TCP/IP Tutorial and Technical Overview Lydia Parziale,Dr. Wei Liu,Carolyn Matthews,Nicolas Rosselot,Chuck Davis,Jason Forrester,David T. Britt,IBM Redbooks,2006-12-19 The TCP/IP protocol suite has become the de facto standard for computer communications in today's networked world. The ubiquitous implementation of a specific networking standard has led to an incredible dependence on the applications enabled by it. Today, we use the TCP/IP protocols and the Internet not only for entertainment and information, but to conduct our business by performing transactions, buying and selling products, and delivering services to customers. We are continually extending the set of applications that leverage TCP/IP, thereby driving the need for further infrastructure support. It is our hope that both the novice and the expert will find useful information in this publication.

Internet of Things and Its Applications Keshav Dahal,Debasis Giri,Sarmistha Neogy,Subrata Dutta,Sanjay Kumar,2022-02-18 This volume constitutes selected papers presented at the International Conference on IoT and its Applications 2020. The research papers presented were carefully reviewed and selected from several initial submissions on the topics - the Internet of Things (IoT) and its applications such as smart cities, smart devices, agriculture, transportation and logistics, healthcare, etc. The book contains peer-reviewed chapters written by leading international scholars from around the world. This book will appeal to students, practitioners, industry professionals, and researchers working in the field of IoT and its integration with other technologies to develop comprehensive solutions to real-life problems.

A Man in Full Tom Wolfe,2010-04-01 The Bonfire of the Vanities defined an era--and established Tom Wolfe as our prime fictional chronicler of America at its most outrageous and alive. With A Man in Full, the time the setting is Atlanta, Georgia--a racially mixed late-century boomtown full of fresh wealth, avid speculators, and worldly-wise politicians. Big men. Big money. Big games. Big libidos. Big trouble. The protagonist is Charles Croker, once a college football star, now a late-middle-aged Atlanta real-estate entrepreneur turned conglomerate king, whose expansionist ambitions and

outsized ego have at last hit up against reality. Charlie has a 28,000-acre quail-shooting plantation, a young and demanding second wife--and a half-empty office tower with a staggering load of debt. When star running back Fareek Fanon--the pride of one of Atlanta's grimmest slums--is accused of raping an Atlanta blueblood's daughter, the city's delicate racial balance is shattered overnight. Networks of illegal Asian immigrants crisscrossing the continent, daily life behind bars, shady real-estate syndicates, cast-off first wives of the corporate elite, the racially charged politics of college sports--Wolfe shows us the disparate worlds of contemporary America with all the verve, wit, and insight that have made him our most phenomenal, most admired contemporary novelist. *A Man in Full* is a 1998 National Book Award Finalist for Fiction.

Generative Social Science Joshua M. Epstein, 2012-01-02 Agent-based computational modeling is changing the face of social science. In *Generative Social Science*, Joshua Epstein argues that this powerful, novel technique permits the social sciences to meet a fundamentally new standard of explanation, in which one grows the phenomenon of interest in an artificial society of interacting agents: heterogeneous, boundedly rational actors, represented as mathematical or software objects. After elaborating this notion of generative explanation in a pair of overarching foundational chapters, Epstein illustrates it with examples chosen from such far-flung fields as archaeology, civil conflict, the evolution of norms, epidemiology, retirement economics, spatial games, and organizational adaptation. In elegant chapter preludes, he explains how these widely diverse modeling studies support his sweeping case for generative explanation. This book represents a powerful consolidation of Epstein's interdisciplinary research activities in the decade since the publication of his and Robert Axtell's landmark volume, *Growing Artificial Societies*. Beautifully illustrated, *Generative Social Science* includes a CD that contains animated movies of core model runs, and programs allowing users to easily change assumptions and explore models, making it an invaluable text for courses in modeling at all levels.

Internetworking Technologies Handbook Merilee Ford, 1997 This comprehensive guide details available internetworking alternatives. It provides the reader with the most current technologies for WANS and teaches how to effectively implement these technologies on a network.

