**Critical Visualization** Peter A. Hall,Patricio Dávila,2022-12-01 Information may be beautiful, but our decisions about the data we choose to represent and how we represent it are never neutral. This insightful history traces how data visualization accompanied modern technologies of war, colonialism and the management of social issues of poverty, health and crime. Discussion is based around examples of visualization, from the ancient Andean information technology of the quipu to contemporary projects that show the fate of our rubbish and take a participatory approach to visualizing cities. This analysis places visualization in its theoretical and cultural contexts, and provides a critical framework for understanding the history of information design with new directions for contemporary practice.

**Phthalocyanine Synthesis And Computational Design Of Functional Tetrapyrroles**

Karl M Kadish, Kevin M Smith, Roger Guilard, 2019-03-15 Volume 45 in the highly successful series Handbook of Porphyrin Science presents three very informative chapters of significant topical interest to researchers in the broad field of porphyrin science. The first chapter (Chapter 215) systematically describes in great detail the many synthetic methods utilized for the preparation of both metal-free and metallo-phthalocyanines. In the second chapter (Chapter 216), new developments in the synthesis, structure, and circular dichroism of chiral porphyrin systems are discussed in depth. The third and final chapter in this volume (Chapter 217) describes up-to-date advances in the use of computational methodology for the design and synthesis of functionally useful tetrapyrroles such as phthalocyanines, porphyrins and 9. The volume concludes with a useful comprehensive index. The overall emphasis of Volume 45 of the Handbook of Porphyrin Science series, centers on synthetic methodology and processes, with a diversion in Chapter 217 to include predictive computational methodology, and in Chapter 216 to address the importance of chirality in tetrapyrrole systems. All three chapters will be of interest to researchers in the field and should provide powerful tools for anyone involved in the chemistry of phthalocyanines, porphyrins and related systems.

Yemen in the Shadow of Transition Stacey Philbrick Yadav,2022-11-01  
Responding to a diplomatic stalemate and a catastrophic humanitarian crisis, Yemen's civil actors work every day to build peace in fragmented local communities across the country. This book shows how their efforts relate to longstanding justice demands in Yemeni society, and details three decades of alternating elite indifference toward, or strategic engagement with, questions of justice. Exploring the transformative impact of the 2011 uprising and Yemenis' substantive wrestling with questions of justice in the years that followed, leading Yemen scholar Stacey Philbrick Yadav shows how the transitional process was ultimately overtaken by war, and explains why features of the transitional framework nevertheless remain a central reference point for civil actors engaged in peacebuilding today. In the absence of a negotiated settlement, everyday peacebuilding has become a new site for justice work, as an arena in which civil actors enjoy agency and social recognition. Drawing on seventeen years of field research and

interviews with civil actors, Yadav positions Yemen's non-combatants not-or not only-as victims of conflict, but as political agents imagining and enacting the justice they wish to see.

**Canyon Village in Yellowstone** Lesley M. Gilmore, 2017-05-08 By 1955, the national parks were facing a crisis of dilapidation from heavy use and lack of funding. The answer was Mission 66. This visionary plan, implemented over the next decade, included installation of new facilities to accommodate the influx of visitors and enhance their experiences. The pilot development in Yellowstone, named Canyon Village, introduced a modern aesthetic to the parks and emphasized the concept of conservation. This man-made environment was purposefully sited away from the Grand Canyon of the Yellowstone, providing a natural buffer. Architect Lesley M. Gilmore presents the complexities of this historic, ambitious model for the movement that marked the continued evolution of the national parks into the destinations we flock to today.
