**La vie privée à l'ère du numérique** REY Bénédicte, 2012-09-05 La démocratisation de l'informatique, puis des usages de l'internet, de la téléphonie mobile, ou plus récemment d'autres objets communicants génèrent une profusion de traces numériques gardant en mémoire les actions des usagers. Approuvé par certains qui y voient l'opportunité d'améliorer la sécurité publique, la relation marchande ou encore leur propre confort quotidien, ce constat fait craindre à d'autres l'avènement d'une société de la surveillance érodant le respect de la vie privée. Cet ouvrage étudie la notion d'espace privé à l'ère du numérique. Il montre comment les changements technologiques, de services et d'usages redéfinissent l'acceptation traditionnelle de la vie privée fondée sur des normes, et comment, en complément du dispositif normatif existant, des modalités de régulation appropriables par les individus sont envisagées.

**Vidéo-surveillance et détection automatique des comportements anormaux** Jean-Jacques Lavenue, 2011-06-10 La vidéosurveillance fait désormais partie des outils utilisés dans les politiques sécuritaires. Les récentes évolutions techniques rendent son usage de plus en plus intrusif dans la vie privée mais aussi dans l'espace public. Cet ouvrage explore une dimension encore inédite de la vidéosurveillance. Elle réside dans le caractère automatique de la détection des « comportements anormaux » dans l'espace public. L'anormalité est un enjeu fondamental dans la définition de la citoyenneté, en établissant une frontière entre ce qui est jugé acceptable et ce qui doit être réprimé. Or, des projets de recherches appliqués récents tentent de coupler l'usage de la vidéosurveillance avec une évaluation automatique de l'anormalité. Désormais, les algorithmes contribuent à définir ces comportements anormaux

et donc, dessinent les figures de l'anormal. L'automaticité modifie considérablement les capacités d'appréciation de la normalité, jusqu'ici de la compétence du juge et des pouvoirs publics. La convergence des techniques (vidéo, base de données informatiques...) contribue à modifier profondément les frontières de l'espace public et, par conséquent, de l'espace démocratique. L'ouvrage présente les débats interdisciplinaires qui ont eu lieu à l'occasion d'une application technique actuellement en cours. S'interroger sur ce qu'est un comportement anormal permet de rappeler les modalités d'élaboration de la normalité dans une démocratie.

**Cyberspace in Peace and War, Second Edition** Martin Libicki, 2021-09-15 This updated and expanded edition of *Cyberspace in Peace and War* by Martin C. Libicki presents a comprehensive understanding of cybersecurity, cyberwar, and cyber-terrorism. From basic concepts to advanced principles, Libicki examines the sources and consequences of system compromises, addresses strategic aspects of cyberwar, and defines cybersecurity in the context of military operations while highlighting unique aspects of the digital battleground and strategic uses of cyberwar. This new edition provides updated analysis on cyberespionage, including the enigmatic behavior of Russian actors, making this volume a timely and necessary addition to the cyber-practitioner's library. *Cyberspace in Peace and War* guides readers through the complexities of cybersecurity and cyberwar and challenges them to understand the topics in new ways. Fighting Terrorism and Drugs Jörg Friedrichs, 2007-09-12 This book closely examines the fight of large

European states against terrorism and drugs, from the 1960s to the present day.

E-government in Europe Paul G. Nixon, Vassiliki N. Koutrakou, 2006-12-05 This book traces the development of e-government and its applications across Europe, exploring the effects of information and communication technology (ICTs) upon political action and processes. Explores a range of concepts and topics underpinning e-government in Europe: the degree to which e-government translates into genuine reform of government and public administration the dual role of the EU as both a provider of e-government through its own internal activities and also as a facilitator or aggregator in the way it seeks to engender change and promote its ethos in member states across the EU cyberterrorism and its use both by terrorists and governments to pursue political agendas. Featuring in-depth case studies on the progress of e-government in the UK, France, Germany, Denmark, The Netherlands, Portugal, Greece, Slovenia, Hungary, and Estonia. These case studies address the above issues, whilst at the same time highlighting commonality and diversity in practice and the paradox between top-down strategies and the effort to engage wider civil participation via e-government. e-Government in Europe will be of interest to students and scholars of public policy, politics, media and communication studies, computing and information and communications technologies and European studies.

