigation as they tend to be linked and interdependent. By linking sustainable development to disaster mitigation one gets a strong justification for investment into preparedness as a guarantee or insurance against loss and damages due to unforeseen disasters.
