The Last Lecture Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

EB00K: Developing Interactive Teaching and Learning using the IWB Sara Hennessy, Paul Warwick, 2013-10-16 Do your students tune out from the IWB? No matter how 'whizzy' you make the technology, do you have trouble engaging them? Would you like some ideas to support a more interactive approach to using the IWB, so that your students are more motivated and involved in your lessons? Interactive Whiteboards (IWBs) are now found in the majority of UK classrooms and many teachers are highly technically competent with this technology. Yet there is a need to develop expertise that capitalizes on such advanced technological equipment as an effective teaching and learning tool. The aim of this resource is to support a more interactive approach to using the IWB, especially in whole-class teaching. Research into classroom practices shows that more interactive approaches - in particular engaging pupils in dialogue and discussion - promote better learning. This resource offers practical support and examples that help develop teaching practices that are more productive for learning, focused around the use of the IWB. This teacher resource has three key elements: The Professional Development Resource takes you through discussion, reflection and practical activities that focus on dialogue and the use of the IWB The Reader explores key issues related to use of the IWB in primary and secondary classrooms, and directly supports the Professional Development Resource The Resource Bank offers video examples, sample classroom activities, explanatory screenshots, and IWB lesson templates, all available online Together with its website containing the resource bank, this text is an essential toolkit for trainee and qualified teachers, as well as senior leadership teams. I fully recommend this set of extremely useful material containing a strong classroom voice endorsed by authoritative academic researchers. Teachers will be drawn to this material, and will be able to review their own practice, reflect on the centrality of classroom spoken interactions, and investigate how best to use the expensive item of technology on the wall to get the very best from their investment. The blend of resources, ideas and readings coupled with the video clips will provide a wealth of material to do just that. It will prove very useful for teachers with any length of experience, from those who might want to take a fresh look at their classroom practice to those new to the profession. I will certainly draw from this in my CPD training with school staff. Sally Elding, Senior Adviser, Primary Elearning Team, The ICT Service, Cambridgeshire This book ensures that 'interactivity' in the classroom does not just mean the casual interaction of students with software. Instead, the authors show how to combine two very powerful tools - the IWB and talk - to create an effective and inclusive learning environment. Chapters draw on classroom settings to show how use of the IWB can be enhanced by a focus on the quality of the talk that goes on between students, and between teacher and learners. Authors use practical experience to highlight the things that make the difference to the use of the IWB - for example the establishment of exploratory dialogue, the thoughtful organisation of group work and the creation of straightforward but stimulating IWB resources. In addition the text provides clear guidance for teachers on how and why to raise student awareness of the importance of their discussion when making or considering digital artefacts. There is a strong focus on ensuring that both students and teachers understand best use of the IWB; and that contexts for learning are provided which really merit discussion. The Teacher Development section considers use of the IWB in a dialogic classroom - and shows how best practice can be achieved, with useful resources, and a format for reviewing own learning. The Reader section provides insight into the aspects of talk that fit together to generate a dialogic classroom context, and crucially shows how use of the IWB is both enhanced by dialogue and contributes to students' capacity to take part in learning dialogues with one another. The Resource Bank draws on a range of classroom contexts, providing examples to support teachers as they create their own lesson plans and ideas. The text is accessible and interesting, with complex ideas clearly explained, and the book is readily navigated. This book will enable teachers to plan for dialogue based on the motivating and interesting features of the IWB. In particular it provides guidance for student use of the IWB, and creation of own resources tailored to learning needs. Teachers who wish to have a focus on dialogue will find here a theoretically based, practical approach to ensuring that their students really benefit from interactivity, with the IWB and with each other. Dr Lyn Dawes, Educational Consultant This valuable resource provides both a theoretical framework and pedagogic guidance to use the interactive whiteboard to its full potential with learners of all ages. Written by established classroom practitioners and academic researchers, it provides a set of resources which are grounded in the reality of classroom life, but underpinned by academic rigour which make it useful to both student and experienced teachers alike. Dancing in the Light Marcia Behrenbruch,2012-11-04 Sustainability, globalization, the rapid growth of knowledge and the need for internationally minded citizens require a rethinking of education. Concept based inquiry learning has been offered for over a century as an alternative to traditional education centered on textbooks, invasive standardized testing and control external to the student. Yet the widespread change in teaching styles required to shift education to meet 21st century requirements has been sporadic at best. This book tells several stories. The first is a teacher's journey to discover a different way of teaching and learning. The second is a summary of the theory used to explain and justify the change in pedagogy to the wider school community. The third are stories from student and teachers who practice inquiry learning. The result is a description of 6 essential elements for a successful inquiry learning environment. Although this research was conducted at a single school, it offers important insights for other schools who are considering change to a more constructivist, sustainable approach to education. Marcia Behrenbruch has taught at all levels of schooling from the early years to year 12. She has lived and worked in Canada, the Netherlands, Australia, Vietnam and Singapore. Most of her 15 years in school administration focused on curriculum innovation and facilitating change. She completed her doctoral studies at Melbourne Graduate School of Education and is currently a global head of professional development for an international not-for-profit educational organization.

Writing and Power Candace Mitchell,2015-12-03 This book offers a much needed alternative to the more traditional texts used to teach writing instruction. Grounded in history, the book clarifies changing theoretical and practical approaches to teaching writing, critically assessing each approach in relation to the social and

political movements of the day, both within and beyond the university. The author takes us inside the real world of writing instruction; not only from the viewpoint of instructor, but as seen through the eyes of students struggling to make sense of the expectations of writing class. Mitchell emphasizes that writing entails far more than putting words to paper, and delves into contextually variable culturally defined expectations, that include multiple linguistic forms - both oral and written - highlighting the complexity of writing(s), while engaging the reader in lively academic debates about language and society.

Theories of Learning and Studies of Instructional Practice Timothy Koschmann,2011-04-19 This is a book about an attempt to change the way math was taught in a particular classroom. Its title plays on our everyday usage of the terms theory and practice. In education, these terms are conventionally treated oppositionally—we have theories about what we should do and we have what teachers actually do do. In this way, theory stands prior, logically and chronologically, to practice; practice inevitably becoming theory’s imperfect realization. We seek in this volume, however, to develop a different stance with regard to the relationship between the two. Taking the details of instructional practice as our principle object of study, we explore what role theories of learning might play in illuminating such practices. The book is about actual practices by which teaching is done and how contemporary theories of learning might help us understand those practices. It seeks to provide a foundation for future practice-based inquiry in education, by addressing the methodological question: How do we go about studying instructional practice in a principled way?
