**Pro Express.js** Azat Mardan, 2014-12-26 Pro Express.js is for the reader who wants to quickly get up-to-speed with Express.js, the flexible Node.js framework. Author Azat Mardan clearly explains how to start developing with Express.js with a basic 'Hello World', and then delves into a deep API reference, before looking at common and abstract development problems. Lastly, you will learn how to build a series of real-world apps in order to cement your knowledge. In order to get the best from this book, you will be familiar with Node.js scripts and able to install packages using npm. In the deep API reference, each aspect of the Express.js API is explained clearly with a simple exercise to demonstrate its usage. This includes configuration, settings and environments; different middleware and its uses; templating engines; extracting parameters and routing; request and response; error handling; and running an app. In the next part you'll delve into abstraction, streams, authentication, multithreading, Socket.io, security, and more complex modules. You will also learn about smaller frameworks built using Express.js, such as Sails.js, and Derby. Finally you'll build real-world apps including a REST API, Todo App, and Instagram gallery. Express.js is used by a range of well-known companies such as MySpace and Storify, and it's becoming more and more likely that it'll be a required skill for new developers. With this book you can skip learning via complicated documentation, and get the information from a developer who's been using Express.js for long enough to explain things well. Signed Language and Gesture Research in Cognitive Linguistics Terry Janzen, Barbara Shaffer, 2023-07-24 This volume represents the first time that researchers on signed language and gesture have come together with a coherent focus under the framework of cognitive linguistics. The pioneering work of Sherman Wilcox is highlighted throughout, scaffolding much of the research of these contributors. The five sections of the volume reflect critical areas of Dr. Wilcox's own research in cognitive linguistics: Guiding research principles in signed language, gesture, and cognitive linguistics, iconicity across signed and spoken linguistics, multimodality, blending, depiction and metaphor in signed languages, and specific grammatical constructions as form-meaning pairings. The authors of this volume exemplify and continue Dr. Wilcox's work of bridging signed and spoken language disciplines by contributing chapters that represent a multiplicity of perspectives on signed, spoken, and gesture data. This volume presents a unified collection of cognitive linguistics research by leading authors that will be of interest to readers in the fields of signed and spoken language linguistics, gesture studies, and general linguistics.

**The Oxford Handbook of Modality and Mood** Jan Nuyts,Johan van der Auwera,2016-09-08 This handbook offers an in depth and comprehensive state of the art survey of the linguistic domains of modality and mood. An international team of experts in the field examine the full range of methodological and theoretical approaches to the many facets of the phenomena involved. Following an opening section that provides an introduction and historical background to the topic, the volume is divided into five parts. Parts 1 and 2 present the basic linguistic facts about the systems of modality and mood in the languages of the world, covering the semantics and the expression of different subtypes of modality and mood respectively. The authors also examine the interaction of modality and mood, mutually and with other semantic categories such as aspect, time, negation, and evidentiality. In Part 3, authors discuss the features of the modality and mood systems in five typologically different language groups, while chapters in Part 4 deal with wider perspectives on modality and mood: diachrony, areality, first language acquisition, and sign language. Finally, Part 5 looks at how modality and mood are handled in different theoretical approaches: formal syntax, functional linguistics, cognitive linguistics and construction grammar, and formal semantics.
