Webcasting Worldwide Louisa S. Ha,Richard J. Ganahl,2013-03-07 Webcasting Worldwide tackles one of the most timely topics in mass communication today—the delivery of audio and video content via the Web, or webcasting—employing a global perspective to explore the subject. It is unique in providing a theoretical framework by which to analyze business models of emerging media, and it also examines the business practices of leading webcasters in the world's most developed broadband markets. With webcasting in its early development, the approaches discussed in this volume set the standards for the webcasting industry. Representing the major broadband markets in the world, this text is an authoritative and valuable reference for both researchers and practitioners. The chapters relate the business practices of webcasting to the media market environment and established media industries, such as television and radio, as well as government and non-profit organizations. Downloadable resources offer PowerPoint charts for use in training, education, and research, along with tables, graphs, screenshots, and hyperlinks. Webcasting Worldwide is essential reading for academic researchers and media industry practitioners, and the volume will be a useful text in advanced courses addressing media technology, media management, and international communication. For updates about the book chapters and latest commentaries on topics related to webcasting business models, please visit the Webcasting Business Models Blog at <http://webcastingworldwide.blogspot.com> Winner of The Association for Education in Journalism and Mass Communication Picard Award for Media Management and Economics 2007.

Cloud Transformation Roland Frank,Gregor Schumacher,Andreas Tamm,2023-01-10 In this book you will learn how the public cloud is significantly changing the cost structures of digital business models and thus existing markets. The relationships between the cloud architectures used, the organization of the company and the price and business models that are possible as a result are shown clearly and so that they can be used in your own company. The authors explain how, one after the other, more and more markets are becoming digital markets and what role marginal costs play in this. They describe how cloud-based IT is disrupting classic IT. This enables small teams to build scalable business models worldwide at zero marginal costs with little investment. The economic effects are clearly illustrated using specific examples. In addition, technical laypeople get an overview of which factors are particularly important for the competitiveness of their digital business models and how managers can influence them. Finally, the book gives practitioners specific guidelines on how the cloud transformation can be carried out in their company. The book is aimed primarily at executives and employees in the specialist departments and IT who want to drive the cloud transformation in their companies. This book is a translation of the original German 1st edition, Cloud-Transformation by Roland Frank, Gregor Schumacher and Andreas Tamm published by Springer Fachmedien Wiesbaden GmbH, part of Springer Nature in 2019. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content.

Who Owns the World's Media? Eli M. Noam,2016 This publication moves beyond the rhetoric of free media and free markets to provide a dispassionate and data-driven analysis of global media ownership trends and their drivers. Based on an extensive data collection effort from scholars around the world, it covers 13 media industries, including television, newspapers, book publishing, film, search engines, ISPs, and wireless telecommunication, across a 10-25 year period in 30 countries.

Law and Technology in a Global Digital Society Georg Borges,Christoph Sorge,2022-05-06 This book examines central aspects of the new technologies and the legal questions raised by them from both an international and an inter-disciplinary perspective. The technology revolution and the global networking of IT systems pose enormous challenges for the law. Current areas of discussion relate to autonomous systems, big data and issues surrounding legal tech. Ensuring data protection and IT security as well as the creation of a legal framework for the new technology as a whole can only

be achieved through international and inter-disciplinary co-operation. The team of authors is made up of experienced, internationally renowned experts as well as young researchers and professionals who give valuable insights from numerous different jurisdictions. This book is written for jurists and those responsible for technology in public authorities and companies as well as practising lawyers and researchers.

Work and AI 2030 Inka Knappertsbusch, Kai Gondlach, 2023-06-18 In ten years, we will take working with artificial intelligence (AI) more for granted than using cell phones today. 78 recognized experts from practice and research provide deep insights and outlooks regarding the influence of AI on everyday working life in 2030, explaining with practical tips how you can prepare for this development. The 41 concise articles cover a broad spectrum in the area examined in each case. Thanks to a standardized structure, they include a summary of the status quo, concrete examples, future expectations, an overview of challenges and possible solutions, and practical tips. The volume begins with societal and ethical issues before discussing legal considerations for employers and HR professionals, as well as the administration of justice. The other chapters examine the impact of AI on the world of work in 2030 in the sectors of business, industry, mobility and logistics, medicine and pharmaceuticals, and (further) education.

