Thanks for Watching Patricia G. Lange, 2019-11-15
YouTube hosts one billion visitors monthly and sees more than 400 hours of video uploaded every minute. In her award winning book, *Thanks for Watching*, Patricia G. Lange offers an anthropological perspective on this heavily mediated social environment by analyzing videos and the emotions that motivate sharing them. She demonstrates how core concepts from anthropology—participant-observation, reciprocity, and community—apply to sociality on YouTube. Lange's book reconceptualizes and updates these concepts for video-sharing cultures. Lange draws on 152 interviews with YouTube participants at gatherings throughout the United States, content analyses of more than 300 videos, observations of interactions on and off the site, and participant-observation. She documents how the introduction of monetization options impacted perceived opportunities for open sharing and creative exploration of personal and social messages. Lange's book provides new insight into patterns of digital migration, YouTube's influence on off-site interactions, and the emotional impact of losing control over images. The book also debunks traditional myths about online interaction, such as the supposed online/offline binary, the notion that anonymity always degrades public discourse, and the popular characterization of online participants as over-sharing narcissists. YouTubers' experiences illustrate fascinating hybrid forms of contemporary sociality that are neither purely mediated nor sufficient when conducted only in person. Combining intensive ethnography, analysis of video artifacts, and Lange's personal vlogging experiences, the book explores how YouTubers are creating a posthuman collective characterized by interaction, support, and controversy. In analyzing the tensions between YouTubers'

idealistic goals of sociality and the site's need for monetization, *Thanks for Watching* makes crucial contributions to cultural anthropology, digital ethnography, science and technology studies, new media studies, communication, interaction design, and posthumanism. For its perceptive analysis of video blogging for self-expression and sociality, *Thanks for Watching* received the Franklyn S. Haiman Award for Distinguished Scholarship in Freedom of Expression (2020), from the National Communication Association.

According to Frans Johansson's research, successful people and organizations show a common theme. A lucky moment occurs and they take advantage of it to change their fate. Consider how Diane von Furstenberg saw Julie Nixon Eisenhower on TV wearing a matching skirt and top, and created the timeless, elegant wrap-dress. That was a "click moment" of unexpected opportunity. Johansson uses stories from throughout history to illustrate the specific actions we can take to create more click moments, place lots of high-potential bets, open ourselves up to chance encounters, and harness the complex forces of success that follow.

The Death of Expertise Tom Nichols, 2024 In the early 1990s, a small group of AIDS denialists, including a University of California professor named Peter Duesberg, argued against virtually the entire medical establishment's consensus that the human immunodeficiency virus (HIV) was the cause of Acquired Immune Deficiency Syndrome. Science thrives on such counterintuitive challenges, but there was no evidence for Duesberg's beliefs, which turned out to be baseless. Once researchers found HIV, doctors and public health officials were able to save countless lives through measures aimed at preventing its transmission--

The Last Days of Old Beijing Michael Meyer, 2010-07-23
Journalist Michael Meyer has spent his adult life in China, first in a small village as a Peace Corps volunteer, the last decade in Beijing--where he has witnessed the extraordinary transformation the country has experienced in that time. For the past two years he has been completely immersed in the ancient city, living on one of its famed hutong in a century-old courtyard home he shares with several families, teaching English at a local elementary school--while all around him progress closes in as the neighborhood is methodically destroyed to make way for high-rise buildings, shopping malls, and other symbols of modern, urban life. The city, he shows, has been demolished many times before; however, he writes, the epitaph for Beijing will read: born 1280, died 2008...what emperors, warlords, Japanese invaders, and Communist planners couldn't eradicate, the market economy can. The Last Days of Old Beijing tells the story of this historic city from the inside out--through the eyes of those whose lives are in the balance: the Widow who takes care of Meyer; his students and fellow teachers, the first-ever description of what goes on in a Chinese public school; the local historian who rallies against the government. The tension of preservation vs. modernization--the question of what, in an ancient civilization, counts as heritage, and what happens when a billion people want to live the way Americans do--suffuse Meyer's story.
