Sustainable Manufacturing Günther Seliger,2012-06-30 The annual series Global Conferences on Sustainable Manufacturing (GCSM) sponsored by the International Academy for Production Engineering (CIRP) is committed to excellence in the creation of sustainable products and processes that conserve energy and natural resources, have minimal negative impacts upon the natural environment and society, and adhere to the core principle of sustainability by considering the needs of the present without compromising the ability of future generations to meet their own needs. To promote this noble goal, there is a great need for increased awareness in education and training, including the dissemination of new findings on principles and practices of sustainability applied to manufacturing. The series Global Conferences on Sustainable Manufacturing offers international colleagues the opportunity to network, expand their knowledge, and improve practice globally.

Encyclopedia of E-Commerce Development, Implementation, and Management Lee, In,2016-03-31 The convenience of online shopping has driven consumers to turn to the internet to purchase everything from clothing to housewares and even groceries. Multilingual Digital Marketing Maria Johnsen,2016-06-24 Discover the Secrets of Multilingual Digital Marketing in Europe and North America: Unveiling Lucrative Strategies for Market Leadership Are you ready to unlock the secrets of multilingual digital marketing and become the market leader in your industry? In this book, I delve into the burning questions that many businesses face when entering new markets. I explore why some businesses fail while others succeed and provide realistic steps to help you avoid losing money in the online business landscape. With my guidance, you will learn how to position your business for success in other countries, identifying the key areas that need improvement to maximize your return on investment (ROI). I emphasize the significance of customer service and sales departments within your organization, showcasing their impact on your company's share wallet. Furthermore, I shed light on the correlation between two crucial components in multilingual digital marketing: technical and marketing aspects. By understanding their relationship and optimizing their impact on sales, you can gain a competitive edge in the global marketplace. I also address the challenge of saving on your annual budget for human resources, offering strategies to optimize your hiring process and ensure you have the right experts in the right positions. Additionally, I reveal secret components that successful market leaders have utilized to reach the top. This book provides a comprehensive overview of both technical and marketing aspects of online sales, offering practical suggestions for offline marketing and

sales as well. By exploring the hidden strategies and tactics employed by successful companies, you can pave your own path to market leadership. Get ready to uncover the truth and unleash your business's potential with the invaluable insights within this book.

Advanced Technologies for Sustainable Development of Urban Green Infrastructure Viacheslav Vasenev,Elvira Dovletyarova,Riccardo Valentini,Zhongqi Cheng,Carlo Calfapietra,Luis Inostroza,Michael Leuchner,2021-05-10 This proceedings book focuses on advanced technologies to monitor and model urban soils, vegetation and climate, including internet of things, remote sensing, express and non-destructive techniques. The Smart and Sustainable Cities (SSC) conference is a regular event, organized each second year in RUDN University (Russia) and providing a multidisciplinary platform for scientists and practitioners in urban environmental monitoring, modeling, planning and management.

Digital Transformation and Global Society Daniel A. Alexandrov,Alexander V. Boukhanovsky,Andrei V. Chugunov,Yury Kabanov,Olessia Koltsova,2018-11-09 This two volume set (CCIS 858 and CCIS 859) constitutes the refereed proceedings of the Third International Conference on Digital Transformation and Global Society, DTGS 2018, held in St. Petersburg, Russia, in May/June 2018. The 75 revised full papers and the one short paper presented in the two volumes were carefully reviewed and selected from 222 submissions. The papers are organized in topical sections on e-polity: smart governance and e-participation, politics and activism in the cyberspace, law and regulation; e-city: smart cities and urban planning; e-economy: IT and new markets; e-society: social informatics, digital divides; e-communication: discussions and perceptions on the social

media; e-humanities: arts and culture; International Workshop on Internet Psychology; International Workshop on Computational Linguistics.

Networks and Systems in Cybernetics Radek Silhavy,Petr Silhavy,2023-07-14 The Networks and Systems in Cybernetics section continues to be a highly relevant and rapidly evolving area of research, encompassing modern advancements in informatics and cybernetics within network and system contexts. This field is at the forefront of developing cutting-edge technologies that can tackle complex challenges and improve various aspects of our lives. The latest research in this field is featured in this book, which provides a comprehensive overview of recent methods, algorithms, and designs. The book comprises the refereed proceedings of the Cybernetics Perspectives in Systems session of the 12th Computer Science Online Conference 2023 (CSOC 2023), which was held online in April 2023. The book offers a unique opportunity to explore the latest advances in cybernetics and informatics and their applications in a range of domains. It brings together experts from various disciplines to share their insights and collaborate on research that can shape the future of our world. One of the key themes of this section is the application of cybernetics in intelligent systems. This area has significant potential to revolutionize a range of industries. Researchers are exploring how cybernetic principles can be used to create intelligent systems that can learn, adapt, and optimize their performance over time.