*RFID, une technologie controversée : ethnographie de la construction sociale du risque (Collection Mondialisation, Hommes et Sociétés)* DRAETTA Laura, DELANOË Alexandre, 2012-07-01 L'identification par radiofréquences, également connue sous l'acronyme RFID, est une technologie de lecture et d'écriture à distance, par fréquences radio. Par sa principale propriété, celle de réaliser une communication sans

contact, elle apparaît au début du XXIème siècle comme une technologie émergente dans la gestion des flux d'une économie globale, en particulier dans le domaine de la traçabilité des objets, des animaux, mais aussi celui de l'identification des personnes. Dès les années 2000, cette technologie semble être arrivée à un point crucial de maturité et son avenir économique s'annonce prometteur. Pourtant, le marché de masse tarde à se substituer au marché de niche. La RFID pose un problème public : au lieu de réaliser ses promesses, elle apparaît plutôt comme une menace. L'analyse présentée dans cet ouvrage s'appuie sur les travaux de recherche en sociologie de l'innovation, sociologie de l'environnement et du développement durable et sociologie des controverses que les auteurs conduisent sur le terrain de la RFID depuis plusieurs années.

*Data Protection and Privacy, Volume 14* Dara Hallinan, Ronald Leenes, Paul De Hert, 2021-12-16  
This book brings together papers that offer conceptual analyses, highlight issues, propose solutions, and discuss practices regarding privacy, data protection and enforcing rights in a changing world. It is one of the results of the 14th annual International Conference on Computers, Privacy and Data Protection (CPDP), which took place online in January 2021. The pandemic has produced deep and ongoing changes in how, when, why, and the media through which, we interact. Many of these changes correspond to new approaches in the collection and use of our data - new in terms of scale, form, and purpose. This raises difficult questions as

to which rights we have, and should have, in relation to such novel forms of data processing, the degree to which these rights should be balanced against other poignant social interests, and how these rights should be enforced in light of the fluidity and uncertainty of circumstances. The book covers a range of topics, such as: digital sovereignty; art and algorithmic accountability; multistakeholderism in the Brazilian General Data Protection law; expectations of privacy and the European Court of Human Rights; the function of explanations; DPIAs and smart cities; and of course, EU data protection law and the pandemic – including chapters on scientific research and on the EU Digital COVID Certificate framework. This interdisciplinary book has been written at a time when the scale and impact of data processing on society – on individuals as well as on social systems – is becoming ever starker. It discusses open issues as well as daring and prospective approaches and is an insightful resource for readers with an interest in computers, privacy and data protection.

**Putin** Jacques Baud,2023-07-04 Has Vladimir Putin become the master of the game? Why and how did the Russian President decide to attack Ukraine? Did he seek to prevent Ukraine from associating with Europe? Does he seek to reconstitute the USSR? Did NATO promise not to expand east after 1990? Is the Nord Stream 2 project the sinews of war? Is Ukraine's neutrality the only solution? Has Russia ever lost or won the war?... Based on the files of the intelligence services and official reports, Jacques Baud thus reviews the events of the recent history of Russia, which led to the war with Ukraine; it analyzes the various disputes between the West and Russia, and sheds light on the role that Putin plays today on the international scene. Colonial Jacques Baud is a former member of the Swiss Strategic Intelligence, a specialist in Eastern Europe and former head of Doctrine of the United Nations Peace Operations. Within NATO, he was involved in programs in Ukraine, including after the Maidan Revolution of 2014 and 2017. He is the author of several books on intelligence, war and terrorism, including Putin, Game master?, Governing by Fake News and The Navalny Affair, all published by Max Milo.