Alles rund um PC und Internet Sigrid Born, Hans-Georg Schumann, 2007

Online-database-Evolution Chris Ahrweiler, 2000 Entwicklung von modularen Web-Datenbanken Die steigende Bedeutung und der rasant wachsende Einsatz von Internet - basierten Applikationen sorgt für eine Renaissance von Datenbankabfrage- und Skriptsprachen. Ihr Einsatz bei der dynamischen Generierung von Webseiten erfordert vor dem Hintergrund hoher Verfügbarkeit eine globale Denkweise. Zur Bewältigung dieser Herausforderung wird in Online Database Evolution das Konzept der modularen Webdatenbank erarbeitet und anhand zweier aktueller Beispiele aus dem universitären Bereich exemplarisch dargestellt. Dabei werden auch die Stärken bzw. Chancen dieser neuen Technologie herausgearbeitet und ein Szenario für die zukünftige Entwicklung präsentiert. Zielgruppe: Für Web-Profis als auch Einsteiger gleichermaßen interessant. Werkzeuge: SQL, HTML, Active Server Pages, Access, Internet Information Server

Mobile Media Jo Groebel, Eli M. Noam, Valerie Feldmann, 2006-08-15 The proliferation of mobile media in recent years is an international phenomenon, with billions of devices sold annually. Mobile communications are now moving beyond individualized voice to mass media content--text, voice, sound, images, and even video. This will create new types of content that allow media companies and users to interact in new ways. There is a strong interest from the media and telecom industries in what manner of applications and content can be distributed in that fashion, and at what cost. To answer these questions, the book provides 18 chapters from internationally renowned authors. They identify likely types of content such as news, entertainment, peer-to-peer, and location-specific information; evaluate the economics, business models, and payment mechanisms necessary to support these media; and cover policy dimensions such as copyright, competitiveness, and access rights for content providers. This volume takes the reader through the various elements that need to be considered in the development of third generation (3G) content, and explains pitfalls and barriers. The result is a volume of interest to business professionals, academics, and policy makers. The book is international in focus and a glossary of terms is provided. There are few publications available which give an overview of this rapidly changing field.

TRUSTING MOBILE PAYMENT Andrea Bauer, 2017-07-18 In this book Andrea Bauer examines the apparently simple question of the role of trust in the development and establishment of mobile payment services. The proliferation of new payment instruments was always associated with the condition of trustworthiness. Even if the form of payment has changed constantly in the past (e.g. cowrie shells, stones, coins, paper notes, plastic cards or electronic digits), the demand for trustworthiness was always an essential factor regarding its market acceptance. What trust exactly is, which functions trust has in the use of technical solutions and which aspects and determinants of trust are crucial regarding mobile payment services, Andrea Bauer will analyze in the present work.

Internet und Jugendschutz Ferdinand Offner, 2003-04-14 Inhaltsangabe: Zusammenfassung: Die Magisterarbeit „Internet und Jugendschutz“ wurde im November 2001 am Institut für Kommunikationswissenschaft (LMU München) eingereicht und stellt eine umfassende, vielseitige und einen Überblick verschaffende Abhandlung zum Thema „Internet und Jugendschutz“ dar. Auch wenn Publikationen zum Thema „Internet“ aufgrund der hohen Dynamik und ständigen Veränderungen des Mediums Internet relativ schnell an Aktualität verlieren, kann diese Magisterarbeit als gründliche, aufwendig recherchierte Informationssammlung und -auswertung zum Thema gesehen werden. Sie stellt den über Jahrzehnte gehandhabten Jugendmedienschutz den Anforderungen des neuen Mediums gegenüber, zeigt Problemzonen auf, nennt Bemühungen von Seiten des Staates und privater Organisationen, wie auch technische, rechtliche und medienpädagogische Lösungsansätze. Unter dem Hintergrund der ständig ansteigenden Zahl von Internetnutzern (insb. Kinder und Jugendliche) zeigt sich, daß sich gerade im Hinblick auf den Jugendschutz das Internet von den traditionellen Medien wesentlich unterscheidet und der Jugendschutz dadurch mit neuen Rahmenbedingungen konfrontiert wird. Es stellt sich die allgemeine Frage, wie sich das Internet und die Anliegen des Jugendschutzes vereinbaren lassen. Einerseits sollen Kinder möglichst früh den Umgang mit dem neuen Medium erlernen, andererseits melden sich neben Befürwortern auch vermehrt kritische Stimmen zu Wort. Die potentielle Gefährdung von Jugendlichen und Kindern spielt hierbei eine zentrale Rolle. Nicht zuletzt durch die öffentliche Debatte und unzählige Meldungen in den letzten Jahren über pornographische oder rechtsextremistische Inhalte im Internet ist bekannt, daß im Internet nicht nur seriöse Angebote abrufbar sind. Die Leitfrage der Magisterarbeit lautet: Inwiefern müssen die Ansätze des Jugendschutzes in Bezug auf das Internet überdacht werden? Als Annäherung an eine Beantwortung werden für den ersten großen Themenkomplex („Jugendmedienschutz vor der Kommerzialisierung des Internet“) folgende Untersuchungsfragen gestellt: Wozu bedarf es des Schutzes Jugendlicher und Kinder vor bestimmten Medieninhalten? Welche Medieninhalte gelten als jugendgefährdend bzw. strafbar? Welche Maßnahmen bestehen zur Wahrung des Jugendmedienschutzes? Welche Kontrollinstitutionen sind für die Wahrung des gesetzlichen Jugendmedienschutzes zuständig und wie effektiv ist deren Arbeit? Für den zweigeteilten Hauptthemenbereich (Internet [...])