Digital Witness Sam Dubberley,Alexa Koenig,Daragh Murray,2020 This book covers the developing field of open source research and discusses how to use social media, satellite imagery, big data analytics, and user-generated content to strengthen human rights research and investigations. The topics are presented in an accessible format

through extensive use of images and data visualization (éditeur).

Urban Informatics Wenzhong Shi,Michael F. Goodchild,Michael Batty,Mei-Po Kwan,Anshu Zhang,2021-04-06 This open access book is the first to systematically introduce the principles of urban informatics and its application to every aspect of the city that involves its functioning, control, management, and future planning. It introduces new models and tools being developed to understand and implement these technologies that enable cities to function more efficiently – to become 'smart' and 'sustainable'. The smart city has quickly emerged as computers have become ever smaller to the point where they can be embedded into the very fabric of the city, as well as being central to new ways in which the population can communicate and act. When cities are wired in this way, they have the potential to become sentient and responsive, generating massive streams of 'big' data in real time as well as providing immense opportunities for extracting new forms of urban data through crowdsourcing. This book offers a comprehensive review of the methods that form the core of urban informatics from various kinds of urban remote sensing to new approaches to machine learning and statistical modelling. It provides a detailed technical introduction to the wide array of tools information scientists need to develop the key urban analytics that are fundamental to learning about the smart city, and it outlines ways in which these tools can be used to inform design and policy so that cities can become more efficient with a greater concern for environment and equity.

Great Power Politics in the Fourth Industrial Revolution Glenn Diesen,2021-03-25 Why and how will the fourth industrial revolution impact great power politics? Here, Glenn Diesen utilizes a neoclassical approach to great power politics to assess how far the

development of AI, national and localized technological ecosystems and cyber-warfare will affect great power politics in the next century. The reliance of modern economies on technological advances, Diesen argues, also compels states to intervene radically in economics and the lives of citizens, as automation radically alters the economies of tomorrow. A groundbreaking attempt to contextualize the fourth industrial revolution, and analyse its effects on politics and international relations.

Cases on Modern Computer Systems in Aviation Shmelova, Tetiana,Sikirda, Yuliya,Rizun, Nina,Kucherov, Dmytro,2019-02-19 Because trainees need to learn about the underlying technologies to use automation safely and efficiently, the development of automated aviation systems training is a growing challenge. Task analysis has been singled out as the basis of the training, but it can be more time-consuming than traditional development techniques. Cases on Modern Computer Systems in Aviation is an essential reference source that covers new information technology use in aviation systems to streamline the cybersecurity, decision-making, planning, and design processes within the aviation industry. Featuring coverage on a broad range of topics such as computer systems in aviation, artificial intelligence, software-defined networking (SDN), air navigation systems, decision support systems (DSS), and more, this publication is ideally designed for aviation specialists and industry professionals, technicians, practitioners, researchers, and academicians seeking current research on modern modeling approaches to streamline management in aviation.

The Future of Search Engines Maria Johnsen,2024-02-11 In The Future of Search Engines, I continue the investigation I began in my previous work, The Search Engine Revolution, providing a detailed forecast of what lies ahead. In this book, I explore how search engines will evolve in the future, drawing on my track record of predicting technological advancements. My predictions are not just guesses; they're based on current trends and supported by real-world evidence that has consistently proven accurate. For example, I warned last year about the risks of relying too heavily on AI-generated content for SEO and digital marketing, a caution that has been validated by subsequent updates to Google's algorithms favoring human-generated content. Picture a fleet of sleek, voice-controlled search drones elegantly maneuvering through the physical world, ready to quickly gather information and respond to user queries with remarkable efficiency. This isn't just a fantasy; it's a compelling vision of where search technology is headed. These search drones represent a significant shift, seamlessly connecting the digital world with physical reality. Imagine strolling through a bustling city, curious about the history of a famous landmark. With a simple voice command, a nearby drone swoops in, providing a wealth of information instantly. From historical facts to real-time updates, these drones

