Business, Ethics and Institutions Asli M. Colpan,Geoffrey Jones,2019-09-18 This book is the first systematic scholarly study on the business history of Turkey from the nineteenth century until the present. It aims to place the distinctive characteristics of capitalism in Turkey within a global and comparative perspective, dealing with three related issues. First, it examines the institutional context that shaped the capitalist development in Turkey. Second, it focuses on the corporate actors, entrepreneurs and business enterprises that have led the national economic growth. Third, it explores the ethical foundations and social responsibility of business enterprises in the country. The comparative and historical approach sets the volume apart from previous books on the subject. Business, Ethics and Institutions aims to strengthen scholarly and policy understanding of Turkish capitalism and the diversified business groups which dominate the economy by providing a deep analysis of the evolution of political and social institutions which shaped corporate activity. It demonstrates the key role played by large family-owned business groups in Turkey's development. It also seeks to identify both the similarities and the differences in the Turkish pattern of economic development, making comparisons with Japan, an early example of catch-up, and a more successful model than Turkey. The comparative perspective makes the book highly relevant to a wide range of scholars interested in the institutional foundations of

modern capitalism and will be of value to researchers, academics, and students in the fields of business and economic history, ethics, organizational studies, and entrepreneurship.

Corporate social responsibility, ethics and sustainable prosperity
Boubaker Sabri, Nguyen Duc Khuong, 2019-06-06 Corporate activities are not only drivers of economic growth but also key actors of the changes towards more sustainable markets and environment as well as inclusive development. Significant efforts have recently been devoted to transform private and public firms alike from pure economic-oriented organizations to entities that deliberately and diligently create value without neglecting social and environmental implications of their activities. Firm performance, resilience, and survival are nowadays, more than ever before, dependent on how they consciously and purposefully engage in appropriate corporate social responsibility (CSR) strategies and actions. This book, *Corporate Social Responsibility, Ethics and Sustainable Prosperity*, will provide all readers, including investors, managers, lawmakers, and policymakers with an up-to-date, comprehensive, and thoughtful coverage of CSR and ethical issues at the crossroads of different finance and management disciplines. It contains a rich collection of insightful studies covering a wide range of topics in corporate ethics, CSR, and sustainable prosperity. Together, these studies help readers deepen their knowledge on different country environments and various organizational forms, policies, and activities. The book is composed of 16 chapters which are divided into two interconnected parts: Part I addresses ESG and ethical issues in corporate decision-making, while Part II provides insights towards sustainable prosperity.

Enhancing Sustainability Through Non-Financial Reporting
Monteiro, Albertina, Borges, Ana Pinto, Vieira, Elvira, 2023-10-16 The

lack of transparency and accountability in organizations has made it difficult to identify, measure, and disclose their sustainable practices and impacts, creating a challenge for global sustainability efforts. Furthermore, there is a lack of consensus on the determinants and impacts of non-financial information reporting. In response to these challenges, *Enhancing Sustainability Through Non-Financial Reporting*, a book edited by Albertina Monteiro, Ana Pinto Borges, and Elvira Vieira, offers a comprehensive analysis of the relationship between sustainability practices and reporting, and the accounting, finance, and management fields. This book provides a platform for both academics and practitioners to share their empirical and theoretical research on the contributions of organizations to sustainable development, the determinants and impacts of non-financial information reporting, the role of sustainability reporting standards, and the challenges faced by accounting, finance, management, and auditing. It is an essential resource for anyone seeking to enhance sustainability through non-financial reporting and is relevant to a wide range of audiences, including academics, practitioners, and other interested individuals and groups.

Privatization in Turkey Ahmet Zaifer,2022-06-27 In Privatization in Turkey: Power Bloc, Capital Accumulation and State, Ahmet Zaifer offers a rare look on privatization in Turkey that involves all three historical periods of Turkish privatization process -1980s and 1990s, 2000s, and 2010s- and covers different forms of privatization from divestiture to public-private partnership. Benefiting from theoretically informed qualitative research spanning nearly a decade that has involved several interviews with key informant groups, extensive review of newspaper articles and detailed analysis of annual reports of businesses, Ahmet Zaifer convincingly proves that the acceleration of privatization in Turkey has not only provided advantages to so-called favourable capital groups and the government elites, but also consolidated the position of Capital in General at the expense of labouring-popular classes and the natural environment of the entire country.
