Apps for Librarians Nicole Hennig, 2014-09-24 How can your library—and your patrons—benefit from mobile apps? This guidebook offers a solid foundation in app-literacy, supplying librarians with the knowledge to review and recommend apps, offer workshops, and become the app expert for their communities. Smartphones and other mobile devices that support downloadable applications—universally referred to as apps—can be used to foster productivity, conduct research, or read and study. Additionally, savvy librarians can better serve their communities by gaining expertise in mobile technologies and being qualified to make app recommendations to patrons. This book introduces you to the apps that can help you save time and increase your own productivity as well as serve as a curator and reviewer of apps and resident expert to benefit your patrons. *Apps for Librarians: Using the Best Mobile Technology to Educate, Create, and Engage* will save you from wading through and learning about the millions of apps available today and direct you to the very best apps in areas important to education, the workplace, and professional development. Organized by function—reading, writing, reference, multi-media, and productivity—apps are profiled with the following information: title, developer, price, platforms, general description, examples of use, and key features that make it worthwhile for learning and creative work.

Voice over IP Security Angelos D. Keromytis, 2011-03-30 Voice over IP (VoIP) and Internet Multimedia Subsystem technologies (IMS) are rapidly being adopted by consumers, enterprises, governments and militaries. These technologies offer higher flexibility and more features than traditional telephony (PSTN) infrastructures, as well as the potential for lower cost through equipment consolidation and, for the consumer market, new business models. However, VoIP systems also represent a higher complexity in terms of architecture, protocols and implementation, with a corresponding increase in the potential for misuse. In this book, the authors examine the current state of affairs on VoIP security through a survey of 221 known/disclosed security vulnerabilities in bug-tracking databases. We complement this with a comprehensive survey of the state of the art in VoIP security research that covers 245 papers. Juxtaposing our findings, we identify current areas of risk and deficiencies in research focus. This book should serve as a starting point for understanding the threats and risks in a rapidly evolving set of technologies that are seeing increasing deployment and use. An additional goal is to gain a better understanding of the security landscape with respect to VoIP toward directing future research in this and other similar emerging technologies.

iPhone: The Missing Manual David Pogue, 2013-10-28 Overview: Answers found here! In iOS 7, Apple gave the iPhone the most radical makeover in its history. The new software is powerful, sleek, and a perfect companion to the iPhone 5s and 5c - but it's wildly different. Fortunately, David Pogue is back with an expanded edition of his witty, full-color guide: the world's most popular iPhone book. The important stuff you need to know: The iPhone 5s. This book unearths all the secrets of the newest iPhone - faster chip, dual-color flash, fingerprint scanner, and more - and its colorful companion, the 5c. The iOS 7 software. Older iPhones gain Control Center, AirDrop, iTunes Radio, free Internet phone calls, and about 197 more new features. This book covers it all. The apps. That catalog of 1,000,000 add-on programs makes the iPhone's phone features almost secondary. Now you'll know how to find, manage, and exploit those apps. The iPhone may be the world's coolest computer, but it's still a computer, with all of a computer's complexities. iPhone: The Missing Manual is a funny, gorgeously illustrated guide to the tips, shortcuts, and workarounds that will turn you, too, into an iPhone addict.

Towards Cyberpsychology Giuseppe Riva (Ph.D.), Carlo Galimberti, 2001 Drawing on research in the social sciences, communications, and other fields, this book wants to analyze how the online environment is influencing the experience of psychology. However, understanding how the Internet is changing our everyday experience presents a substantial challenge for the psychologists. Now, research in this area is still sparse and limited in both

the number and scope of studies: actual research, especially studies with strict methodologies, is only just beginning. The contributions in this book are among the first scientific attempts to take a serious look at various aspects of Internet-related psychology. However, we need not start from scratch. Psychology has a broad knowledge about the factors that affect human behaviour in other setting. So, the papers collected for this book are descriptive and practical-oriented in nature.

From Light into the Abyss Jim Jacobs,2016-02-29 We've ushered in a new era of the outlaw duo Bonnie and Clyde. There are no pistols or shotguns visible, no banks involved, and few if any wanted posters displayed in your local Post Office. The weapon of choice has become the keyboard and laptop computer. It has become a merging bacteria spreading like wildfire perilously and dangerously close to imploding on God's moral laws and His judgment upon this Nation. Call it scams, live sex cams, or our youth behaving badly, its tentacles reach all socioeconomic households in this country. Adding to this mix of immorality we have prostitution, illegal drug smuggling and its use, human slave trafficking, domestic abuse, abortion, same sex marriage, political chicanery, etc. You've just created a cocktail of criminal behavior as in the days of Sodom and Gomorrah. The question then arises out of this storm of immorality is not if; but when God will exact His wrath upon this Nation.

The New Digital Shoreline Roger McHaney,2023-07-03 Two seismic forces beyond our control – the advent of Web 2.0 and the inexorable influx of

tech-savvy Millennials on campus – are shaping what Roger McHaney calls “The New Digital Shoreline” of higher education. Failure to chart its contours, and adapt, poses a major threat to higher education as we know it. These forces demand that we as educators reconsider the learning theories, pedagogies, and practices on which we have depended, and modify our interactions with students and peers—all without sacrificing good teaching, or lowering standards, to improve student outcomes. Achieving these goals requires understanding how the indigenous population of this new shoreline is different. These students aren’t necessarily smarter or technologically superior, but they do have different expectations. Their approaches to learning are shaped by social networking and other forms of convenient, computer-enabled and mobile communication devices; by instant access to an over-abundance of information; by technologies that have conferred the ability to personalize and customize their world to a degree never seen before; and by time-shifting and time-slicing. As well as understanding students’ assumptions and expectations, we have no option but to familiarize ourselves with the characteristics and applications of Web 2.0—essentially a new mind set about how to use Internet technologies around the concepts of social computing, social media, content sharing, filtering, and user experience. Roger McHaney not only deftly analyzes how Web 2.0 is shaping the attitudes and motivations of today’s students, but guides us through the topography of existing and emerging digital media, environments, applications, platforms and devices – not least the impact of e-readers and tablets on the future of the textbook – and the potential they have for disrupting teacher-student relationships; and, if appropriately used, for engaging students in their learning. This book argues for nothing less than a reinvention of higher education to meet these new realities. Just adding technology to our teaching practices will not suffice. McHaney calls for a complete rethinking of our practice of teaching to meet the needs of this emerging world and envisioning ourselves as connected, co-learners with our students.