Growing Artificial Societies Joshua M. Epstein, Robert Axtell, 1996-10-11 *Growing Artificial Societies* is a milestone in social science research. It vividly demonstrates the potential of agent-based computer simulation to break disciplinary boundaries. It does this by analyzing in a unified framework the dynamic interactions of such diverse activities as trade, combat, mating, culture, and disease. It is an impressive achievement. -- Robert Axelrod, University of Michigan How do social structures and group behaviors arise from the interaction of individuals? *Growing Artificial Societies* approaches this question with cutting-edge computer simulation techniques. Fundamental collective behaviors such as group formation, cultural transmission, combat, and trade are seen to emerge from the interaction of individual agents following a few simple rules. In their program, named *Sugarscape*, Epstein and Axtell begin the development of a bottom up social science that is capturing the attention of researchers and commentators alike. The study is part of the 2050 Project, a joint venture of the Santa Fe Institute, the World Resources Institute, and the Brookings Institution. The project is an international effort to identify conditions for a sustainable global system in the next century and to design policies to help achieve such a system. *Growing Artificial Societies* is also available on CD-ROM, which includes about 50 animations that develop the scenarios described in the text. Copublished with the Brookings Institution

Subject-Oriented Business Process Management Albert Fleischmann, Werner Schmidt, Christian Stary, Stefan Obermeier, Egon Börger, 2012-10-31 Activities performed in organizations are coordinated via communication between the people involved. The sentences used to communicate are naturally structured by subject, verb, and object. The subject describes the actor, the verb the action and the object what is affected by the action. Subject-oriented Business Process Management (S-BPM) as presented in this book is based on this simple structure which enables process-oriented

thinking and process modeling. S-BPM puts the subject of a process at the center of attention and thus deals with business processes and their organizational environment from a new perspective, meeting organizational requirements in a much better way than traditional approaches. Subjects represent agents of an action in a process, which can be either technical or human (e.g. a thread in an IT system or a clerk). A process structures the actions of each subject and coordinates the required communication among the subjects. S-BPM provides a coherent procedural framework to model and analyze business processes: its focus is the cooperation of all stakeholders involved in the strategic, tactical, and operational issues, sharing their knowledge in a networked structure. The authors illustrate how each modeling activity through the whole development lifecycle can be supported through the use of appropriate software tools. The presentation style focuses on professionals in industry, and on students specializing in process management or organizational modeling. Each chapter begins with a summary of key findings and is full of examples, hints, and possible pitfalls. An interpreter model, a toolbox, and a glossary summarizing the main terms complete the book. The web site www.i2pm.net provides additional software tools and further material.

Local Government Management: Current Issues and Best Practices Douglas J. Watson, Wendy L. Hassett, 2016-04-15 Some of the very best writings on issues involving local government can be found in journals published by the American Society for Public Administration or journals with which ASPA is associated. This volume includes thirty of the most outstanding articles that have been published over the past sixty years in these journals. Local Government Management is an ideal supplement for any course in local management and administration, whether the audience is students or practicing professionals.

Internet of Things and Its Applications Sachi Nandan Mohanty, Jyotir Moy Chatterjee, Suneeta Satpathy, 2021-11-25 This book offers a holistic approach to the Internet of Things (IoT) model, covering both the technologies and their applications, focusing on uniquely identifiable objects and their virtual representations in an Internet-like structure. The authors add to the rapid growth in research on IoT communications and networks, confirming the scalability and broad reach of the core concepts. The book is filled with examples of innovative applications and real-world case studies. The authors also address the business, social, and legal aspects of the Internet of Things and explore the critical topics of security and privacy and their challenges for both individuals and organizations. The contributions are from international experts in academia, industry, and research.

ASVAB Success, 2015-01-16 Presents study guides for the core subjects of the ASVAB, including arithmetic reasoning, reading comprehension, and vocabulary, and provides strategies for test taking.

S-Bpm One - Setting the Stage for Subject-Oriented Business Process Management Hagen Buchwald, Albert Fleischmann, Detlef Seese, Christian Stary, 2011-08-14 This book constitutes the refereed proceedings of the First Workshop on Subject-Oriented Business Process Management, S-BPM ONE 2009, held in Karlsruhe, Germany, in October 2009. The papers are organized in topical sections on visionary engagements; essential capabilities; and penetration perspectives.