redefine how we access information about our surroundings, essentially turning the world into a readily available database of knowledge. It's important to note that by drones, I mean smaller, drone-like devices, not the larger drones commonly used today. But why limit our search endeavors to Earth? The future of exploration reaches far beyond our planet. There's speculation about search networks expanding into space, allowing us to explore the mysteries of distant galaxies. As humanity's desire for discovery drives us toward the stars, these networks have the potential to unravel the universe's secrets. Imagine a future where communication with extraterrestrial beings is possible, enabling the exchange of knowledge across vast cosmic distances. I delve into this concept further in my books The Cosmos and Searching for Aliens on Earth and in the Cosmos. While some contemporary scientists may argue for humanity's uniqueness in the universe, the future could offer a different perspective. Remember how Galileo's support for the heliocentric model challenged the prevailing belief in a geocentric universe, leading to his condemnation by the Inquisition. It serves as a reminder that anything is possible. This exciting prospect sparks our imagination and fuels our unending quest for knowledge. At the core of these visionary concepts lies an unwavering commitment to progress. Technological advancements continue to dazzle, offering increasingly sophisticated tools for information retrieval. From AI-powered computing to advanced data analysis, our arsenal of search capabilities has never been more potent. Yet, perhaps the most remarkable aspect of this technological revolution is its inherent simplicity. Gone are the days of cumbersome search engines and endless scrolling; searching becomes intuitive and seamless, seamlessly woven into the fabric of our daily lives. Looking forward, one

thing remains abundantly clear: the boundless potential of search technology knows no bounds. It's a journey fueled by innovation, curiosity, and an unwavering determination to unearth answers. So, as we venture forth into uncharted territory, let's embrace the notion that this is just the beginning. With each groundbreaking idea and monumental stride, we edge closer to a future where finding answers is as effortless as posing a question. I hope you enjoy reading this book.

    Open Source Intelligence Methods and Tools Nihad A. Hassan,Rami Hijazi,2018-06-30 Apply Open Source Intelligence (OSINT) techniques, methods, and tools to acquire information from publicly available online sources to support your intelligence analysis. Use the harvested data in different scenarios such as financial, crime, and terrorism investigations as well as performing business competition analysis and acquiring intelligence about individuals and other entities. This book will also improve your skills to acquire information online from both the regular Internet as well as the hidden web through its two sub-layers: the deep web and the dark web. The author includes many OSINT resources that can be used by intelligence agencies as well as by enterprises to monitor trends on a global level, identify risks, and gather competitor intelligence so more effective decisions can be made. You will discover techniques, methods, and tools that are equally used by hackers and penetration testers to gather intelligence about a specific target online. And you will be aware of how OSINT resources can be used in conducting social engineering attacks. Open Source Intelligence Methods and Tools takes a practical approach and lists hundreds of OSINT resources that can be used to gather intelligence from online public sources. The book also covers how to anonymize your digital identity

online so you can conduct your searching activities without revealing your identity. What You'll Learn Identify intelligence needs and leverage a broad range of tools and sources to improve data collection, analysis, and decision making in your organization Use OSINT resources to protect individuals and enterprises by discovering data that is online, exposed, and sensitive and hide the data before it is revealed by outside attackers Gather corporate intelligence about business competitors and predict future market directions Conduct advanced searches to gather intelligence from social media sites such as Facebook and Twitter Understand the different layers that make up the Internet and how to search within the invisible web which contains both the deep and the dark webs Who This Book Is For Penetration testers, digital forensics investigators, intelligence services, military, law enforcement, UN agencies, and for-profit/non-profit enterprises

Universal Access in Human-Computer Interaction: Universal Access to Information and Knowledge Constantine Stephanidis,Margherita Antona,2014-05-15 The four-volume set LNCS 8513-8516 constitutes the refereed proceedings of the 8th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2014, held as part of the 16th International Conference on Human-Computer Interaction, HCII 2014, held in Heraklion, Crete, Greece in June 2014, jointly with 14 other thematically similar conferences. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences was carefully reviewed and selected from 4766 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 251 contributions included in the UAHCI proceedings were carefully reviewed and selected for inclusion in this four-volume set. The 65 papers included in this volume are organized in the following topical sections: access to mobile interaction; access to text, documents and media; access to education and learning; access to games and ludic engagement and access to culture.

Technologies in a Multilingual Environment Daria Bylieva,Alfred Nordmann,2023-02-18 The book addresses the challenge of living in a multilingual world from three perspectives: socio-linguistics and the study of multilingualism in contrast, philosophy of technology with its emphasis on the world as a technosphere—how it is

made, how it is experienced, and how it can be managed, and then pedagogy and the question of teaching and learning to competently negotiate multilingual environments. In today's multicultural and multilingual world, technologies provide a common ground. The story of the technosphere as a multilingual environment offers new perspective, namely that of learning to cooperate and coordinate.