Routledge Handbook of Media Law Monroe E. Price, Stefaan G. Verhulst, Libby Morgan, 2013 Featuring specially commissioned chapters from experts in the field of media and communications law, this book provides an authoritative survey of media law from a comparative perspective. The handbook does not simply offer a synopsis of the state of affairs in media law jurisprudence, rather it provides a better understanding of the forces that generate media rules, norms, and standards against the background of major transformations in the way information is mediated as a result of democratization, economic development, cultural change, globalization and technological innovation. The book addresses a range of issues including: Media Law and Evolving Concepts of Democracy Network neutrality and traffic management Public Service Broadcasting in Europe Interception of Communication and Surveillance in Russia State secrets, leaks and the media A variety of rule-making institutions are considered, including administrative, and judicial entities within and outside government, but also entities such as associations and corporations that generate binding rules. The book assesses the emerging role of supranational economic and political groupings as well as non-Western models, such as China and India, where cultural attitudes toward media freedoms are often very different. Monroe E. Price is Director of the Center for Global Communication Studies at the Annenberg School for the University of Pennsylvania and Joseph and Sadie Danciger Professor of Law and Director of the Howard M. Squadron Program in Law, Media and Society at the Cardozo School of Law. Stefaan Verhulst is Chief of Research at the Markle Foundation. Previously he was the co-founder and co-director, with Professor Monroe Price, of the Programme in Comparative Media Law and Policy (PCMLP) at Oxford University, as well as senior research fellow at the Centre for Socio Legal Studies. Libby Morgan is the Associate Director of the Center for Global Communication Studies at the Annenberg School for the University of Pennsylvania.

Shopping Malls im Internet Jürgen Fertig, 1999-09-28 Inhaltsangabe: Einleitung: Betrachtet man die aktuelle Entwicklungen im Internet-Bereich,

so kann man erkennen, daß die elektronischen Marktplätze und somit auch der Verkauf von Produkten und Dienstleistungen in Zukunft die Regeln des Wettbewerbs in den verschiedenen Branchen stark verändern wird. Doch das Online-Geschäft befindet sich in Deutschland noch in der Anfangsphase und bei vielen Unternehmen ist die Internet-Euphorie schon wieder in Ernüchterung umgeschlagen. Der Grund hierfür liegt oftmals in den zu hohen Erwartungen der Unternehmen, aber auch am fehlenden Know-How und der Unkenntnis über die Struktur und das Profil des neuen Mediums Internet. In der Planung und der Umsetzung von Geschäftsabwicklungen und dem Online-Verkauf im Internet (Electronic Commerce) haben viele Unternehmen noch keine Erfahrungen vorzuweisen und sind daher noch sehr zögerlich und unsicher. Ihnen fehlt die klare Vorstellung, ob die Plattform Internet überhaupt als Distributionskanal verwendet werden soll und wenn ja, welche Plattform dabei zum Einsatz kommt. Vorzugsweise stellen Unternehmen ihre Produkte und Dienstleistungen mittels eines Produktkataloges über einen eigenen Shop ins Internet. Aber gerade kleine und mittelständige Unternehmen können sich einen derart finanziellen Aufwand aufgrund ihrer Unternehmensgröße nicht leisten. Diese haben die Möglichkeit, einen Shop innerhalb einer Electronic Shopping Mall zu besetzen. D. h. ein Unternehmen bekommt in einem virtuellen Einkaufszentrum im Internet einen Shop zur Verfügung gestellt, den er dann mit seinen Produkten und Dienstleistungen gegen Gebühr oder Umsatzprovision einrichten kann. Das Wirtschaftsleben der heutigen Zeit ist gekennzeichnet durch den globalen Wettbewerb und der ständig ansteigenden Anforderungen der Kunden und Geschäftspartner. In der Zukunft werden die Unternehmenserfolge von der Zeit, den Kosten und der Kunden- und Lieferantennähe geprägt. Das Konzept der Anpassung an die neuen Anforderungen liegt in der elektronischen Unterstützung der Geschäftsabwicklung. Gang der Untersuchung: Da Electronic Shopping Malls einen Bestandteil des E-Commerce darstellen, wird im zweiten Kapitel dieser Arbeit zunächst ein allgemeiner Überblick über dieses Thema vermittelt. Das Kapitel betrachtet die verschiedenen mit dem elektronischen Geschäftsverkehr verbundenen Vorteile und Nachteile des E-Commerce und gibt einen Einblick über die Kosten, die solche Umstellungen mit sich bringen. Denn eine Integration [...]

