Mobile Marketing Management Hongbing Hua,2019-03-18 With the development of mobile internet technology, people's lifestyle and consumer behavior are changing rapidly. Nowadays, the products on the market are updating more and more frequently, and the traditional marketing theory and brand theory fail to get with the mobile internet. So, what's the innovative marketing to take in the new era? Since 2012, China has entered into the mobile era, and became a major country of mobile internet application. The book summarizes the experience of the author accumulated from many trials and errors in management and marketing innovation, so as to form the pattern of management and marketing for the next 30 years. Mobile Marketing Management lays the foundation for the new era with four pillars: service, substance, superuser, space, known as 4S theory for short. In view of the concept of customer-first, it is all about service, and products become productized service concepts. In view of the failure of mass communication, the competition among all services becomes the competition of substance differentiation. Regarding the popularity of self-organization, it becomes a trend to cooperate with people rather than the company to develop the market. In view of the principle of fuzzy market boundary, the enterprises shall optimize their living space and evolve their development space. This book contains numerous case studies along with analysis and creates the discipline of mobile marketing management, providing innovative theories, methods and tools for the marketing of enterprises. Through this book, readers can master the marketing methods of the mobile internet era. They can apply the marketing theory in this book to guide the marketing practice, thus improving marketing efficiency and reducing marketing costs.

The Normal Advance ,1898

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz

Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Discover Your Inner Economist Tyler Cowen, 2008-05-27 One of America's most respected economists presents a quirky, incisive romp through everyday life that reveals how you can turn economic reasoning to your advantage—often when you least expect it to be relevant. Like no other economist, Tyler Cowen shows how economic notions—such as incentives, signals, and markets—apply far more widely than merely to the decisions of social planners, governments, and big business. What does economic theory say about ordering from a menu? Or attracting the right mate? Or controlling people who talk too much in meetings? Or dealing with your dentist? With a wryly amusing voice, in chapters such as “How to Control the World, The Basics” and “How to Control the World, Knowing When to Stop” Cowen reveals the hidden economic patterns behind everyday situations so you can get more of what you really want. Readers will also gain less selfish insights into how to be a good partner, neighbor and even citizen of the world. For instance, what is the best way to give to charity? The chapter title “How to Save the World—More Christmas Presents Won't Help” makes a point that is every bit as personal as it is global. Incentives are at the core of an economic approach to the world, but they don't just come in cash. In fact, money can be a disincentive. Cowen shows why, for example, it doesn't work to pay your kids to do the dishes. Other kinds of incentives—like making sure family members know they will be admired if they respect you—can work. Another non-monetary incentive? Try having everyone stand up in your next meeting if you don't want anyone to drone on. Deeply felt incentives like pride in one's work or a passing smile from a loved one, can be the most powerful of all, even while they operate alongside more mundane rewards such as money and free food. *Discover Your Inner Economist* is an introduction to the science of economics that shows it to be built on notions that are already within all of us. While the implications of those ideas lead to Cowen's often counterintuitive advice, their wisdom is presented in ordinary examples taken from home life, work life, and even vacation life... How do you get a good guide in a Moroccan bazaar?

The First Estates Roger Nissim, 2020-01-10 *The First Estates* shows the impact on Hong Kong's urban history of Fairview Park and Hong Lok Yuen, the earliest examples of private estates provided in the New Territories of Hong Kong. Completed in the 1970s and 1980s, both are examples of land development projects built as low-density, American-style suburban house living, the first true alternative to the typical high-rise urban living of Hong Kong. In this book, Roger Nissim traces their evolution—from retreats for urban dwellers to family residences—that followed the expansion of Hong Kong's public transportation system. The book draws heavily on the original documents that are reproduced in the book. These unearthed documents detail land acquisition process and the negotiations with the government, financiers, local villagers, contractors, and new residents. Read together, this collection of key primary sources—concerning government approvals, site selection, planning and implementation, layout plan, and sales policy—provide the reader with an unparalleled vision of this unique period in the evolution of Hong Kong's urban development before the establishment of formal town planning. Nissim also re-examines the role of Clifford Wong, the visionary behind these projects. Exhaustive research and interviews with early residents who still live in the estates, early employees in the various relevant departments, and Wong's descendants complete this volume and enhance the understanding of Hong Kong's urban history. ‘This book records a unique period in Hong Kong's evolution in terms of urban development prior to the establishment of a formal town planning system. Given that much of this history has already been lost, the book therefore has considerable archival merit with regard to both estate projects and the man behind them, Clifford Wong.’ —Keith Mckinnell, founder and managing director of the Real Estate Academy ‘Roger Nissim is to be congratulated on producing this excellent review of two pioneering and groundbreaking projects in Hong Kong. This study underlines the realities of the market. This is well illustrated by the care with which Clifford Wong monitored the property cycle, and the considered manner and speed with which he made critical decisions regarding land premium and other risk-related issues.’ —Nicholas Brooke, former president of the Royal Institution of Chartered Surveyors

Rural Wealth Creation John L. Pender, Bruce A. Weber, Thomas G. Johnson, J. Matthew Fannin, 2014-06-05 This book investigates the role of wealth in achieving sustainable rural economic development. The authors define wealth as all assets net of liabilities that can contribute to well-being, and they provide examples of many forms of capital – physical, financial, human, natural, social, and others. They propose a conceptual framework for rural wealth creation that considers how multiple forms of wealth provide opportunities for rural development, and how development strategies affect the dynamics of wealth. They also provide a new accounting framework for measuring wealth stocks and flows. These conceptual frameworks are employed in case study chapters on measuring rural wealth and on rural wealth creation strategies. *Rural Wealth Creation* makes numerous contributions to research on sustainable rural development. Important distinctions are drawn to help guide wealth measurement, such as the difference between the wealth located within a region and the wealth owned by residents of a region, and privately owned versus publicly owned wealth. Case study chapters illustrate these distinctions and demonstrate how different forms of wealth can be measured. Several key hypotheses are proposed about the process of rural wealth creation, and these are investigated by case study chapters assessing common rural development strategies, such as promoting rural energy industries and amenity-based development. Based on these case studies, a typology of rural wealth creation strategies is proposed and an approach to mapping the potential of such strategies in different contexts is demonstrated. This book will be relevant to students, researchers, and policy makers looking at rural community development, sustainable economic development, and wealth measurement.
