Your Guide to Good Health Insurance Nishant Baxi,2015-08-07 Are You Trying To Beat The Odds? Don't Back A Medical Looser. . .

Your Guide to Good Health Insurance Walter John,2012-03-04 The siren is howling and the ambulance is shifting back and forth weaving through the Monday morning rush hour traffic. The emergency medical technicians are checking your vital signs and using that doctor speak that you hear on television. The pain in your chest is almost unbearable, yet even through the hazy fog of pain your mind keeps shifting back to one nagging thought, Why didn't I buy that health plan? What is Amy going to do? Even if I make it, there's no way we can afford this! Unfortunately, this is a scene that is played out around the country every single day. Here is one more husband and father coming face to face with reality. Instead of, it will never happen to me, it has become, why did this happen to me? Will our husband and father survive? If he does, what are the chances that he and his family will resume a normal lifestyle? Statistically, our fellow has a 40% chance of survival depending on how long he's been abusing his body. Sadly, with no health insurance coverage and no available cash, the medical bills will likely force him into bankruptcy. The first thing you need to do is realize that you MUST have health coverage of some kind, even if only to cover the catastrophic expenses like our friend. The second thing you can do is to get informed! It's very difficult to fight a war when you know nothing about the enemy. Yes,

most insurance plans are so unwieldy and garbled that they make it almost impossible to understand. Don't find yourself in the same situation as our friend. Take control before it's too late. Your family will thank you and you'll be glad you did.

The End of Employer-Provided Health Insurance Paul Zane Pilzer, Rick Lindquist, 2014-11-06 How to save 20 to 60 percent on health insurance! *The End of Employer-Provided Health Insurance* is a comprehensive guide to utilizing new individual health plans to save 20 to 60 percent on health insurance. This book is written to ensure that you, your family, and your company get your fair share of the trillions of dollars the U.S. government will spend subsidizing individual health insurance plans between now and 2025. You will learn how to navigate the Affordable Care Act to save money without sacrificing coverage, and how to choose the plan that offers exactly what you, your family and your company need. Over the next 10 years, 100 million Americans will move from employer-provided to individually purchased health insurance. The purpose of *The End of Employer-Provided Health Insurance* is to show you how to profit from this paradigm shift while helping you, your family, and your employees get better and safer health insurance at lower cost. It will help you save thousands of dollars per person each year and protect you from the greatest threat to your financial future—our nation's broken employer-provided health insurance system. We are at the beginning of a paradigm shift in the way businesses offer employee health

benefits and the way Americans get health insurance—a shift from an employer-driven defined benefit model to an individual-driven defined contribution model. This parallels a similar shift in employer-provided retirement benefits that took place two to three decades ago from defined benefit to defined contribution retirement plans. Written by a world-renowned economist and New York Times best-selling author, this insightful guide explains how individual health insurance offers more to employees than employer-provided plans. Using the techniques outlined in this book, you and your employer will save money on health insurance by migrating from employer-provided health insurance coverage to employer-funded individual plans at a total cost that is 20 percent to 60 percent lower for the same coverage. That's \$4,000 to \$12,000 in savings per year for a family of four for the same hospitals, same doctors, and same prescriptions.

The Guide to Buying Health Insurance, and Health Care Kevin Wacasey, 2017-04
The health insurance industry has changed. Gone are the days when you paid your premium, and your plan picked up the tab for all your health care. Nowadays the average deductible is over \$2,000, which means that you will have to pay for most, if not all of your health care in any given year. Even worse are the dirty marketing tricks used to sell health insurance. You can spend thousands of dollars a year on a policy that you'll most likely never use, or you can spend even more to get a lower deductible that only gives you the illusion of better coverage. In this book physician and licensed health insurance agent Dr. Kevin Wacasey shows you how to save money on health insurance, and health care. First he cuts through the complexity of buying health insurance, by proving that upgraded plans with supposedly better coverage often end up costing more than you could ever save. Next Dr. Wacasey

takes the reader along as he shops for a health insurance plan, then using a simple formula to compare ten different scenarios (pulled straight from healthcare.gov), Dr. Wacasey demonstrates that - in all ten cases - the Bronze plan will end up saving the consumer the most money. Both in sickness, and in health. Finally Dr. Wacasey reveals how much health care goods and services really cost, and offers tips on how patients can save money on everything from ambulances to operations. Individuals, business owners, and anyone else who has to pay for health insurance, or for health care, will find Dr. Wacasey's book invaluable as he shows how to save lots of money - yet receive better care than ever before - in the first consumer-driven health care system the U.S. has ever known.