Text Analysis Pipelines Henning Wachsmuth, 2015-12-02 This monograph proposes a comprehensive and fully automatic approach to designing text analysis pipelines for arbitrary information needs that are optimal in terms of run-time efficiency and that robustly mine relevant information from text of any kind. Based on state-of-the-art techniques from machine learning and other areas of artificial intelligence, novel pipeline construction and execution algorithms are developed and implemented in prototypical software. Formal analyses of the algorithms and extensive empirical experiments underline that the proposed approach represents an essential step towards the ad-hoc use of text mining in web search and big data analytics. Both web search and big data analytics aim to fulfill peoples' needs for information in an adhoc manner. The information sought for is often hidden in large amounts of natural language text. Instead of simply returning links to potentially relevant texts, leading search and analytics engines have started to directly mine relevant information from the texts. To this end, they execute text analysis pipelines that may consist of several complex information-extraction and text-classification stages. Due to practical requirements of efficiency and robustness, however, the use of text mining has so far been limited to anticipated information needs that can be fulfilled with rather simple, manually constructed pipelines.

Industry 4.0, China 2025, IoT Wolfgang Babel, 2022-11-02 The book gives an overview about automation technology over the last 50 years, based on my own experiences. It is a good summary for automation since 1970 for all who want to know about the context of automation developments and their standards. It is a fundamental summary and enables the reader to get experience in the complex field of automation. In detail the question is raised, whether Industry 4.0, China 2025, IoT, AI are a revolution or more an evolution of time-wise established available technologies in HW, SW and algorithms. Is the hype about Industry 4.0 justified or not? In that context a timeline since 1970 is shown for AI, ANN, essential milestones in automation, e.g. OSI-model, automation pyramid, standards for bus systems, main SW-languages, robots, AI, ANN, pattern recognition, Ethernet, the 12 most important international field buses, their main features and characteristics, foundation of committees, harmonization and

standardization efforts, OPC UA and cloud computing, field devices, PLCs, SCADA, MES, ERP and automation history. All that history is seen in the context of μ -controller, DSP (Digital signal processor), FPGAs (Field Programmable Gate Arrays), ASICs (Application-Specific Integrated Circuit) , Chip on Board. It includes the HW-history, from Intel 8080 to octuple multicore processors. In the same way it is shown the history of field device out from laboratory into the field with all difficulties and benefits of that transition. The issues are summarized in a pyramid of complexity. Requirements for robustness and safety are shown for field devices. In the same way it is shown the development of mainframes, workstations and PC's. SAP a leading ERP System is explained in more detail. Specially it is figured out how SAP works and what has to be considered in working with such kind of system. The differences between MES- and ERP-systems are discussed, specially also for future combined SAP/MES systems. Explained are the problems of midsized companies (SMEs) in dealing with Industry 4.0 and automation. Further examples are given and discussed for automated quality control in automotive, PCB-handling, CIGS (Solar cell)-production. Also shown is the upgrade for older products and make them ready for automation standards. In detail the history of the modern robotics is shown for the automotive industry. In summary also is figured out the Industry 5.0 which is just coming up more and more.

Attribution of Advanced Persistent Threats Timo Steffens, 2020-07-20 An increasing number of countries develop capabilities for cyber-espionage and sabotage. The sheer number of reported network compromises suggests that some of these countries view cyber-means as integral and well-established elements of their strategical toolbox. At the same time the relevance of such attacks for society and politics is also increasing. Digital means were used to influence the US presidential election in 2016, repeatedly led to power outages in Ukraine, and caused economic losses of hundreds of millions of dollars with a malfunctioning ransomware. In all these cases the question who was behind the attacks is not only relevant from a legal perspective, but also has a political and social dimension. Attribution is the process of tracking and identifying the actors behind these cyber-attacks. Often it is considered an art, not a science. This book systematically analyses how hackers operate, which mistakes they make, and which traces they leave behind. Using examples from real cases the author explains the analytic methods used to ascertain the origin of Advanced Persistent Threats.