*Who Rules the Net?* Adam D. Thierer,Clyde Wayne Crews,2003-10-25 The rise of the Internet has challenged traditional concepts of jurisdiction, governance, and sovereignty. Many observers have praised the Internet for its ubiquitous and borderless nature and argued that this global medium is revolutionizing

the nature of modern communications. Indeed, in the universe of cyberspace there are no passports and geography is often treated as a meaningless concept. But does that mean traditional concepts of jurisdiction and governance are obsolete? When legal disputes arise in cyberspace, or when governments attempt to apply their legal standards or cultural norms to the Internet, how are such matters to be adjudicated? Cultural norms and regulatory approaches vary from country to country, as reflected in such policies as free speech and libel standards, privacy policies, intellectual property, antitrust law, domain name dispute resolution, and tax policy. In each of those areas, policymakers have for years enacted myriad laws and regulations for realspace that are now being directly challenged by the rise of the parallel electronic universe known as cyberspace. Who is responsible for setting the standards in cyberspace? Is a U.N. for the Internetor a multinational treaty appropriate? If not, who's standards should govern cross-border cyber disputes? Are different standards appropriate for cyberspace and real space? Those questions are being posed with increasing frequency in the emerging field of cyberspace law and constitute the guiding theme this book's collection of essays.

Human Choice and Digital by Default: Autonomy vs Digital Determination David Kreps,Robert Davison,Taro Komukai,Kaori Ishii,2022-08-30 This book constitutes the refereed proceedings of the 15th IFIP TC 9 International Conference on Human Choice and Computers, HCC15 2022, in Tokyo, Japan, in September 2022. The 17 full papers presented were carefully reviewed and selected from 32 submissions. Summaries of 2 keynote presentations are also included. The papers deal with the constantly evolving intimate relationship between humans and technology.

There are still opposing and restraining forces to globalization processes taking place in media, and the global mediascape comprises international, regional and local markets, and global and local players, which in recent years have evolved at an uneven pace. By analyzing similarities and differences in a landscape where driving forces of globalization meet locally situated audiences and institutions, this volume unveils a complex, contested space comprising global and local players, whose success is determined by both their national and international dimensions. It guides its readers to the geographical and intellectual exploration of the international media landscape, analyzing the global and local media players and their modus operandi. Editor Paolo Sigismondi's insightful, engaging collection presents a compelling and novel approach to the analysis of global entertainment media. *World Entertainment Media: Global, Regional and Local Perspectives* is an ideal starting point for students and practitioners alike looking to build a solid understanding of the global mediascape, and a great resource for instructors and scholars in global media entertainment.

**Breaking Through** Martine Liautaud, 2016-04-01 When women succeed, we all win. *Breaking Through* explores the mentoring relationship, and unravels its effects on women, businesses, society, and the economy. In 2010, author Martine Liautaud founded the Women Business Mentoring Initiative

(WBMI) to support women entrepreneurs with the targeted advice and personalized guidance that can only come from a mentor. In late 2015, she set up the Women Initiative Foundation to broaden her action in favor of women in the business world. This book encapsulates the WBMI mission and other similar experiences inside international and US corporations, showing how mentoring and sponsorship can take many forms—and how each form benefits women in business. Through evidence-based narratives, you'll learn what real women have gained from both sides of the dynamic, and why they credit mentoring with the strength of their business success. These stories show how mentoring yields increased efficiency, improved financials, more effective management, increased innovation, a broader talent pool, and increased revenues, and how helping women succeed in business leads to increased philanthropy and improves community sustainability. Gender equality has made huge strides in the US and Western Europe, but this progress is only apparent in the junior levels of the workplace. This book shows how mentoring women entrepreneurs and women managers provides the key that opens the door to the new economy.

Understand why mentoring is key to women's economic advancement  
Learn how mentoring yields tangible benefits beyond the workplace  
Delve into the experiences of real mentor/mentee pairs  
Consider the effectiveness of various types of mentoring  
Despite the increasing opportunities for women in business, statistics and pervading stereotypes suggest that true gender equality is still far on the horizon. Mentoring and sponsorship can be tremendously helpful to women looking to achieve great things—the wisdom of experience is a powerful asset in business strategy and decision-making, and the mentor/mentee relationship benefits everyone. *Breaking Through* makes a compelling case for the effectiveness of

mentoring, with real women's stories of success.
