**Panglor** Jeffrey A. Carver, 2014-11-11 Blackmailed! Wrongly discredited as a space pilot, Panglor Balef is doomed to die in space, if sheer luck doesn't bring him through. But luck has never been in Panglor's cards. Bad enough to be coerced into a mission of murder and suicide, he must also contend with Alo—a young woman, stowaway, and impossible companion. Neither of them, nor his empathic ou-ralot, could possibly anticipate the journey through space-time they are about to embark on, through a door to an insane reality from which there is almost certainly no return. It could be the discovery of the millennium, but the only way home is to journey even further into the heart of madness. The stunning prequel to the famed Star Rigger Universe of Jeffrey A. Carver, Nebula-nominated author of Eternity's End and The Chaos Chronicles. REVIEWS: "An original and very charming novel, with a particularly unusual protagonist." —Publishers Weekly "Panglor is an interesting and different novel... a fun read." —Future Life REVIEWS OF OTHER WORKS BY JEFFREY A. CARVER: "Masterfully captures the joy of exploration." —Publishers Weekly "Jeffrey Carver imagines wonders and allows us to share his vision." —Terry Carr, editor of Universe and numerous "Best of the Year" anthologies "What is evident in Carver's work is a wonderful ability to deal sensitively with the interrelationships of characters and their environments." —Galileo Magazine "Carver writes powerfully and clearly and

has produced a book that is likely to find an audience among hard SF readers.” –Booklist “Carver is a strong SF writer, with a good feel for both the hard SF elements and the people he populates them with.” –Amazing Stories

Teddy Tucker, clad in a pair of linen working trunks and a ragged, sleeveless shirt, both garments much the worse for their winter's wear, was lazily swinging a pair of Indian clubs. What is it, some kind of riddle, Phil? he questioned, bringing the clubs down to his sides. Do be serious for a minute, won't you? Me, serious? Why, I never cracked a smile. Isn't anything to smile at. Besides, do you know, since I've been in the circus business, every time I want to laugh I check myself so suddenly that it hurts?

*I'm the Villainess, So I'm Taming the Final Boss, Vol. 5 (light novel)*

Sarasa Nagase, 2023-04-18 Everything that could possibly go wrong does when a man claiming to be the first demon king and Claude's father appears without warning and promptly demands that he divorce Aileen. What's worse is that Aileen's alleged father-in-law, Luciel, is the one and only hero/final boss of the fourth installment of her favorite otome game series! The strange

thing is that, even though the fourth game takes place several hundred years before the others, oddly similar events have begun occurring, so no one knows what could happen next!

**Multiple Approaches to Intelligent Systems** Ibrahim F. Imam, Yves Kodratoff, Ayman El-Dessouki, Moonis Ali, 2004-05-19 We never create anything, We discover and reproduce. The Twelfth International Conference on Industrial and Engineering Applications of Artificial Intelligence and Expert Systems has a distinguished theme. It is concerned with bridging the gap between the academic and the industrial worlds of Artificial Intelligence (AI) and Expert Systems. The academic world is mainly concerned with discovering new algorithms, approaches, and methodologies; however, the industrial world is mainly driven by profits, and concerned with producing new products or solving customers’ problems. Ten years ago, the artificial intelligence research gap between academia and industry was very broad. Recently, this gap has been narrowed by the emergence of new fields and new joint research strategies in academia. Among the new fields which contributed to the

academic-industrial convergence are knowledge representation, machine learning, searching, reasoning, distributed AI, neural networks, data mining, intelligent agents, robotics, pattern recognition, vision, applications of expert systems, and others. It is worth noting that the end results of research in these fields are usually products rather than empirical analyses and theoretical proofs. Applications of such technologies have found great success in many domains including fraud detection, internet service, banking, credit risk and assessment, telecommunication, etc. Progress in these areas has encouraged the leading corporations to institute research funding programs for academic institutes. Others have their own research laboratories, some of which produce state of the art research.

**Dynamic Stabilisation of the Biped Lucy Powered by Actuators with Controllable Stiffness** Bram Vanderborght,2010-10-04 This book reports on the developments of the bipedal walking robot Lucy. Special about it is that the biped is not actuated with the classical electrical drives but with pleated pneumatic artificial muscles. In an antagonistic setup of such muscles both the torque and the compliance are controllable. From human walking there is evidence that joint compliance plays an important role in energy efficient walking and running. Moreover pneumatic artificial muscles have a high power to weight ratio and can be coupled directly without complex gearing mechanism, which can be beneficial towards legged mechanisms. Additionally, they have the capability of absorbing impact shocks and store and release motion energy. This book gives a complete description of Lucy: the hardware, the electronics and the software. A hybrid simulation program, combining the robot dynamics and muscle/valve thermodynamics, has been written to evaluate control strategies before implementing them in the real biped.