Social - Local - Mobile Gerrit Heinemann, Christian Gaiser, 2014-11-20 In the future, shopping will be greatly influenced by a combination of localization issues, mobile internet at the point of sale, and use of social networks. This book focuses on the 'SoLoMo synergies' that arise from this paradigm shift in future shopping, which also promises new and effective marketing options for traditional retailers. It also reflects the current status of research and business practice, analyzing the basic factors of SoLoMo in detail. The importance of Location-based Services (LBS) is elaborated and analyzed in an empirical study using a market based case of kaufDA – a leading German online shopping network. The evidence shows that customers see LBS as an attractive tool and are prepared to change their buying behavior. Though LBS is still in its early stages and its professional longevity remains to be seen, it also promises tremendous potential for the future.

Life Engineering Hubert Osterle, 2019-10-25 Machine Intelligence is changing every aspect of our lives. Internet traffic and sensors in households, cars, and wearables provide data that oligopolistic companies collect and use to extract patterns of human behavior. Further, active digital assistants are taking over more and more of our everyday decisions. Humanity is on the verge of an evolutionary leap and it is time to determine if this development will benefit people's wellbeing or will just mean the accumulation of capital and power with no regard for quality of life. This book integrates the perspectives of various disciplines that are striving to establish resilient foundations – computer science, economics and social sciences, political science, psychology, philosophy, neuroscience, ethics and religion – in order to clarify a number of positions and, as a result, objectify the discussions. Written by Hubert Osterle, a researcher working at the interface of these disciplines, the book promotes debate on the future of man and

machine, on happiness and evolution and on the major changes brought about by digital technology. Last but not least, it is a manifesto calling for a new – integrated – discipline to be founded: life engineering. „If you want to think more deeply about what machine intelligence (aka AI) really means for humanity, you should read this book. Hubert Oesterle takes an amazingly broad and multi-disciplinary look at all relevant aspects, from the roots of human behavior to the impact advanced digital assistants might have on our daily lives (and who will control these assistants). Highly recommended!“

Linguistic Purism in the Germanic Languages Nils Langer, Winifred Davies, 2011-12-22 Purism is an aspect of linguistic study which appeals not only to the scholar but also to the layperson. Somehow, ordinary speakers with many different mother tongues and with no formal training in linguistics share certain beliefs about what language is, how it develops or should develop, whether it has good or bad qualities, etc. The topic of linguistic purism in its many realisations is the subject of this volume of 19 articles selected from the contributions presented at a conference at the University of Bristol in 2003. In particular, the articles deal with the relationship of purism to historical prescriptivism, e.g. the influence of grammarians in the 17th and 18th centuries, to nationhood, e.g. the instrumentalising of purism in the standardisation of Afrikaans or Luxembourgish, to modern society, e.g. the existence of puristic tendencies in computer chatrooms, to folk linguistics, e.g. lay perceptions of different varieties of English, and to academic linguistics, e.g. the presence of puristic notions in the historiography of German or English.

The new online trade Gerrit Heinemann, 2023-03-30 This book presents developments and future trends in e-commerce, which is shaped by customers' new digital communication and consumption patterns. Gerrit Heinemann sheds light on e-commerce business models, channel excellence as well as success factors such as digital time advantages and customer centricity. He analyzes the digital challenges and highlights the consequences and opportunities associated with online commerce. Recognized best practices illustrate how successful digital commerce works and what the lessons learned of the past years are. The 13th edition describes which new approaches will shape the future of online retail and which developments will remain long-term issues. While, for example, app and smartphone commerce, including mobile payment, continue to be long-running issues, the environmental issue is coming at online commerce with a concentrated charge. This means that people's growing need for more sustainability and consideration for the environment has now also arrived in e-commerce. This work is therefore devoted to sustainable e-commerce in the context of online logistics, which runs counter to the new trend towards quick commerce. The topics of climate neutrality and returns management are also increasingly coming into focus. In addition, current topics such as the marketplace theme and social commerce will be explored in greater depth. Furthermore, numerous new legal requirements are taken into account, which place increased obligations on marketplace operators in particular. The content - Meta-targeting and business ideas in online retailing - Business model of online trade - Forms of online trade - Business systems and benchmarks in e-commerce - Best practices and risks in online retailing
